Tool Search: Ed-Fi

This resource represents an individual for whom instruction, services, and/or care are provided in an early childhood, elementary, or secondary educational program under the jurisdiction of a school, education agency, or other institution or program. A student is a person who has been enrolled in a school or other educational institution.

**A Student School Association record must be sent in order to see/access a Student record in the ODS. This is the security protocol set by Ed-Fi, you cannot see the Student record until they are associated to a School through the SSA record.**

The Student Resource is a shared record among all districts. If two districts have the same student in the same year, the last district to trigger data to Ed-Fi is the data stored in Ed-Fi.

For example, if one district put in a first name of "Robert" and the second district put in a first name of "Rob", the last district to update the student record is what will appear in Ed-Fi and on both District's reports. This is true for all field logic in the Student Resource.

## Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	<p>When an enrollment is created and saved for a person and the enrollment overlaps a configured year.</p> <ul style="list-style-type: none"> <li>Does not send a record when an enrollment is marked as No Show.</li> <li>Does not send a record when an enrollment is in a Calendar marked as State Exclude.</li> <li>Does not send a record when enrollment is in a School marked as State Exclude.</li> </ul>

Action	Trigger
Put	<p>When any student data is edited for the person in the Data Elements fields below.</p> <ul style="list-style-type: none"> <li>When the person's identity record is changed in one of the following fields: <ul style="list-style-type: none"> <li>Birth City</li> <li>Birth Country</li> <li>Birth Date</li> <li>Gender</li> <li>Birth State</li> <li>Date Entered US</li> <li>First Name</li> <li>Suffix</li> <li>Last Name,</li> <li>Middle Name.</li> </ul> </li> </ul>
Delete	Student records are never deleted because Student records are a shared resource among all districts.

## School Exclude, Calendar Exclude, Resource Toggle and Resync Logic

This table describes the School Exclude, Calendar Exclude, Resource Toggle and Resync logic of this object.

Action	Business Rule
None	When a resource is toggled to OFF after data has sent, all sent data remains in the ODS but no new data is sent.
Resync	When an Ed-Fi Code mapping is changed to a new code or made NULL, a resync must be performed for the data to be updated in the ODS.

## Natural Key Changes, Cascading Updates, and Deletes Logic

This table describes the Natural Key Changes/Cascading Updates and Deletes logic of this object.

Action	Business Rule
Post	<p>Natural Key change: Ed-Fi ID</p> <ul style="list-style-type: none"> <li>When an Ed-Fi ID is changed for a student, all data for the previous number are deleted and resent under the new number.</li> </ul>

Action	Business Rule		
Delete	<p>Cascading Deletes: The following resources are deleted and resent when the Ed-Fi ID is changed.</p> <table> <tr> <td> <ul style="list-style-type: none"> <li>• Student Parent Associations</li> <li>• Student Education Organization Associations</li> <li>• Student School Associations</li> <li>• Student Section Associations</li> <li>• Graduation Plans</li> <li>• Student Program Associations</li> <li>• Student CTE Program Associations</li> <li>• Student Special Education Program Associations</li> </ul> </td><td> <ul style="list-style-type: none"> <li>• Student Title 1 Part A Program Associations</li> <li>• Student Academic Records</li> <li>• Course Transcripts</li> <li>• Grades</li> <li>• Student Discipline Incident Associations</li> <li>• Discipline Actions</li> <li>• Student Cohort Associations</li> <li>• Student School Attendance Events</li> <li>• Student Section Attendance Events</li> </ul> </td></tr> </table>	<ul style="list-style-type: none"> <li>• Student Parent Associations</li> <li>• Student Education Organization Associations</li> <li>• Student School Associations</li> <li>• Student Section Associations</li> <li>• Graduation Plans</li> <li>• Student Program Associations</li> <li>• Student CTE Program Associations</li> <li>• Student Special Education Program Associations</li> </ul>	<ul style="list-style-type: none"> <li>• Student Title 1 Part A Program Associations</li> <li>• Student Academic Records</li> <li>• Course Transcripts</li> <li>• Grades</li> <li>• Student Discipline Incident Associations</li> <li>• Discipline Actions</li> <li>• Student Cohort Associations</li> <li>• Student School Attendance Events</li> <li>• Student Section Attendance Events</li> </ul>

## Scope Year Logic

This table describes scope year logic of this object.

Logic
<p>A record reports when an enrollment is created and saved that is aligned to a configured year.</p> <ul style="list-style-type: none"> <li>• The enrollment must overlap with the configured year to report.</li> <li>• Data only sends for the years that have valid configuration.</li> </ul>
<p>When using data in Campus that has a single date, the following logic is applied to determine the scope year(s) in which to report data:</p> <ul style="list-style-type: none"> <li>• Current Year: The record must overlap the current year.</li> <li>• Previous Years: The record's date must be on or before the schools year's end date defined in the School Years editor. If blank, the default date of 6/30/xxxx is used.</li> <li>• Future Years: The record's date must be on or after the schools year's start date defined in the School Years editor. If blank, the default date of 7/01/xxxx is used.</li> </ul>
<p>When using data in Campus that has start and end dates, the following logic is applied to determine the scope year(s) in which to report data:</p> <ul style="list-style-type: none"> <li>• Current Year: The record must overlap the current year.</li> <li>• Previous Years: The record's start date must be on or before the school year's end date and the record's end date must be after the school year's end date defined in the School Years editor. When blank, the default date of 7/01/xxxx is used.</li> </ul>

## Resource Preferences

This table describes the Resource Preferences of this object.

Data Element Label	Mapping Needed	Database field
birthCountryDescriptor	Birth Country Override	identity.birthcountry
birthStateDescriptor	Birth State Override	identity.birthstate

## Identity Mapping Object Key

This table describes the Identity Mapping Object Key of this object.

campusObjectType	Object Key Data Source
Person	personID

1. When a Student and Student School Association record has been sent for a student, a Student and Student School Association record is logged in the Ed-Fi Identity Mapping table. When the student's enrollment is deleted or their Ed-Fi ID is changed while the Student and/or Student School Association Resource Preference is turned off, the old record and resource ID remains in the table until the resource is turned back on and a resync is performed on either Students or Student School Associations.
2. The Students and Student School Associations records are deleted from the identity mapping table if all enrollments that were sent to Ed-Fi are deleted.

## Event Queue Detail

This table describes the Event Queue Detail of this object.

Campus Table	Ed-Fi Action	Fields
