Tool Search: ACME Status

The Automated Certificate Management Environment (ACME) Status tool is used by Infinite Campus Support and Development to manage, maintain, and troubleshoot your system's certificate used to connect to centralized services.

This tool is for Infinite Campus Support and does not require user interaction or setup. Users cannot break functionality if interacting with this tool.

ACME Status ☆
[System Settings](#) > [System Preferences](#) > ACME Status

### Certificate Information

Download Current Certificate

Request New Certificate

Reset Keystore

Only users assigned a [Product Security Role](#) of **Student Information System (SIS)** can access this tool.

# Certificate Information

The Certificate Information section indicates if you have a valid certificate, its name, and when it will expire. The Main certificate is signed, and the Intermediate certificate is used to sign.

Certificate Information		
<b>Main Cert Status</b> Valid	<b>Main Cert Name</b> [redacted].infinitecampus.com	<b>Main Cert Expiration Date</b> 2024-06-04 13:19:36
<b>Intermediate Cert Status</b> Valid	<b>Intermediate Cert Name</b> sis-acme-int-intermediateca	<b>Intermediate Cert Expiration Date</b> 2028-08-08 10:15:19

# ACME Server Information

The ACME Server Information section indicates the server that issued the certificate and whether or not the certificate is active.

ACME Server Information
<b>Server URL</b> https://acme-campusclient-[redacted].infinitecampus.cloud/[redacted]campusclient/directory
<b>Server Status</b> Active

# SIS ACME Configuration

The SIS ACME Configuration section houses information used to request and store certificates for the site.

SIS ACME Configuration		
<b>Domain Name</b> [redacted].infinitecampus.com	<b>Listening HTTP Port</b> 8	<b>Root App Available</b> Yes
<b>Cert DB Available</b> Yes	<b>Cert DB Location</b> intaz	
<b>Key Store Password</b> Valid	<b>Domain Password</b> Valid	<b>Account Password</b> Valid

# Additional Information

The table below explains the purpose for each button in the tool:

Button	Description
<p data-bbox="165 288 437 360"><b>Download Current Certificate</b></p> 	<p data-bbox="485 288 1321 360">Download your current public certificate (.pem file) to your local machine or network.</p>
<p data-bbox="165 472 363 544"><b>Request New Certificate</b></p> 	<p data-bbox="485 472 1406 584">Generate a new certificate with a new expiration date and private key. Once selected, you must click <b>Download Current Certificate</b> to access and inspect the newly generated certificate.</p>
<p data-bbox="165 663 392 692"><b>Reset Keystore</b></p> 	<p data-bbox="485 663 1386 692">Wipes the current keystore and inserts and validates a new keystore.</p>
