## 4. Other Considerations

1. Issue: Courses marked state exclude still report to MDE.
  1. **Check if the course master was marked as state excluded and has been pushed down to schools. *If a course is marked as not state reported it should not be reporting to MCCC.***
  2. **Please double check data. Uncheck 'state report exclude' and recheck > save. A resync for all schedule related data including courses for this school should be performed as well.**
2. Best practice for entering the state code for the course is to NOT enter a leading zero. Local Course numbers should also not begin with a zero or a letter or special character.
3. The days for term start and end dates must be marked as instructional (in addition to school / attendance day). **For example, if the last instructional day of Term1 falls on a Friday, then the start date of Term 2 should be the following Monday (not Saturday).'**
4. **Terms and periods need to have all information entered. Periods ALWAYS need start and end time. Courses/Sections or Periods cannot be responsive.**
5. For MCCC each reported period needs the start and end time filled in, if state reported courses are scheduled into it.
