Object Triggering Logic | Object Data Elements | Array

This event entity represents the recording of a student's survey results based on their participation in the 21cclc program. It depends on a student having a 21st CCLC program record and the survey fields being populated.

Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	When a 21st CCLC program record exists within the scope year and the Evaluation Date is populated. When there is more than one record returned, reports from the record with the most recent evaluation date.
	When there are multiple enrollments in the same school that qualify and have the same enrollment start date, reports based on the enrollment service type in this order: 1. P: Primary 2. S: Partial 3. N: Special Education
	When there are multiple enrollments in the same school that qualify with the same Service Type and Enrollment Start Date, the record with the newest start date reports.
Delete/Post	When Evaluation Date is updated.
Post	When an attendanceUnit record that is tied to a CCLC-reportable course is updated to delete = '0'.
Put	If one of the survey questions are changed
Delete	Delete record if evaluation date is removed
Delete	When the 21cclc program record is deleted
Delete	When the 21cclc program dates are updated to no longer fall within the scope year
