[Report Logic](#) | [Report Editor](#) | [Report Layout](#)

The Full-Time Virtual Programs Data Collection extract collects data specific to the programs and students participating in them. The data collection aims to capture student information, such as the student's name, grade, and program entry/exit date. This information is used to ensure:

- Equity of programs and opportunities for all students regardless of instructional environment.
- Equity of supports that enhance student success.
- Alignment to content standards and LEA curriculum.
- Rigorous teaching and learning are comparable to the face-to-face classroom.

## Report Logic

The student must be enrolled in a Full-Time Virtual Program or have participated within the selected start and end date.

- Once a student enrolls in a virtual program, they should be reported in all subsequent files for the remainder of the reporting year, even if they have exited the program.
- ONE record per student's enrollment in a Full-Time Virtual Program.

The report can be run in the active year and any prior years.

# Report Editor

Field	Description
<b>Start Date</b>	The first date used to return data. Dates can be entered in <i>mmddyy</i> format, or use the calendar icon to select a date.
<b>End Date</b>	The last date used to return data. Dates can be entered in <i>mmddyy</i> format, or use the calendar icon to select a date.
<b>Run Date</b>	Defaults to the current date.
<b>File Identifier</b>	The submission number.
<b>Format</b>	The format in which the report generates: <ul style="list-style-type: none"> <li>• State Format (CSV)</li> <li>• HTML</li> </ul>
<b>Grade</b>	The grade level(s) of the students included in the report.
<b>Ad Hoc Filter</b>	Users can select an <a href="#">Ad Hoc Filter</a> to narrow the report results further.
<b>Select Calendars</b>	The calendar(s) from which data is pulled for the report must be selected. At least one calendar must be selected.
<b>Generate Report</b>	Displays the selected calendar information and extracts it immediately for review and printing in one of the selected formats.
<b>Submit to Batch</b>	Delays the extract generation to a designated time. Batch Queue functionality allows you to schedule when the extract is generated and navigate away from the extract editor while the extract is being built. The Batch Queue List also lets you view and access historical reports run through the Batch Queue tool. See the <a href="#">Batch Queue</a> article for more information

# Report Layout

Element	Logic	Location
<b>LEA_Number</b>	The two-digit state designation of the local education agency. Reports the State District Number.  <i>Numeric, 2 digits</i>	School & District Settings > District > District Information > State District Number  District.number
