Business Logic

- A student may only have one active Early Literacy and Early Numeracy record at a time.
- Early Literacy and Early Numeracy records can have overlapping dates, but dates for an Early Literacy record cannot overlap with dates for another Early Literacy record, and dates for an Early Numeracy record cannot overlap with dates for another Early Numeracy record.
- Overlapping records are determined by the School Year, not the Start and End Date.
- Early Literacy and Early Numeracy records are considered program records, and each instance of a student's participation in the program has a start and end date.

- Early Literacy and Early Numeracy Start and End Dates are NOT tied to the student Enrollment or School Calendar records.
- The [Federal/State Program Updater](#) can bulk update Early Literacy and Early Numeracy records.
- State and District-defined elements are allowed.
- Users cannot save a record with misaligned Eligibility Domain and/or Methodology Tool values with the selected Program Type and Grade Level.

Detail Screen

The Detail Screen allows users with the appropriate tool rights to view and modify the student's Early Literacy and Early Numeracy records. For additional information, see the [Tool Rights](#) section.

Program Information

To ensure accuracy and consistency, enter data working from top to bottom and left to right. The form includes dynamic logic to guide your selections and ensure that only valid options are available based on previous entries.

NOTE: Program Type and State Grade fields must be populated with data prior to adding Eligibility Domain and Methodology Tool information.
