For more information about Tool Rights and how they function, see the [Tool Rights](#) article.

Report Logic

One record for all students who are enrolled in the selected calendar at any point during the school year. Data reports from the most recent Primary enrollment. When the student has more than one active primary enrollment, the enrollment with the latest start date is used. When the start dates are the same, the enrollment with the highest enrollment ID is used.

Students are not included when:

- The enrollment record is marked as No Show or as State Exclude.
- The grade level of enrollment is marked as State Exclude.
- The calendar of enrollment is marked as State Exclude.

Parent/Guardian and Address information reports as follows:

- The Primary and current household is determined first.
- The current address reports from the primary and current household.
- The individual marked as Guardian in that primary and current household who has the lowest personID reports as the guardian on the report.

Current is defined as the record (household, address, etc.) that is active as of today OR the last date of the submission window, whichever occurs first.

The Primary Parent/Guardian First Name, Primary Parent/Guardian Last Name, and Primary Parent/Guardian Telephone Number fields report even when a student's household does NOT have an address.

Non-Binary Gender Reporting

Schools can assign students a gender of M: Male, F: Female or N: Non-binary. This is done on the [Identities](#) tool and/or the [Demographics](#) tool.

Data Pipeline Extracts and other required extracts use the Legal Gender field included in the Protected Identity Information to report student identity information.

To properly record a gender of N: Non-Binary, on the Identities tool:

1. Assign the **Gender of N: Non-Binary** in the standard identify fields.
2. Assign the **Protected Identity Information Legal Gender** field to M: Male, F: Female or N: Non-Binary.
3. Save the record when finished.

Gender and Legal Gender Assignment

Report Editor

Data Element	Description
Setup	
Search Calendars	Search field to narrow the list of calendars to select. Use the Expand All/Collapse All. Place a checkbox next to the desired school and calendars.
Show Active Year Only	When set to ON, only those calendars for the current school year are available for selection. When set to OFF, all calendars from all school years are available for selection.
Report Options	
Start Date	Entered date reflects the start of the reporting range in which data reports. This field defaults to July 01 of the school start year.
End Date	Entered date reflects the end of the reporting range in which data reports. This field defaults to June 30 of the school end year.
Report Legal Name	When marked, the student's name and gender report from the Protected Identity Information section on the student's Identities record.
Exclude Cross-Site Data	When marked, the report does not include staff information for Cross-Site Enrollment courses.
Ad hoc Filter	Select which students to include in the extract by choosing a filter that was created in the Filter Designer. Only those students included in the filter are included in the report.
Output Options	

Data Element	Description
Report Processing	Select Generate Now to generate the report immediately. Select Submit to Batch to choose when the report generates. Submit to Batch is useful when generating the report for several calendars or for larger amounts of data being reported. See the Batch Queue article for more information.
Format Type	Determines in which format the report generates - CSV, HTML, or XML.

Generate the Report

1. Search for and select the desired **Calendars**.
2. Enter the correct **Start Date** and **End Date**.
3. Mark the **Report Legal Name** checkbox, if desired.
4. Mark the **Exclude Cross-Site Data** checkbox, if desired.
5. Choose an **Ad hoc Filter** to return just the course and staff information included in the selected filter.
6. Select the desired **Report Processing** option of **Generate Now** or **Submit to Batch Queue**.
7. Select the desired **Format Type**.
8. Click **Generate**. The report displays in the selected format.
