Many of the tools included in the Scheduling Components modules contain fields that are specific to the state of Missouri. These fields can be used for district-tracking purposes or these fields may directly affect state reporting. The information below further defines these state-specific fields to provide guidance in entering data.

Course Information

Classic View: Scheduling > Courses > Course

The Course tool contains information about courses attached to this calendar or school. Many of the Course fields are unique to the state of Missouri. These fields are further described below. All other fields in Course tool do not require unique, state-specific data. However, many of these fields are required and data entry in these fields is necessary. For more information on these fields, see the [Course Information](#) article.

Section Information

Classic View: Scheduling > Courses > Course > Section

The Section tool within the Course folder is provided as a view screen, listing all sections for the selected course and basic identifying information about that section - the assigned primary teacher, where the section meets, in what term and for what period, and how many students are in each section.

Once the user selects the Edit link next to a Section number, additional tools display, providing more details about that course section. Scheduling staff, principals, counselors, etc. can use the tools available in this view to manage course section information - entering grades, creating rosters, recording attendance, etc.

Many of the Section fields are unique to the state of Missouri. These fields are further described below. All other fields in Section tool do not require unique, state-specific data. However, many of these fields are required and data entry in these fields is necessary. For more information on these fields, see the [Sections](#) article.
