A new Curriculum Library has been released for Campus Learning customers. Using the Library, teachers can

- Share folders of curriculum.
- Easily add curriculum created by other teachers to their sections using the Curriculum Copier.

Currently, curriculum is shared by folder. Teachers can add metadata Details to their curriculum prior to sharing it, such as Subject and Grade Level, to help other teachers find it. Teachers may remove curriculum they've shared to the library, and users with the Curriculum Library District Manager tool right can remove any curriculum from the library.

When searching the library, enter search terms, or filter the library by Grade Level, Subject, or Standards. Click View to look at the items within a folder and add to section. Curriculum can be added by folder, or as individual pieces. When adding curriculum, teachers can set up grading details as part of the add process or save that task for later.

This release also includes a new tab in Assignments and Resources called Reflections. Reflections allow teachers to record how a piece of curriculum performed in their class via a short survey. Over time, as teachers can build up a record of how effective curriculum is and how well it works in their classes. To add a Reflection, click the Reflections tab on an assignment or resource and answer the questions that display. The questions vary from reflection to reflection to collect a variety of data about the curriculum, but some questions are included in every reflection.
