

# Account/PIN Import

Last Modified on 06/17/2024 1:01 pm CDT

[Before You Begin](#) | [Template Download & File Upload](#) | [Error Report](#) | [Data Matching](#) | [Test and Final Import](#)

To ensure a successful upload process, it is recommended that users complete the import one to two weeks before the Food Service accounts will be utilized and before the first transactions, including deposits, are made. This lead time will give you enough time to contact Campus support if you have any issues.

The Account/PIN Import tool uploads and matches data for the initial import of student and staff Food Service/POS accounts. Users are finished when all four steps are completed.

Once the import is completed and Food Service accounts have been created, this tool cannot be used again.

Template Download & File Upload
Data Matching
Test and Final Import

**Instructions**

This import tool is intended to walk the user through the upload and data matching for the initial import of student and staff food service/point of sale accounts. Once the import is completed, this tool cannot be used again.

Answer the questions below to determine if you can use this tool. If a district is not able to use this import tool based on the questions below, contact Support for assistance.

**Setup**

Does the legacy food service system have Family/Household Accounts? \*

No

Yes - This tool can only convert individual accounts; contact Support for assistance

Existing Food Service accounts in the Infinite Campus SIS

There are no existing accounts in Infinite Campus; data conversion can proceed.

The following preferences must be unchecked before proceeding with Food Service data conversion.  
All can be rechecked once data conversion is complete

PREFERENCE	CURRENT STATE
Auto Creation of Account with New Enrollment	<input checked="" type="checkbox"/> OK to proceed
Auto Creation of PIN with New Enrollment	<input checked="" type="checkbox"/> OK to proceed
Set Student Number as PIN	<input checked="" type="checkbox"/> OK to proceed

**PINs**

Are PINs being imported? \*

Yes

No - New PINs will be generated during the final import.

No - District will be using Student Number as PIN and District will run "Use Student Number as PIN Wizard" when conversion is complete.

Next

## Before You Begin

The Before You Begin setup asks questions and provides a series of checks to ensure that your district can use Account/PIN Import without any assistance from Infinite Campus Support. If a legacy food service system used family or household accounts, users cannot proceed to the next step of Account/PIN Import. They will need to contact Campus Support to have their data imported.

The Existing Food Service accounts in the Infinite Campus SIS is a field that assures there are no food service accounts in Campus.

Three preferences, found in Food Service > Setup > General Preferences, must be unchecked before proceeding. When unchecked, their state will appear as "OK to proceed" with a green checkmark. Once the Food Service/Point of Sale data conversion is complete, these preferences

can be rechecked.

Select one of the options from Are PINs being imported:

- Yes - PINs will be included in the template file uploaded in step 2.
- No - New PINs will be generated during the final import.
- No - The district will use Student Numbers as PINs and the District will run "Use Student Number as PIN Wizard" when conversion is complete.

Click **Next** when all requirements are met.

## Template Download & File Upload

✓  
 Before You Begin

2

3
  
 Data Matching

4
  
 Test and Final Import

**Instructions**

Download a template, fill in all information from the legacy system and upload the file below. Before files are populated, note that the completed file must contain all columns in the same order as in the template. If columns are missing, out of order or it contains additional columns, the upload file will be rejected. See steps below.

1. Download student and staff templates.
2. Complete templates.
3. Upload student patron file and staff patron file.
4. Review any errors that are reported.
5. Upload a corrected file if needed.

**Download Templates**

Download blank templates or templates that are pre-populated with students or staff that are in Infinite Campus SIS

Download Template(s)

**Patron Upload**

Uploading a patron file will replace any previously saved file.

Upload File(s)

Error Report

The Template Download & File Upload step is used to download blank templates or templates that

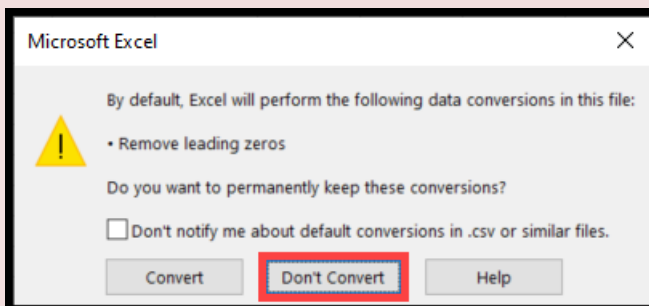

are pre-populated with students or staff that are in Infinite Campus SIS. Once completed, these templates are then uploaded to Infinite Campus to create new Food Service accounts.

Column headers must be spelled the same way as in the template file. If a user wants to keep notes in the upload file, they can do so, but it must be in a column to the right of the PIN column and not contain any headers.

A person who is not staff or a student could be on either file, such as a parent account with a person ID and no current staff/student record.

1. Click **Download Template(s)**.
2. Select from one of the following templates: Enrolled Campus Students, Employed Campus Staff, Blank Student, or Blank Staff.

When opening these files, select **Don't Convert**. Do not remove leading zeros that may be included in the student/staff number, person ID, or PIN.

3. Complete and save each template. Review the Fields in the Student Template and Fields in the Staff Template tables for more information regarding the columns within the template.
4. Click **Upload File(s)**.
5. Select the Patron Type. This opens the Import File Upload side panel.
6. Click **Select files...** and choose a completed template.
7. Click **Save**.
8. Click **Next**.

## Fields in the Student Template

Name	Type	Required	Used in Data Match	Description

<b>First Name</b>	string (50)	Yes	Yes	The student's first name.
<b>Last Name</b>	string (50)	Yes	Yes	The student's last name.
<b>Student #</b>	string (15)	No	Yes	The district-wide unique identifier for the student.
<b>Birthdate</b>	date	No	Yes	The student's birth date formatted mm/dd/yyyy.
<b>Person ID</b>	int (9)	No	Yes	The district-wide unique identifier for each person. The Person ID should match what is in the Infinite Campus SIS.
<b>Balance</b>	string (15)	No	No	The beginning balance of the Food Service account.
<b>PIN</b>	string (15)	No	No	The district-wide unique identifier account PIN for the Food Service account. If left blank, the conversion will generate a random 4-digit PIN.

## Fields in the Staff Template

Name	Type	Required	Used in Data Match	Description
<b>First Name</b>	string (50)	Yes	Yes	The staff's first name.
<b>Last Name</b>	string (50)	Yes	Yes	The staff's last name.
<b>Staff #</b>	string (15)	No	Yes	The district-wide unique identifier for the staff.
<b>Birthdate</b>	date	No	Yes	The staff's birth date formatted mm/dd/yyyy.
<b>Person ID</b>	int (9)	No	Yes	The district-wide unique identifier for each person. The Person ID should match what is in the Infinite Campus SIS.
<b>Balance</b>	string (15)	No	No	The beginning balance of the Food Service account.

<b>PIN</b>	string (15)	No	No	The district-wide unique identifier account PIN for the Food Service account. If left blank, the conversion will generate a random 4-digit PIN.
------------	-------------	----	----	---

## Error Report

<b>100 Plainview Schools District</b> 123 Main Street, Metro City, MN 55555 Generated on 06/13/2024 03:30:52 PM Page 1 of 1	<b>Patron Import Log</b>												
<table border="1"> <thead> <tr> <th>Date/Time</th> <th>Type</th> <th>Message</th> </tr> </thead> <tbody> <tr> <td>05/01/2024 10:12:34</td> <td>ERROR</td> <td>Critical Errors file out of order.csv: Student upload file header column 3 should be name "Student #".</td> </tr> <tr> <td>05/01/2024 10:09:13</td> <td>ERROR</td> <td>Critical Errors file out of order.csv: Student upload file header column 3 should be name "Student #".</td> </tr> <tr> <td>04/26/2024 14:45:11</td> <td>ERROR</td> <td>Upload Critical Errors file out of order.csv: null (Line 1: 053000099,2,Donna,Ashland,9/7/2011,1.25,1111)</td> </tr> </tbody> </table>		Date/Time	Type	Message	05/01/2024 10:12:34	ERROR	Critical Errors file out of order.csv: Student upload file header column 3 should be name "Student #".	05/01/2024 10:09:13	ERROR	Critical Errors file out of order.csv: Student upload file header column 3 should be name "Student #".	04/26/2024 14:45:11	ERROR	Upload Critical Errors file out of order.csv: null (Line 1: 053000099,2,Donna,Ashland,9/7/2011,1.25,1111)

05/01/2024 10:12:34	ERROR	Critical Errors file out of order.csv: Student upload file header column 3 should be name "Student #".											
05/01/2024 10:09:13	ERROR	Critical Errors file out of order.csv: Student upload file header column 3 should be name "Student #".											
04/26/2024 14:45:11	ERROR	Upload Critical Errors file out of order.csv: null (Line 1: 053000099,2,Donna,Ashland,9/7/2011,1.25,1111)											

The Error Report button on Step 2 checks for all critical errors that would cause a file to be rejected. Discrepancies between the existing information and uploaded templates will appear within the Error Report, with the most recent upload errors displayed on top. Any line number listed in the error will match their row in the .csv file. If there is an error when uploading a file that does not add a line to the Error Report Log, the session has timed out, and the page must be refreshed/reloaded.

Errors	Descriptions
<b>File Level Errors</b>	<p>These errors will report only one error line per upload attempt.</p> <ul style="list-style-type: none"> <li>• Not the correct file type.</li> <li>• File exceeds 5M.</li> <li>• Column 3 is NOT "Student #" and patron type = Student.</li> <li>• Column 3 is NOT "Staff #" and patron type = Staff.</li> <li>• Extra column headers.</li> </ul> <div style="background-color: #e0f2f1; padding: 10px; margin-top: 10px;"> <p>To keep notes in the upload file and have more than seven columns in the file:</p> <ul style="list-style-type: none"> <li>• The notes must be to the right of the required columns.</li> <li>• The notes can have no headers.</li> </ul> </div>

**Person Level Errors**

These errors will report only if there are no file-level-errors and can report multiple error lines per upload attempt.

- Invalid number format.
  - Balance includes a dollar sign (\$10.25) or has too many decimal points (10..25).
  - Number has too many decimal places.
- Invalid date format.
  - Needs to be formatted mm/dd/yyyy.

There may be other errors that appear on this log that are not described here. For assistance with any unclear errors, users should contact Support.

# Data Matching

**Instructions**

Compare data as matched to person(s) in Infinite Campus Student Information System.

1. Click Begin Data Match Process button in the Patron Matching section.
2. Review all data; use the View button and/or print a report.
3. Pay special attention to any person with errors or a Confidence % of less than 100 before moving to step 3.
4. Corrections should be made on the data file and return to Step 2 to re-upload.

**Patron Upload Summary**

<b>Student</b>	Account Balance	Count
File Name: student clean.csv	<b>\$13,378.60</b>	<b>223</b>
File Upload Date/Time: 5/1/2024, 10:18:23 AM	Uploaded by: Administrator, Demo	
<b>Staff</b>	Account Balance	Count
File Name: Staff with balance.csv	<b>\$30,284.00</b>	<b>671</b>
File Upload Date/Time: 5/1/2024, 10:18:41 AM	Uploaded by: Administrator, Demo	

**Patron Matching**

Click the button below to Initiate the Data Matching Process. Note, upon screen load, the table below will display only patrons with errors or a less-than 100% confidence match. Toggle on "Show All Patron Records" to display all patrons.

Show All Patrons Records

RECORD #	NAME	STUDENT #	BIRTHDATE	PIN	BALANCE	% CONFIDENCE	DETAIL
1	Ashland, Donna	053000099	9/7/2011	1111	\$1.25	97	<input type="button" value="View"/>
2	Anderson, Jigme	053000070	9/18/2011	1122	\$1.75	88	<input type="button" value="View"/>
3	Cloutier, Trisha	53000008	4/17/2009	1133	\$2.25	100	<input type="button" value="View"/>

The Data Matching step is used to match students and staff within Infinite Campus SIS to the data within the file uploaded in step 2. Each field that was entered will be matched to existing information and a Confidence percentage will be generated in the table. When Begin Data Match has been used, the Student and Staff tabs will only display patrons with less than 100% match or critical errors that must be fixed. To see patrons with a 100% match as well, turn on the Show All Patrons Records Toggle.

First name and last name alone will not provide a match. To form a match, the first name and last name must be combined with another data point (birthdate, Student/Staff #, or Person ID).

The Record # does not correspond to the row number in the .csv file.

1. Click **Begin Data Match Process** in the Patron Matching section.
2. Review all data using the **View** button and/or **Print a Report**.

Person ID	69	69	✓

**Upload Data**

FIELD	UPLOAD FILE DATA
PIN	PIN will be generated upon import
Balance	\$2.25

**Warnings**

[Close](#)

*Patron Details after clicking the View button*

3. Review the match data for anyone less than 100% to ensure it is the correct match. If it is not the correct match, then correct the information on the data file and reupload.
4. After uploading and reviewing the data match, click **Next**.

## Printing Student or Staff Report

After using Begin Data Match Process, the data can be reviewed in a .csv file by clicking Print Student Report or Print Staff Report. The reports include the original upload data, matched data, duplicate warnings, confidence %, and error messages. The report button that appears depends on whether the Student or Staff report has been selected.

The reports can be used to make changes, but the headers for rows H-O must be deleted.

7	Poulan, Kammie	1008	1/7/1977		\$0.00	68	<input type="button" value="View"/>
8	Trevis, Vita	1009	1/8/1977	7593	\$6.50	68	<input type="button" value="View"/>

Critical errors, such as No Match and Duplicate, must be corrected or removed from the upload file before moving on to step 4.

Errors	Descriptions
No Match	Appears when a patron cannot match to a PersonID and receives a 0% confidence rating.
Duplicate	Appears when duplicate PersonID and/or PIN records between the Staff and Student patron types.

Information errors, which appear after clicking a patron's View button, show that a data point did not match and lowers the % Confidence. These errors will not stop you from proceeding to the next step.

[Close](#)

## % Confidence Field

The % Confidence field displays a number based on the data parameters that match an existing student and one being uploaded. Data matching will compare all available data points provided and come up with the Campus person record that most closely matches. The more data points provided that match, the higher the Confidence %.

If there is a 0% match and there is a person in Infinite Campus SIS that should match to the person on the file users should either:

1. Add more data to the file to increase the match percent and re-upload the file.
2. Remove the person from the data file and, after conversion is complete, add the PIN and balance manually.

If there is no person currently in Campus SIS to match to, add the person in Campus SIS and perform the data matching process again.

If there is a duplicate, remove the duplicate record from the file, correct the data, and re-upload the file.

Tip: Check both the Student and Staff tabs for errors and warnings.

## Test and Final Import
