Resource Preferences (Kansas v3.6)

Last Modified on 08/21/2026 9:18 am CDT

Tool Search: Configuration

The Ed-Fi Configuration tool is used to establish Ed-Fi data resources. Once Resource Preferences have been selected, the following occurs:

- A valid configuration is made.
- Ed-Fi IDs are assigned to users.
- Data flows properly from Campus to Ed-Fi.

Prerequisites

- Ed-Fi functionality must be enabled via the Enable Ed-Fi System Preference.
- Ed-Fi should be properly configured via the Ed-Fi Configuration tool.

Resource Preferences

Resource Preferences determine which information is sent to Ed-Fi. These options apply to all schools within the district.

For each resource, choose Edit or Configure to map items like Scores or Grade Levels to an Ed-Fi Code. These items are called Descriptors.

- **Configure** displays when preferences have not been saved previously.
- **Edit** displays when preferences have already been set and saved.

Resources can be expanded by clicking the plus sign or collapsed by clicking the minus sign.

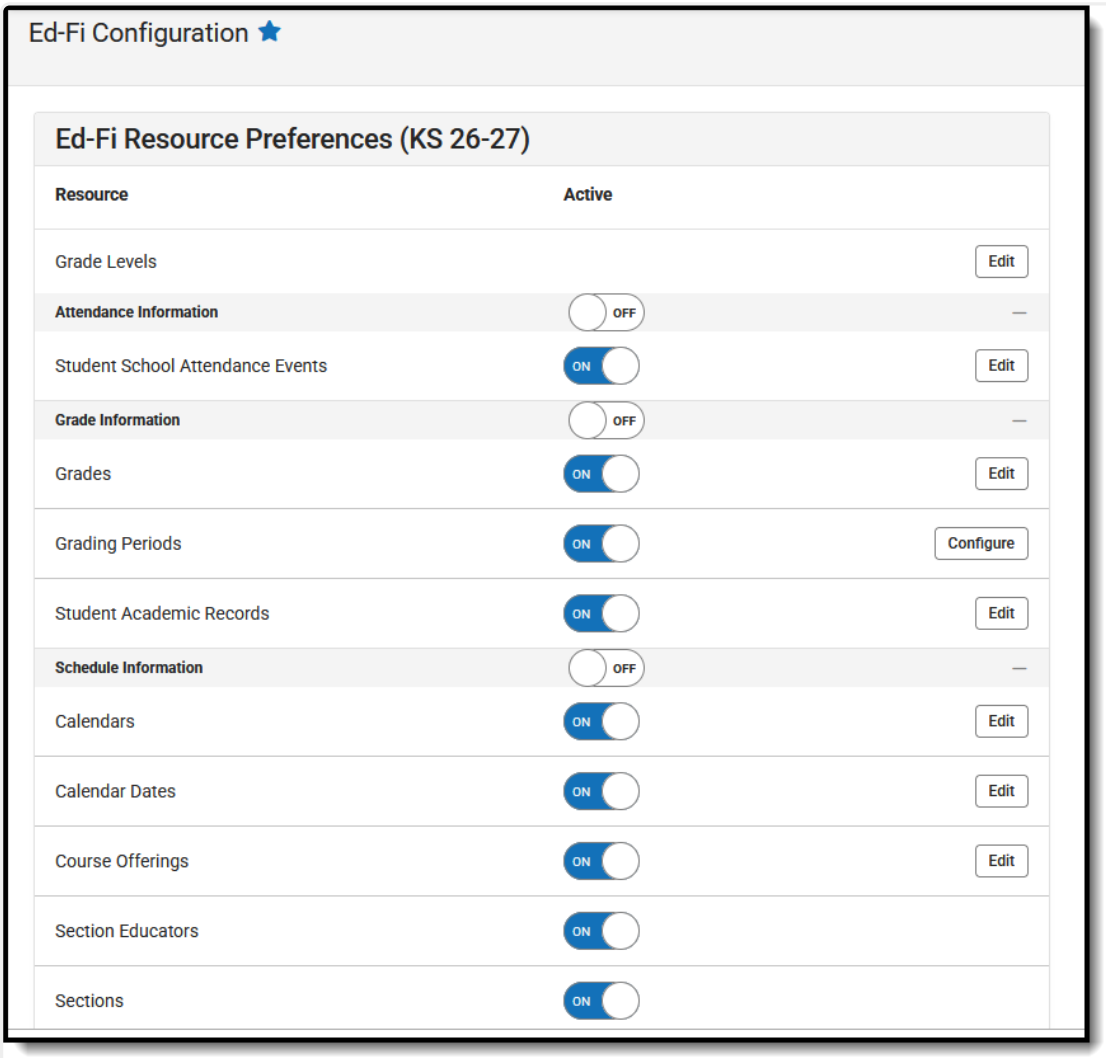

Resource Preferences can be imported or set manually. The information below details how to manually set the Resource Preferences for Kansas. For information on importing mappings, please see the Import Mappings section of the Core Ed-Fi Resource Preferences article.

When the Configure or Edit button does not display, the resource does not need to be mapped, and the toggle button can be used to turn the resource on or off. Select a link below to view how to set the Resource Preferences.

Resources should be toggled off until all data setup is complete and the district is ready to send data to Ed-Fi.

1. Select the **Resource Preferences** button for the current configuration. The list of available resources displays.
2. Click the **Edit** or **Configure** button to modify the resource preferences.
3. Click **Save** when finished mapping the Descriptors.

4. Turn the resource preference to **ON.**
5. **Close** the Resource Preferences when finished.

Turn on the preferences and configure or edit the available options.
