Tool Search: Digital Learning

The Digital Learning Dashboard allows schools to track digital devices and internet availability for students. More than one record can be added, but records cannot overlap.

The screenshot displays the 'Digital Learning Dashboard' interface. At the top, there is a navigation breadcrumb: 'Student Information > State Programs > Digital Learning Dashboard'. Below this, there are fields for 'Student #', 'Grade', and 'DOB'. A toolbar contains icons for 'New', 'Save', 'Delete', 'Print Summary Report', and 'Documents'. A 'Related Tools' dropdown is also visible. The main content area is divided into two sections: 'Digital Learning Dashboard Summary' and 'Digital Learning Dashboard Detail'. The summary section shows a table with columns for 'Start Date', 'End Date', and 'Created By'. The detail section contains various input fields and dropdown menus for recording student information, including 'Learning Device Provider', 'Reason for No Home Device Access', 'Internet Performance', 'Internet Access In Residence', 'Outside Res. Internet Access Type', 'Comments', 'State Defined Elements' (Download Speed, Upload Speed, Download Speed Opt Out, Upload Speed Opt Out), and 'Home Provided Digital Device'.
