ACME Status

Last Modified on 09/14/2026 9:43 am CDT

Path: System Settings > System Preferences > ACME Status

Infinite Campus Support and Development uses the Automated Certificate Management Environment (ACME) Status tool to manage, maintain, and troubleshoot your system's certificate used to connect to centralized services.

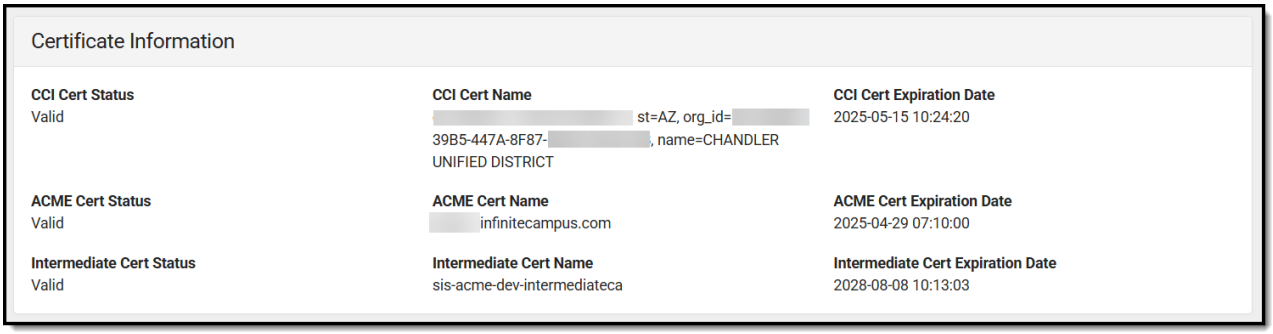

This tool is for Infinite Campus Support and does not require user interaction or setup. Users cannot break functionality if interacting with this tool.

Only users assigned a Product Security Role of **Student Information System (SIS)** can access this tool.

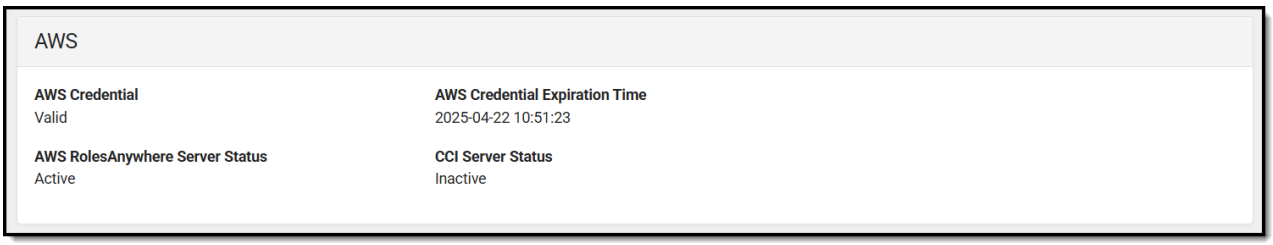

Certificate Information

The Certificate Information section indicates if you have valid certificates, their names, and when they will expire.

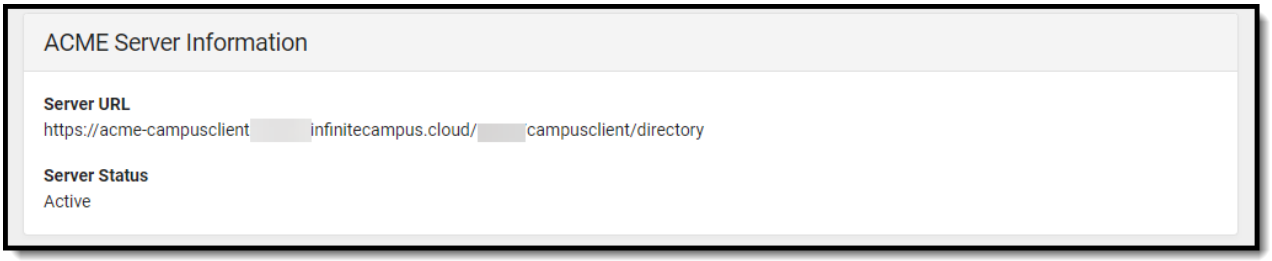

AWS

The AWS section indicates if the AWS credentials are valid, when they expire, and the status of AWS-related servers.

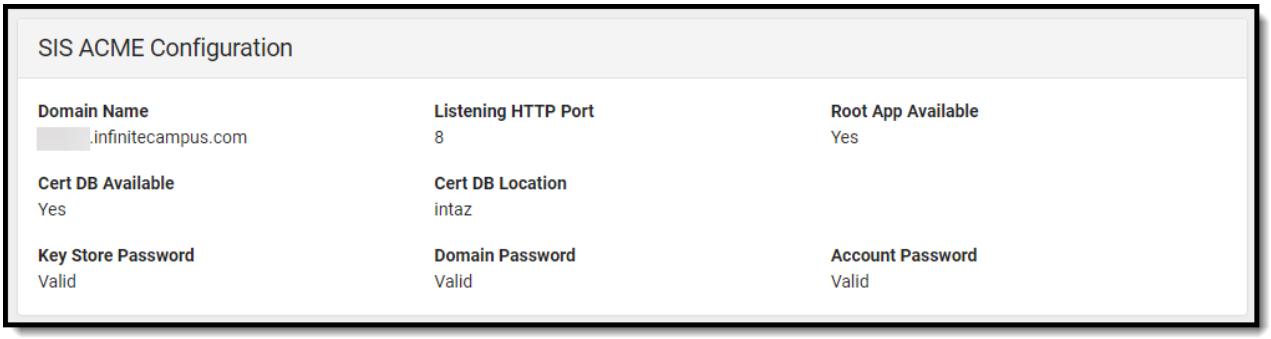

ACME Server Information

The ACME Server Information section indicates the server that issued the certificate and whether or not the certificate is active.

SIS ACME Configuration

The SIS ACME Configuration section houses information used to request and store certificates for the site.

Additional Information

The table below explains the purpose of each button in the tool:

Button	Description
Download Current Certificate 	Download your current public certificate (.pem file) to your local machine or network.
Request New Certificate 	Generate a new certificate with a new expiration date and private key. Once selected, click **Download Current Certificate** to access and inspect the newly generated certificate.
Reset Keystore 	Wipes the current keystore and inserts and validates a new keystore.
