Path: Cross-Site Enrollment

Early Warning

Early Warning Updated for Cross-Site Enrollments (SIS-178108) **[Enhancement]**

The Early Warning tool was updated to consider the new cross-site enrollment functionality, which introduces the concept of a Serving School and a Home School.

Students with an active SERVING school enrollment:

- DO NOT generate daily, monthly, or yearly Early Warning scores in the SERVING school calendar.
- DO generate daily, monthly, and yearly Early Warning scores in the HOME school calendar.

Path: Student Information > General > Early Warning

Flagged Assignments Report Not Loading in All Browsers (SIS-178277)

The Insights Flagged Assignments Report failed to load in Chrome and Edge web browsers. The report previously compiled all assignments for the selected calendar. This resulted in an extensive data set near the end of the school year that timed out and failed to display for large schools. This issue has been resolved.

The report was updated to limit the query to the previous 60 days of assignments to allow for targeted intervention, help the data set size remain relatively static, and enhance the report's performance. It loads and displays as expected in all Campus-supported browsers.

Path: Insights > Classroom Performance > Flagged Assignments

Prediction Notification Added (SIS-178933) **[Enhancement]**

The Early Warning tool utilizes student and District data to identify trends and predict a student's progression toward graduation. The following notification displays during a District's first year on the Infinite Campus system because there is no previous year of data for comparison to accurately assess whether the behavior/curriculum /attendance events are part of a larger pattern. This notification automatically disappears when the District enters its second year and the available data pool increases.

Notification Text

Early Warning GRAD Score generation recommends two years of observable SIS data. Shifts in a student's GRAD score will normalize as more data is available/entered into the SIS
