Cross-Site Invalid Grade Mapping Report

Last Modified on 06/29/2026 8:01 am CDT

Tool Search: Invalid Grade Mapping

The Cross-Site Invalid Grade Mapping report collects instances of incorrect or incomplete grading setups for cross-site courses. Setup for both Grading Tasks and Standards are reported. Issues may result from grading setup that has not been completed yet, as well as changes made to grading setup at Serving Schools that have caused inconsistencies.

Use the Invalid Grade Mapping report to find errors in Cross-Site grading setup.

See the Cross-Site Invalid Grade Mapping Report Tool Rights article for available tool rights.

Generate the report

1. Select a **Year** and a **School**. The report includes results for the selected School as the Home School in the Cross-Site setup.
2. Click **Generate CSV**.

The report generated includes information for the Home School, including the Course, Term, Task, Standard, Score Group, and Rubric. Basic information is also included from the Serving School, including Term, Grading Task, and Standard Name and Abbreviation. The last column, **Error Message**, provides more information about the issue with grading setup, such as invalid Score

Group mapping, changes to the Term Mask of a Grading Task or Grading Task or Standard removed at Serving School.

What's next

To address the issues included in the report, visit:

- Cross-Site Score Groups & Rubrics
- Course Grading Tasks and Course Standards tools for the Cross-Site courses. At the Home School, these tools display differently from a normal course.

See the Mapping Grades between Home and Serving Schools article for more information about the mapping grading setup.
