Attendance

Interdistrict Cross-Site Attendance (SIS-178560) **[Enhancement]**

Cross-Site Attendance functionality has been modified to include sharing of attendance data from the Home School to the Serving School and vice versa for Interdistrict Cross-Site Enrollment.

When an attendance record is created and saved for a student by the Attendance Office (non-teacher attendance) at the Home School, that record triggers an event to share that attendance data with the Serving School. At the Serving School, the student's Attendance is updated to display that attendance event.

The same process occurs when the Serving School marks the student absent. The Home School then sees the same attendance event for that student.

Path: Student Information > General > Attendance; Attendance > Attendance Wizard, Classroom Monitor

Behavior

An issue where school names including commas were displayed in two columns on the .csv format of the Behavior Event Report has been fixed.

Path: Behavior Office > Behavior Office Reports > Event Report

- Score 65%-70%:Percent >= 65 and < 70
- Score 70%-80%:Percent >= 70 and < 80
- Score 80%-90%:Percent >= 80 and < 90
- Score over 90%:Percent >= 90

Existing templates maintain their filter settings and will update to the new logic.

Counseling

Counseling Meetings and Contact Log Fixes (SIS-174925)

Two fixes have been made concerning how Counseling Meetings and Contact Log records function. First, when a Counseling Meeting is created with more than one student and the Log Contact checkbox is marked for both students, the Contacted field on the Contact Log record only displays the name of the student who owns the Contact Log record. This ensures the privacy of the other student. The other student's name also does not display when printing the Contact Log record.

Secondly, when users delete a Counseling Meeting that has an associated Contact Log record, the Contact Log record is also deleted. See the Schedule Counseling Meetings article for additional information.

Students who moved from one Enrollment structure to another were missing courses from their first Enrollments on the extract. Now, all courses report on the extract if the End Dated Enrollment was active during a portion of the school year.

Students were not reporting correctly when they had two Enrollments in the same calendar, one of which was excluded and the other no longer active.
