Tool Search: OR CTE Collection

The CTE Course File reports one record per unique section per student for the applicable school year, regardless of whether the student completed and/or passed the course.

The CTE Course File uses the student information submitted from the same year in the [CTE Student File](#) to verify each record. Therefore, the CTE Course File cannot be completed until AFTER the submission of the Student File.

Instructions

CTE Course & CTE Student

The CTE Collection uses the student information submitted in the same year's CTE Student collection to verify each record. This means CTE Course cannot be performed prior to the institution's complete submission to CTE Student.

CTE Student reports at least one row per student grade 9 and up in the entire school regardless whether the student engages with CTE. A maximum of 2 CTE IRC records report per participating student and a maximum of 4 CTE Work-based Learning records report per participating student.

CTE Course reports one row per CTE course attempt per student for the applicable school year regardless of whether the student completed and/or passed the course.

Choose the State Format to generate the file in the state defined file format; otherwise, choose HTML for testing/debugging.

This report might look different from some of the other available Oregon reports. Organization-wide initiatives are being made to improve technology and accessibility.

Report Logic

When one or more grades for the CTE course are posted to the transcript, only one record reports, returning the mapped State Score based on the most recent posted grade earned. The credits attempted field reports the total credits attempted from ALL transcript records with the reporting scoreID.

When an earned grade is NOT posted to the transcript, only one record reports, returning the most recent Grading Task marked as State Reported, captured in the last active Term Mask active during the class based on the Section Schedule Placement. The Credits Attempted field reports the total credits entered on the Grading Task marked as State Reported multiplied by the Credits Earned by the number of Term Masks that are active during the class based on the Section Schedule Placement.

A student does NOT report when:

- The Calendar of Enrollment is marked as State Exclude.
- The Enrollment record is marked as State Exclude or No Show.
- The Grade Level of Enrollment is marked as State Exclude.

A student DOES report when:

- They are assigned a **Student State Identifier (ID)**. (Demographics > Person Identifiers > Student State ID)
- They are **scheduled into at least one reportable section** on at least one date on or between the Start Date and End Date selected on the report editor. (Student Schedule; Section Roster > Active Students)
- They are enrolled in a grade level mapped to a **state grade level code of 09-12**. (Enrollments > General Enrollment Information > Grade)

A course reports when:

- The course is marked **Active**. (Course Information > Active)
- A **CIP Code** is assigned to the course. (Course Information > CIP COde)
- The section of the course has the **CTE Course checkbox marked**. (Course Information > CTE Course)
- The course is NOT marked as **Exclude from State Reporting**. (Course Information > Exclude from State Reporting)

A section reports when:

- The student is scheduled into the class (section) on at least one date in the reporting range. (Section Roster > Active Students)

Report Editor

Data Element	Description
Setup	
Search Calendars	Search field to narrow the list of calendars to select. Use the Expand All/Collapse All. Place a checkbox next to the desired school and calendars.
Show Active Year Only	When set to ON, only those calendars for the current school year are available for selection. When set to OFF, all calendars from all school years are available for selection.
Report Options	
Report Type	Determines which report generates - CTE Course or CTE Student.
Start Date	The entered date reflects the start of the reporting range in which data was reported. This field defaults to July 01 of the school start year.
End Date	The entered date reflects the end of the reporting range in which data was reported. This field defaults to June 30 of the school end year.
Exclude Cross-Site Data	When marked, the report does not include information from Cross-Site Enrollment courses.
Ad hoc Filter	Select which students to include in the extract by choosing a filter that was created in the Filter Designer. Only those students included in the filter are included in the report.
Output Options	
Report Processing	Select Generate Now to generate the report immediately. Select Submit to Batch to choose when the report generates. Submit to Batch is useful when generating the report for several calendars or for larger amounts of data being reported. See the Batch Queue article for more information.
Format Type	Determines in which format the report generates - CSV, HTML, or XML.

Generate the Report

1. Search for and select the desired **Calendars**.
2. Select **CTE Course** from the **Report Type** field.
3. Enter the correct **Start Date** and **End Date**.
4. Choose an **Ad hoc Filter** to return just the course and staff information included in the selected filter.

5. Select the desired **Report Processing** option of **Generate Now** or **Submit to Batch Queue**.
6. Select the desired **Format Type**.
7. Click **Generate**. The report displays in the selected format.
