

# School and District Settings

Last Modified on 05/30/2024 4:05 pm CDT

School and District Setting tools allow users to set school and district information and also create GPA Calculations and Grade level definitions.

| Tool/Article                   | Description  |
|--------------------------------|--|
| <b>School Information</b>      | The School Information tool allows for the creation of schools and to view school history.   |
| <b>District Information</b>    | The District Information tool contains district contact and resource information.  |
| <b>County Setup</b>            | This tool is used to list the counties that the school district serves.  |
| <b>GPA Calculations</b>        | The information in this article describes each type of GPA calculation   |
| <b>Grade Level Definiitons</b> | The Grade Level Definitions editor displays the Code, Name, Description, <u>NCES</u> Grade, <u>PESC</u> Grade and Sequence mapped to each grade level. |
| <b>Grade Level Age</b>         | The Grade Level Age Setup tool ensures students are being enrolled into the appropriate grade level based on their date of birth and age               |
