Tool Search: Staff Assignment

The Staff Assignment report collects information on teachers who provide instruction to students. To report, teachers must have a State Staff ID and teach at least one instructional class during the entered Start and End Date and have at least one student scheduled into that instructional class.

## Report Logic

One record per reportable Teacher and reportable Section combination that is active on at least ONE instructional date in the entered date range reports.

Staff and Section records do NOT report when:

- District Assignments are marked as **Exclude**.
- Courses are marked as **Exclude from State Reporting**.
- Calendars are marked as **Exclude**.

Teachers must have a **Staff State ID** entered on their Demographics record. Their District Assignment record must also be linked on the Section Staff History record. The District Assignments record must have the Title field populated in order to link the District Assignment record on the Section Staff History Record.

*District Assignment Title Field Populates the District Assignment Field on the Section Staff History Record*

## Section Staff History Role

The **Role** field on the Section Staff History must have a value that is NOT one of the following in order for that staff person to report:

- NSR: Not State Reported
- COL: College Instructor/Professor
- STU: Student Teacher

## Substitute Teachers

Short Term Substitutes (STS) do not typically report; however, logic exists to report both Long Term Substitutes (LTS) and Short Term Substitutes when they are scheduled for more than or equal to 20 days. The assigned Teacher of Record may report as active even though a LTS or STS teaches the class during the entered date range.

LTS or STS report class/teacher of record returning start and end dates entered on the Section Staff History record ONLY when the number of Monday-Friday School Days taught during the date range are greater than or

equal to 20 days. STS by definition should not be assigned to a section for more than 20 days.

## One Teacher, Multiple Teachers

When only one teacher is assigned to teach the section at any time during the reporting range, the following process is used to determine the reported dates:

- When there are no start or end dates entered on the Section Staff History, the first and last instructional dates of the class report as the Teacher's start and end dates.
- When start and end dates are entered on the Section Staff History where the dates selected are instructional days, the dates selected report.
- When the start date entered on the Section Staff History is not an instructional day, the first instructional date after the Teacher's entered start date reports.
- When the end date entered on the Section Staff History is not an instructional day, the first instructional date prior to the Teacher's entered end date reports.

When multiple teachers are assigned to teach the section at any time during the reporting range, the following process is used to determine the reported dates:

1. Look to see whether a substitute teacher (LTS or STS) is assigned as the Teaching Role.
2. When No, the dates report as mentioned above.
3. When Yes, the number of consecutive school days during the reporting range is content where the LTS/STS is scheduled.
4. When that number is less than 20 days, the Teacher of Record start and end dates reports as being present during the time the substitute is scheduled to teach the section.
5. When the number of days is more than 20 days, the Teacher of Record start and end dates reports as not being present during the time the substitute is scheduled to teach the section.

## Summer School Calendars

When the selected calendar is a Summer School calendar (the Summer checkbox is marked on the Calendar Information editor), ALL course sections must be scheduled for at least 10 instructional days to report. Summer courses for 2023 report in the 2023-2024 school year. Summer courses for 2024 report in the 2024-2025 school year.

Similar logic for Teacher of Record and Substitute Teachers that is noted above applies to Summer School Calendars as well. However, the days calculation uses a reduced 10 consecutive days count to determine the present value.

## Course Section Requirements

The following must be assigned on the Courses in order to report:

- The **State Course Code** must be populated on the Course Information editor.
- The Course Section must be scheduled into an Instructional period.
- At least one student must be scheduled into the Course Section.

The Course must be assigned SCED Code must be entered on the Course Information editor. This code is derived from the selections made in the NCES Data editor. Select the SCED Subject Area and SCED Course Identifier. Additional fields display after those selections are made.

The Intended Grade of the course must be Kindergarten to 12th grade:

- Using **SCED Lowest Grade** and **SCED Highest Grade fields**, the grade level range of the course can be

found:

- When the Lowest Grade is 03 and Highest Grade is 08, then all grades (03,04,05,06,07,08) in the range fall into K-12 requirement.
- When the Lowest Grade is 09 and Highest Grade is 07, then both grades (07, 09) fall into the K-12 requirement.
- When BOTH Lowest Grade and Highest Grade are NULL, the report records

The **Class Type** field must not be populated in order to report.

## Report Editor

Data Element	Description
<b>Setup</b>	
<b>Search Calendars</b>	Search field to narrow the list of calendars to select. Use the Expand All/Collapse All. Place a checkbox next to the desired school and calendars.
<b>Show Active Year Only</b>	When set to ON, only those calendars for the current school year are available for selection. When set to OFF, all calendars from all school years are available for selection.
<b>Report Options</b>	
<b>Start Date</b>	Entered date reflects the start of the reporting range in which data reports. This field defaults to July 01 of the school start year.
<b>End Date</b>	Entered date reflects the end of the reporting range in which data reports. This field defaults to June 30 of the school end year.
<b>Include Partial SSN</b>	When marked, the last four fields of the staff person's Social Security number are included in the report when the Social Security number is available on the staff person's Demographic record.
<b>Exclude Cross-Site Data</b>	When marked, staff information for Cross-Site Enrollment courses is not included in the report. Cross-Site Enrollment is a new tool coming soon. Watch the <a href="#">Cross-Site Enrollment video</a> for more information.
<b>Ad hoc Filter</b>	Select which students to include in the extract by choosing a filter that was created in the Filter Designer. Only those students included in the filter are included in the report.
<b>Output Options</b>	
<b>Report Processing</b>	To generate the report immediately, select <b>Generate Now</b> option. To choose when the report generates, use the <b>Submit to Batch</b> option. Submit to Batch is useful when generating the report for several calendars or for larger amounts of data being reported. See the <a href="#">Batch Queue</a> article for more information.
<b>Format Type</b>	Determines in which format the report generates - CSV or HTML.

## Generate the Report

1. Search for and select the desired **Calendars**.
2. Enter the desired **Start and End Dates**.
3. Mark the **Include Partial SSN** to include Social Security numbers in the report.
4. Mark the **Exclude Cross-Site Data** to ignore all Cross-Site Enrollment Courses.

5. Choose an **Ad hoc Filter** to return just the course and staff information included in the selected filter.
6. Select the desired **Report Processing** option of **Generate Now** or **Submit to Batch Queue**.
7. Select the desired **Format Type**.
8. Click **Generate**. The report displays in the selected format.
