

White Board (Schedule Wizard) [.2431 and previous]

Last Modified on 07/31/2024 9:10 am CDT

The Schedule Wizard was removed from the product as of the Campus.2435 Release (August 2024).

Use the following tools for scheduling and planning purposes:

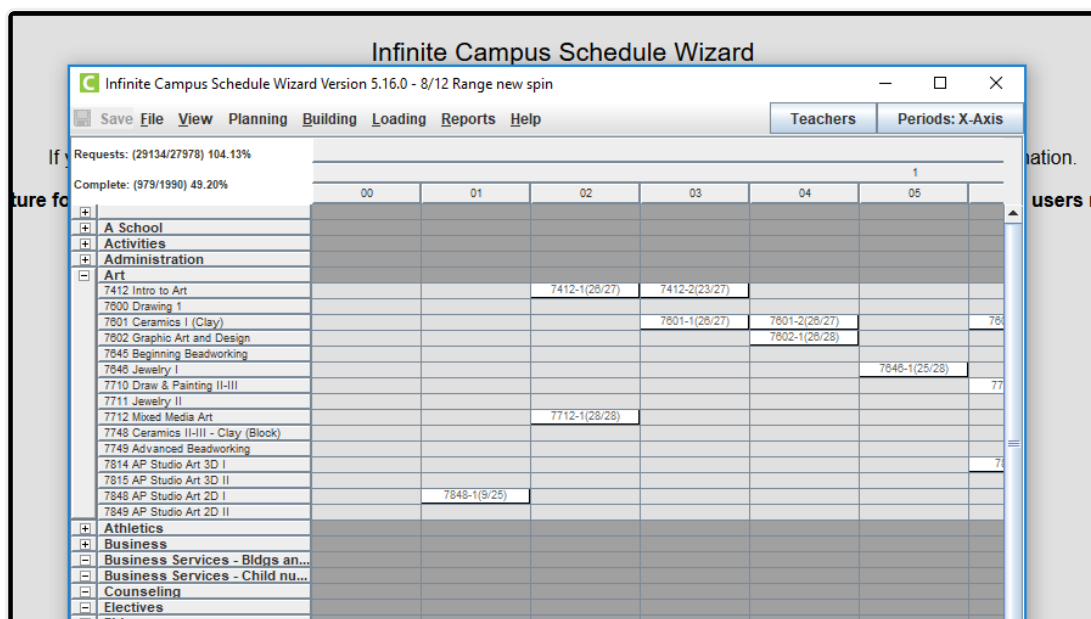

- [Scheduling Board](#)
- [Course Planner](#)
- [Staff Planner](#)
- [Requests and Rosters](#)

[Course and Section Display](#) | [Navigate the White Board](#) | [Next Steps](#)

Tool Search: Schedule Wizard

Schedulers often use a spreadsheet or a magnetic white board to visualize and build their master schedule. The Schedule Wizard features a master schedule build assist tool that represents school schedules in the same way, called a White Board. This displays after a user selects and opens a [Trial](#).

This tool allows users to drag and drop course sections on the computer screen in the same way magnetic squares are used on a white board.

Schedule Wizard White Board

The Schedule Wizard White Board allows users to easily see teacher conflicts and room conflicts as

the schedule is built. There are many hover boxes and right-click menus that aid in the building of a school's master schedule.

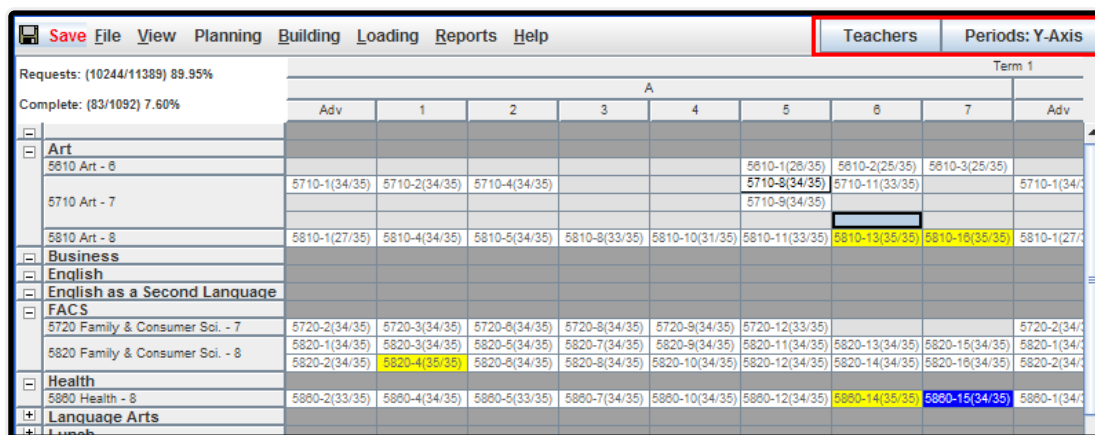

- Course names display in numeric or department order on the left side. To work on a specific set of courses, like English, the other department names may be collapsed for easier viewing.
- Terms and days displays across the top.
- Periods may be across the top or down the side.
- Sections appears on the grid as they are scheduled.
- Sections may be displayed by number (course/section and total students), teacher, room, or scheduling group assigned to the section.

The White Board provides access to other Schedule Wizard tools:

- [Course Planner](#) and [Staff Planner](#)
- [Schedule Building Tools](#)
- [Schedule Loading Tools](#)
- [Reports](#)

Course and Section Display

The default display for the White Board is courses in descending alphabetical order on the left-hand side (y-axis) and calendar terms across the top (x-axis). If departments have been assigned to courses, these are alphabetical as well (i.e., Art, Business, etc.). This view can be changed using the Toggle Options that appear on the left-hand side in the Action Bar.

The screenshot shows the White Board interface with a menu bar (Save, File, View, Planning, Building, Loading, Reports, Help) and two buttons: Teachers and Periods: Y-Axis. The main grid displays courses on the y-axis and terms on the x-axis. The y-axis lists departments like Art, Business, English, FACS, Health, and Language Arts. The x-axis lists terms like Term 1, Term 2, etc. The grid cells contain section numbers and student counts, such as 5710-1(34/35) or 5810-1(27/35).

Auto-built Sections and Manual Section Display

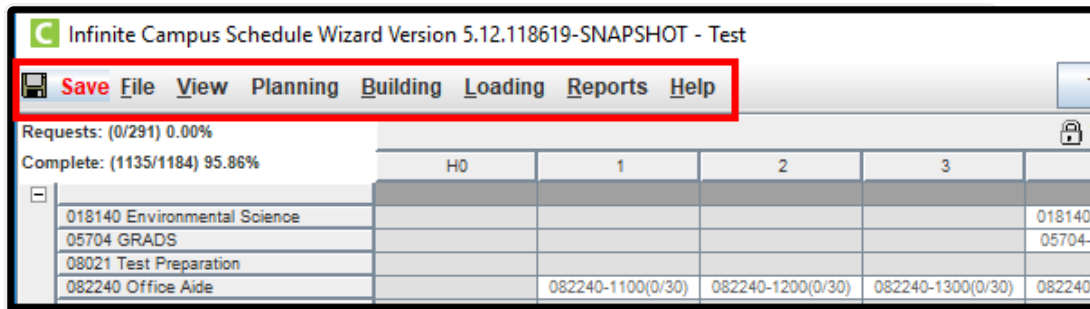

Navigate the White Board

[Action Bar](#) | [Information Hover Boxes and Right-Click Options](#) | [Percentages](#) | [Drag and Drop Functionality to Build, Move and Delete Course Sections](#)

The White Board contains all options for building, managing and loading a master schedule. The following information can be used as a reference when navigating the White Board.

Action Bar

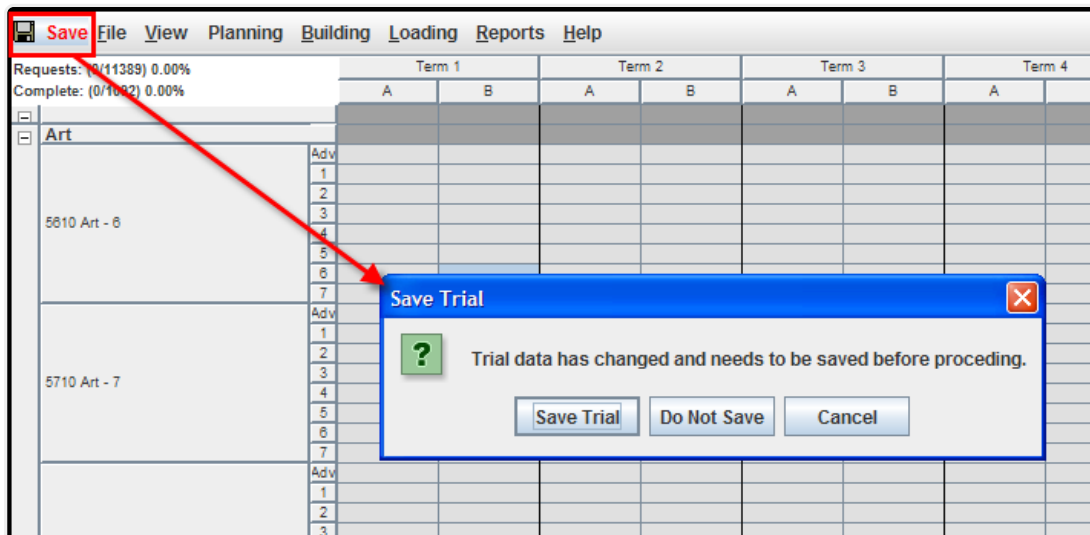

As in the Campus application, the Action Bar lists the items a user can access and the actions that can be performed.

White Board Action Bar

Save

The Save icon changes to a red color any time a change is made in the whiteboard. Data does not automatically save and the user should ensure that every time a change is made, the save icon is selected. A validation displays if the user exits without saving. From this message, the user can select to save the trial changes, not save the trial changes or cancel.

Save Action Validation Message

NOTE: If saving changes takes minutes to complete AND your state uses Ed-Fi for collecting student and school data, verify [Ed-Fi Configurations](#) for past school years have been deleted.

The current school year and the last school year can remain. For example, a district that has configurations for the 2017-18, 2018-19, 2019-20 and 2020-21 school years can safely delete the 2017-18 and 2018-19 configurations.

File

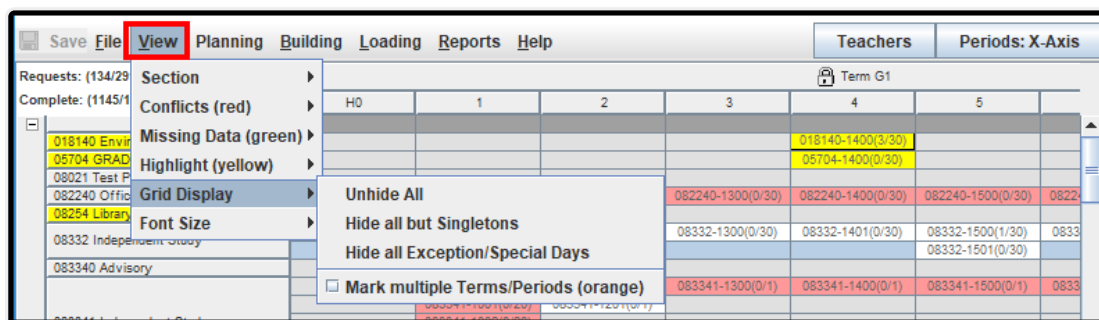

The File option allows the user to select a different trial for viewing in the White Board and to Exit

the Schedule Wizard. Shortcut keys are also noted for easier navigation.

- **Select Trial** opens the [Trial](#) menu.
- **Exit** closes the Schedule Wizard.

View

The View option lets a user select settings that alter the display of the trial load to modify how sections display and displays conflicts for certain issues in red, missing data in green, etc. It is not necessary for all of these options to be selected. Choose which viewing option is best.

White Board View Menu

The following table provides the available options for each selection.

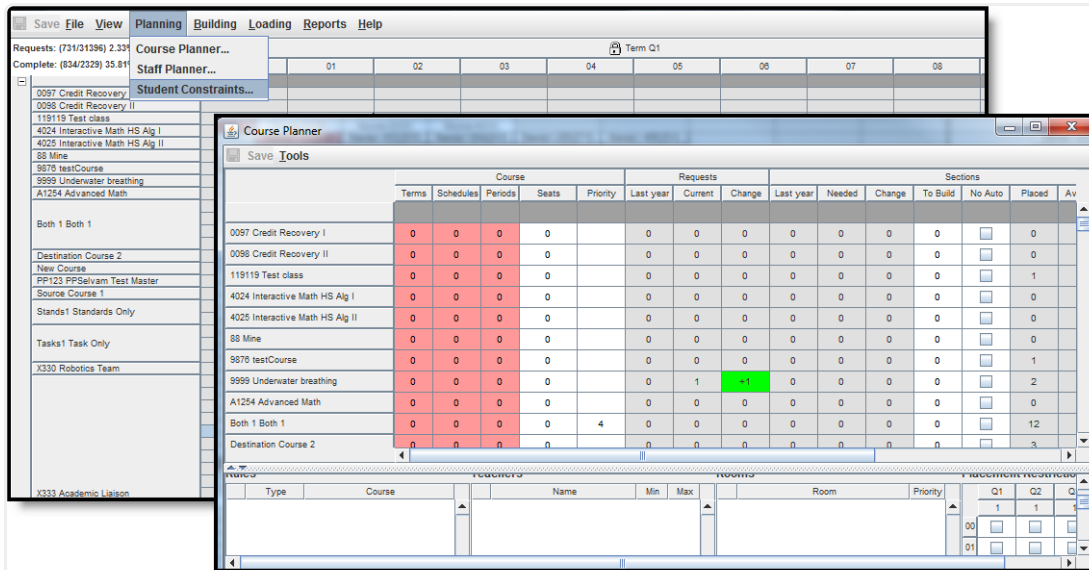

Option	Selection	Description
Section <i>Select only one</i>	Number	Displays the section number in the white board, along with the course number when the schedule is loaded. In the image above, this is the chosen display for sections.
	Teacher	Displays the name of the teacher assigned to the section.
	Room	Displays the room number of where the section is scheduled to meet.
	Group	Displays the name of the group assigned to the section, based on the assigned Team chosen on the Section tab.
Conflicts (red)	Teacher	Displays sections where the teacher has a conflict with the placement of the section in red.
	Room	Displays sections where the assigned room has a conflict with the placement of the section in red.
	Roster	Displays sections where students are scheduled into more than course section in the same period.
	Request (singleton)	Highlights sections of singletons that occur in the same term/period as another singleton.

Option	Selection	Description
	Student to Student	<p>Highlights those sections where student conflicts exist.</p> <p>Student conflicts can be added in the Student Constraints tool or in the Planning area of the Schedule Wizard.</p>
Missing data (green)	Teacher	Displays sections where a teacher is not assigned in green.
	Room	Displays sections where a room is not assigned in green.
	Group	Displays sections where a team is not assigned in green.
	Courses with Sections left to Build	Displays courses that still need additional sections built in green.
Highlight (yellow)	Courses without enough seats	Displays sections that need a higher seat count in yellow.
	Full Sections	<p>Displays full sections that are greater than or equal to the Max Students count. This is the maximum number of students that can be scheduled into the sections of the course. This field is on the Section editor and the Course editor; it only needs to be populated in one location (either on the Course editor or the Section editor).</p> <p>When using the Schedule Wizard to build course sections, this field MUST be populated with a value that is greater than zero.</p> <p>If the Max Students count is 15, the section is highlighted when there are 15 students in the section and when there are 16 (or more) students in the section. It is NOT highlighted if there are 14 students in the section.</p>
	Empty Sections	Displays empty sections (no seat count) in yellow.
	Singleton Courses	<p>Displays courses that meet one time during the year in yellow.</p> <p><i>A singleton course</i> is defined a course that meets one time (only one course section exists) and the Sections to Build field on the Course editor or in the Course Planner has a value of 1. When multiple sections are dragged onto the White Board for this course, it is no longer considered a singleton, but the course still displays in yellow because of the Sections to Build value.</p>
	Sections with a locked roster	Displays sections where the roster has been locked (no further changes being made) in yellow.

Option	Selection	Description
Grid Display	Unhide All	When selected, all items that may have been set to hide now display.
	Hide all but Singletons	Removes all course sections from the Whiteboard unless those courses occur one time during the day.
	Hide all Exception/Special Days	When selected, all course sections scheduled for an exception or special day are removed from the White Board. These sections are often associated with special period schedules used for shortened days or schedules for Responsive Scheduling setups.
	Mark multiple Terms/Periods (orange)	Highlights all course sections that occur more than one time.
Font Size	Small (100%)	Change the font size of the White Board to better see the information on the grid.
	Medium (125%)	
	Large (200%)	
	Very Large (300%)	

Planning

The Planning option provides access to the [Course Planner](#) and [Staff Planner](#) tools, and to the [Student Constraints](#) tool. Once the calendar for the next school year is built, set course rules, teacher constraints, room constraints for all courses being taught in the next school year and set staff restrictions and FTE information before course requests are made. These options open a new instance of the Wizard applet.

White Board Planning Menu

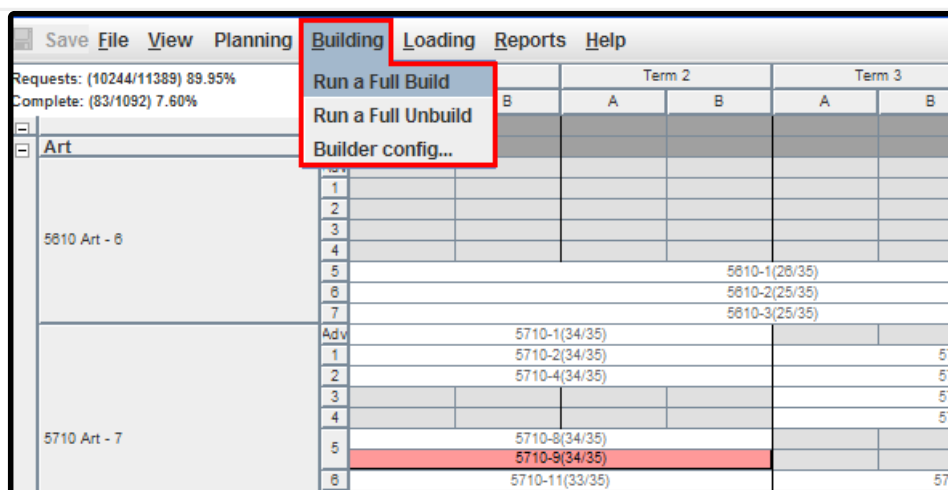

Building

The Building menu uses the information entered in the Course and Staff Planners and adds it to the course and section display on the white board.

- A **Full Build** populates all entered course information.
- A **Full Unbuild** removes all entered course information.
- The **Builder Configuration** tool sets the requirements for how the wizard builds the courses.

Courses can be built individually as well, and then locked so no further changes can be made, including the removal of that information when a full unbuild is done.

See the [Building Tools](#) article for more information.

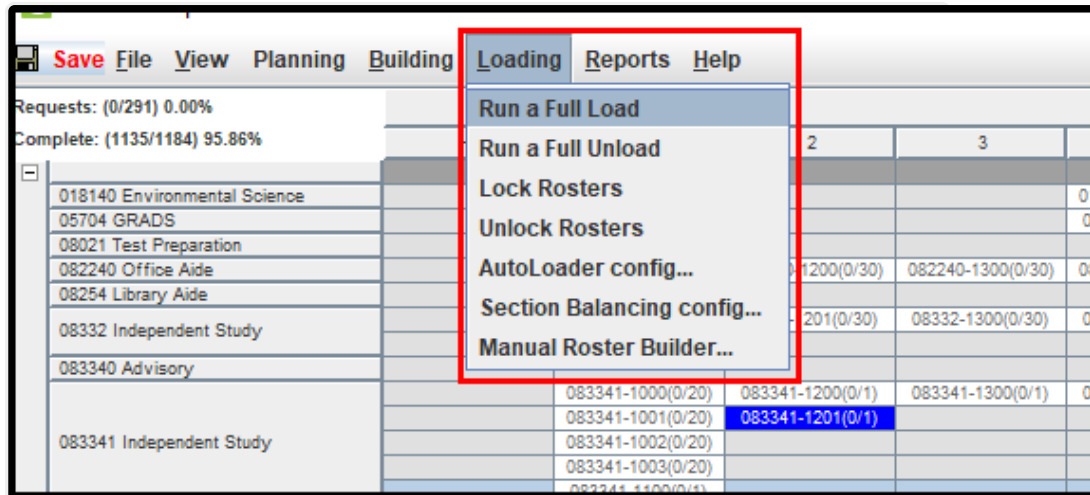

White Board Building Menu

Loading

The Loading menu provides options for loading student requests into the built courses and sections. Users can load all requests, unload all requests and manually build a section roster. In addition, users can also configure the AutoLoader and the Section Balancing tools.

See the [Loading Tools](#) article for more information.

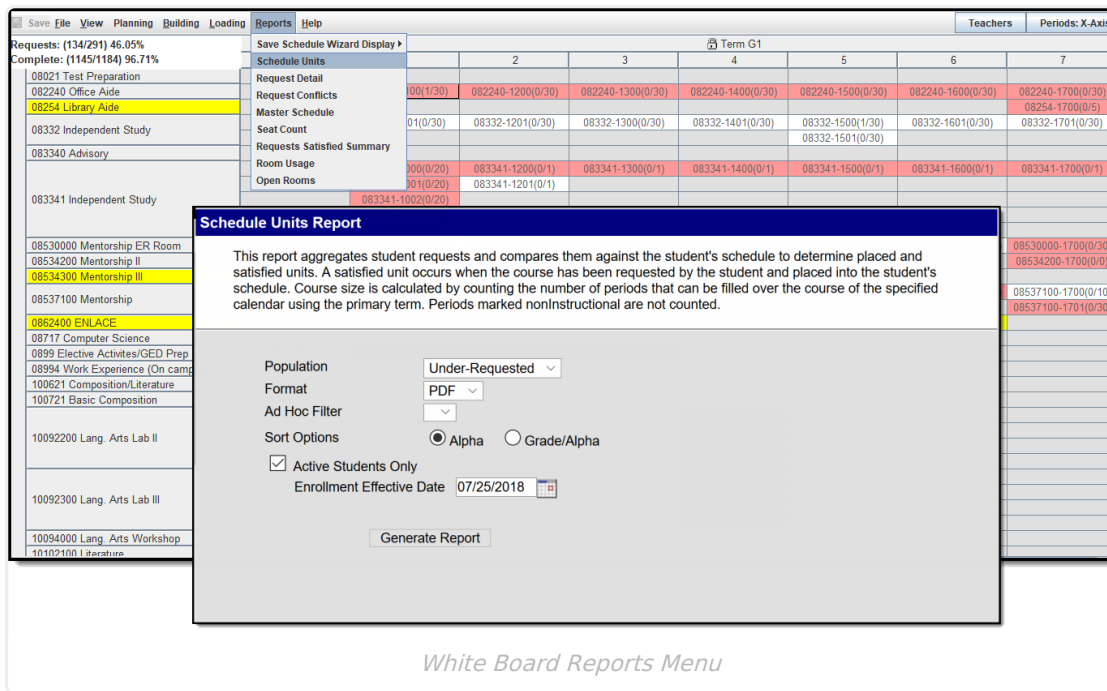

White Board Loading Menu

Reports

The scheduling reports available in the Schedule Wizard replicate some of the reports available in the Campus Scheduling module. Available reports are:

- [Schedule Units](#)
- [Request Detail](#)
- [Request Conflicts](#)
- [Master Schedule](#)
- [Seat Count](#)
- [Requests Satisfied Summary](#)
- [Room Usage](#)
- [Open Rooms](#)

White Board Reports Menu

Reports generated in the Schedule Wizard use the selected trial, not the active trial from the Campus product.

See the [Schedule Wizard Reports](#) article for more information.

Information Hover Boxes and Right-Click Options

There are several places in the Wizard where hovering over a section (placing the cursor over a section, course, etc. and leaving it there to display an information box), a course or other area displays a window where key information may be found to aid the scheduler in placing sections, detecting issues and determining how successful the current trial meets the needs of students.

The following table lists what information is included in the pop-up options.

Area	Pop-Up Display
------	----------------

Area	Pop-Up Display
<u>Section</u>	<p>The section pop-up indicates the section number, the number of students on the roster (both a total and by gender), the teacher assigned to that section, the room the section meets in, as well as the team/scheduling group to which that section belongs. The total number of behavior events (lifetime total) displays, as well as the number of Special Education students in that section.</p> <p>When a section is combined with another or more than one course section, the total number of combined seats for each of the combined sections display. Users can see the total seat count per individual section, and the total combined seats. This functionality requires all of the combined courses in question to either not have a room assigned, or all be assigned to the same room.</p>
<u>Course</u>	<p>Hovering over a course indicates the number of requests satisfied (students who have been scheduled in a section of a course) out of the total number of requests, the number of seats filled, the number of sections placed and needed (determined by dividing the total number of requests by the student max defined on the course), and if entered the number of sections to build. Any rules defined for the course also show in this pop-up.</p>
<u>Department</u>	<p>Department shows the number of requests (fulfilled and grand total) for courses in that department, as well as the number of seats scheduled and taken for courses in that department.</p>
<u>Period</u>	<p>Useful for determining if a sufficient number of sections are available during that period, as well as the number of seats available and filled in that period of the day.</p>
<u>Term</u>	<p>Useful for determining if a sufficient number of sections are available during that term, as well as the number of seats available and filled.</p>

White Board Hover Display

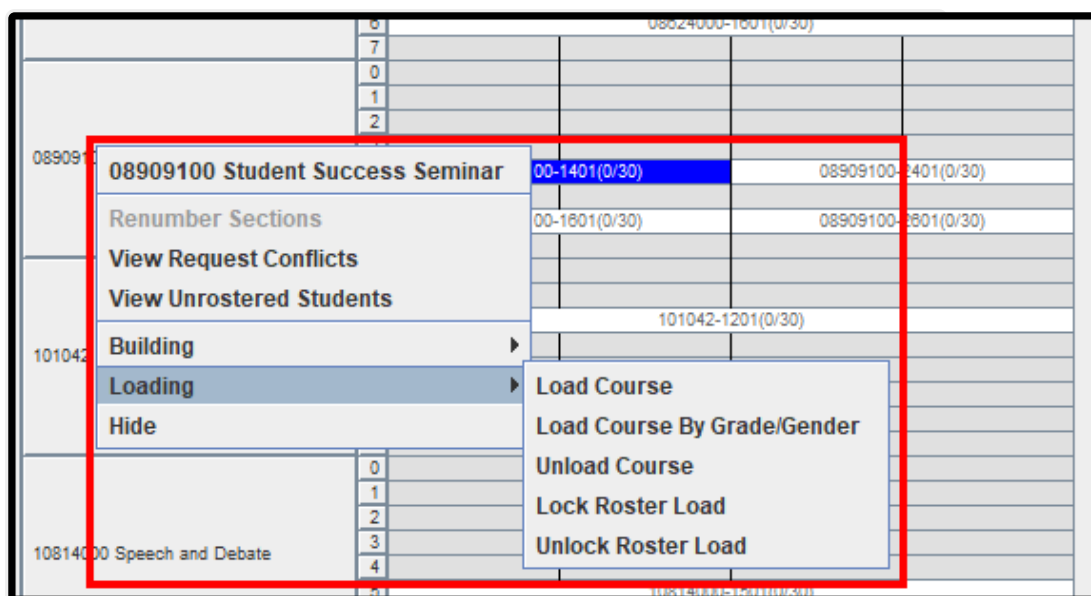

The following tables list the actions that can be done when right-clicking (CTRL-CLICK when using a Mac) on an area.

Course

Right-Click Options	Description
Renumber Sections	<p>This option reviews all section numbers assigned to the placed course sections and rennumbers them to be in numeric order. If a section 2 appears before a section 1 of the course, section 1 appears first after the renumbering.</p> <p>Renumbering order is done by Term sequence, Period Schedule sequence, Period sequence then Teacher Name.</p>
View Request Conflicts	Displays a list of other course sections where student requests conflict with the section.
View Unrostered Students	Displays a list of students who were not scheduled into course sections for that course.

Right-Click Options	Description
Building	<p>The following options are available:</p> <ul style="list-style-type: none"> Build Course Unbuild Course Lock Build Unlock Build
Loading	<p>The following options are available:</p> <p>Load Course - add course requests for the course</p> <p>Load Course by Grade/Gender - choose which grade levels and which genders to load into the course</p> <p>Unload * Course - remove course requests for the course</p> <p>Lock Roster Load - choose which grade levels to lock into the the course, meaning those students are never removed from loading and building of the course</p> <p>Unlock Roster Load - choose which grade levels to unlock from the course, meaning the previously locked students can be removed from the course</p>
Hide	<p>This option removes the selected course from the outline in the Schedule Wizard. Data remains and is viewable once again after selecting the View menu, Grid Display and Unhide All.</p>

When loading and unloading a single course, roster entries are removed or added for that course and its associated sections only.

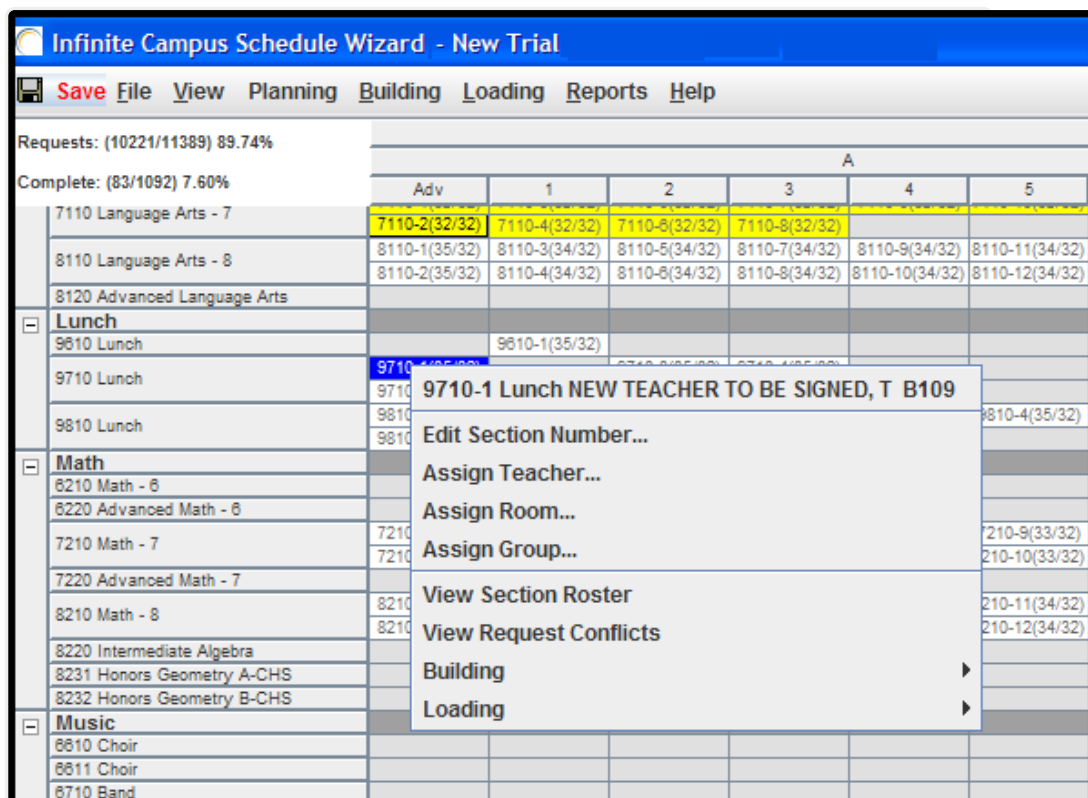

Course Right-Click Options

Section

Right-click Options	Description
Edit Section Number	Allows the user to rename the section number. Valid entry for this field is a numeric value between 0 and 32767.
Assign Teacher	Displays a list of teachers who can be (in white) and cannot be (in red) assigned to the section.
Assign Room	Displays a list of room numbers which can be (in white) and cannot be (in red) assigned to the section.
Assign Group	Displays a list of schedule groups that can be (in white) and cannot be (in red) assigned to the section. Groups must first be created in the Scheduling Group tool for the selected calendar/trial.
View Section Roster	Displays a list of students placed into that section. <ul style="list-style-type: none"> Students highlighted in yellow have a student conflict with another student in the same section. Students who have a folder icon next to their name are Special Education students, determined by the following: <ul style="list-style-type: none"> The student has IEP exists in the current calendar, and the student has an enrollment record in the future calendar but no IEP in the future calendar. The student has an active IEP as of today. <p>Students can be locked from this view to ensure the student remains in this section, even if the build is unloaded or the course is unloaded.</p>

Right-click Options	Description

Loading	The following options are available: <ul style="list-style-type: none"> • Load Course • Load Section by Grade/Gender - choose which grade levels and which genders to load into the section • Unload Section • Lock All Rosters • Unlock All Rosters

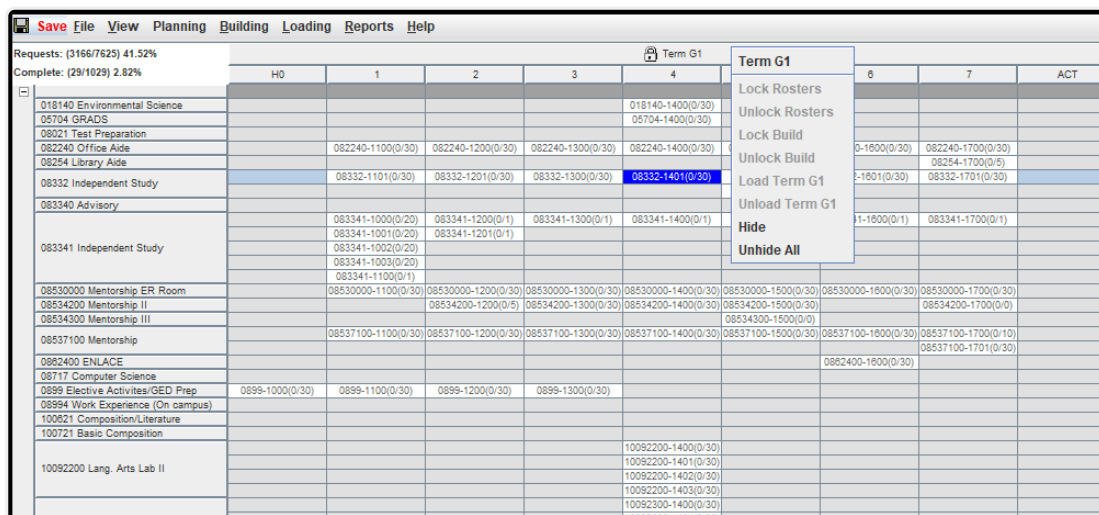

The screenshot shows the 'Infinite Campus Schedule Wizard - New Trial' interface. The top menu bar includes 'Save', 'File', 'View', 'Planning', 'Building', 'Loading', 'Reports', and 'Help'. The main window displays a schedule grid with columns for 'Adv', '1', '2', '3', '4', and '5'. A right-click context menu is open over the '9710-1 Lunch' section, showing options: 'Edit Section Number...', 'Assign Teacher...', 'Assign Room...', 'Assign Group...', 'View Section Roster', 'View Request Conflicts', 'Building', and 'Loading'. The 'Building' and 'Loading' options have right-pointing arrows next to them.

Section Right-Click Options

Term

Option	Description
Lock Rosters	Locks ALL rosters for the term.
Unlock Rosters	Unlocks ALL rosters for the term.
Lock Build	Lock the course and section placement for the term.
Unlock Build	Unlocks the course and section placement for the term.
Load Term	Loads student requests for the term.
Unload Term	Unloads student requests for the term.
Hide	Hides the information of the term from the white board.
Unhide All	Unhides any hidden terms.

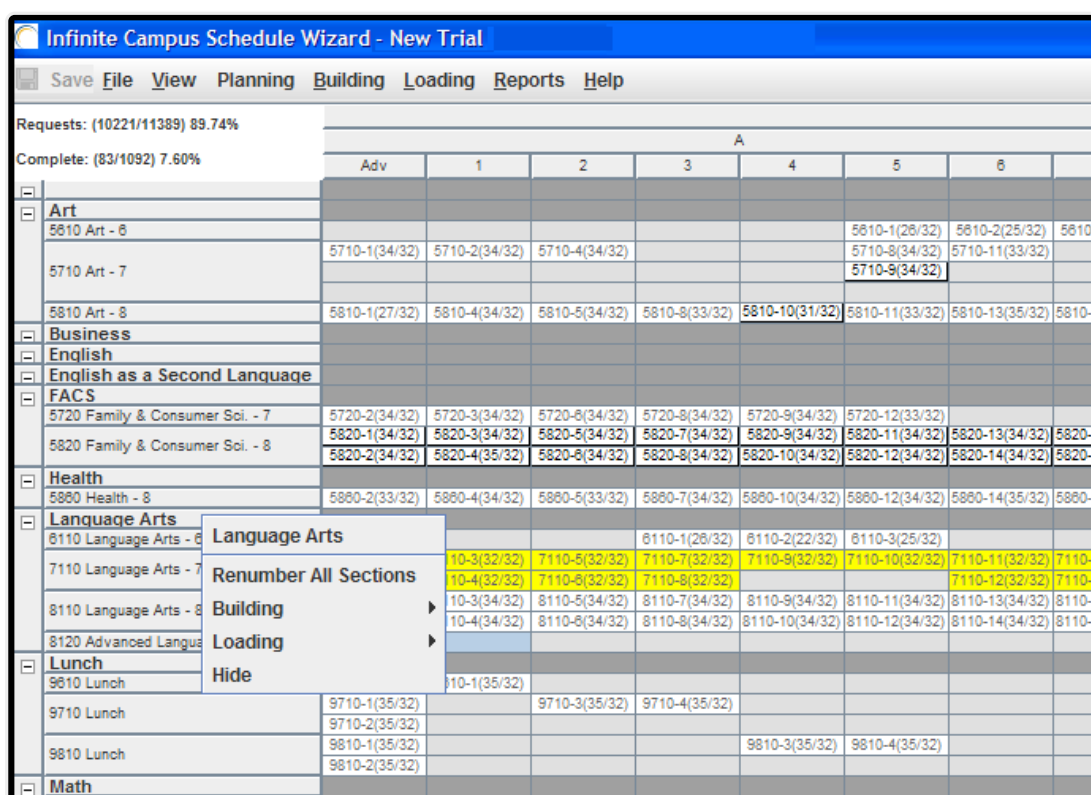

Term Right-Click Options

Department

Option	Description
Renumber All Sections	Renumbers the sections to be in numeric order. Sections are created in numeric order, but if they are moved to appear differently (as in Section 2 occurs before Section 1), this action renumbers them to be in numeric order.
Building	The following options are available: <ul style="list-style-type: none"> • Build Department • Unbuild Department • Lock Build • Unlock Build

Option	Description
Load	<p>The following options are available:</p> <ul style="list-style-type: none"> • Load Department • Unload Department • Lock Rosters • Unlock Rosters
Hide	<p>This option removes the department and all its related courses from the outline of the Schedule Wizard. To display the department again, select the View option from the top of the wizard browser, and select Grid Display and Unhide All.</p>

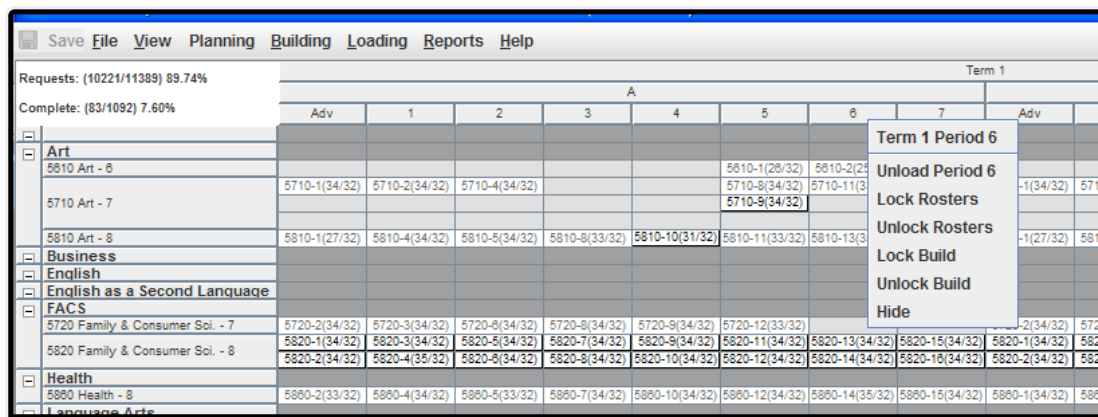

Department Right-Click Options

Period

Option	Description
Unload Period	Unloads all data in the period.
Lock Rosters	Locks all rosters for the course sections in the department.

Option	Description
Unlock Rosters	Unlocks all rosters for the course sections in the department.
Lock Build	Lock the course and section placement for the period.
Unlock Build	Unlocks the course and section placement for the period.
Hide	This option removes the department and all its related courses from the outline of the Schedule Wizard. To display the department again, select the View option from the top of the wizard browser, and select Grid Display and Unhide All .

The screenshot shows the Schedule Wizard interface with a menu bar (Save, File, View, Planning, Building, Loading, Reports, Help) and a status bar. The main area displays a grid of course sections for Term 1. A right-click context menu is open over the grid, showing options: Term 1 Period 6, Unload Period 6, Lock Rosters, Unlock Rosters, Lock Build, Unlock Build, and Hide. The grid columns are labeled Adv, 1, 2, 3, 4, 5, 6, 7, Adv. The rows are grouped by department: Art, Business, English as a Second Language, FACS, Health, and Language Arts. Each row contains course numbers and section numbers with their respective periods.

Period Right-Click Options

Percentages

There are two percentages listed in the top left corner of the Wizard's whiteboard. The first one, **Requests**, indicates the number of seats filled / number of requests. The second one, **Complete**, represents the percentage of students who have all of their requests met. However, if the student does not have any course requests, this is included in the **Complete** percentage.

Alternate requests are not included in these values.

If a student is hand-scheduled into a course (therefore, there are no requests for those courses), or if the student has an alternate course request, the first number of the Requests percentage increases.

Drag and Drop Functionality to Build, Move and Delete Course Sections

To move entire courses, use the [Auto Load Configuration](#) features.

Build New Course Sections

Build new sections for a course by right-clicking on the course name and select **Build Course**. The Schedule Wizard creates the number of sections defined in the Sections to Build field on the Course editor based on the constraints entered for the course.

The screenshot displays a grid interface for course management. The grid has columns for course names (e.g., 1700 English 9 I, 1701 English 9 II, 1702 English 10 I) and rows for periods (04 through 02). A context menu is open over the '1701 English 9 II' row, showing options: 'Renumber Sections', 'View Request Conflicts', 'View Unrostered Students', 'Building' (with a right arrow), 'Loading' (with a right arrow), 'Hide', 'Build Course', 'Unbuild Course', 'Lock Build', and 'Unlock Build'. Below the grid, there is a button labeled 'Build New Course'.

Build new sections for a course by clicking and dragging the course name into the desired term and period grid. When the [Building Cofiguration](#) option of **Drag and Drop: Enable preferred section placement** is marked, a Conflict Matrix or "heat map" is used to locate the best placements for that section. The three best placements for that new section are displayed, and includes the teacher and room assignments. The first placement is the same location the Auto-Build logic would choose if a single section were placed.

Submit feedback for this Conflict Matrix using the **Feedback** button on the Schedule Wizard Launch page. This takes you to the [Basic Conflict Matrix in Schedule Wizard](#) forum topic where you can add your suggestions and comments for this feature.

Conflict Matrix for Building Course Sections

Move Course Sections

Select the section and drag the section to the desired location. The section appears in the new period column (depending on preferences established).

Moved Section

Moving course sections also uses a Conflict Matrix to determine the best placement for a section. The three best placements for that new section are displayed, and includes the teacher and room assignments. The first placement is the same location the Auto-Build logic would choose if a single section were placed.
