

# Schedule Wizard Videos (Campus.2431 and Prior)

Last Modified on 10/21/2024 8:21 am CDT

## Scheduling Trials

Trials are versions of the school's schedule (courses, sections, rosters, teachers, etc.). A trial is created when the school's calendar is rolled and/or the Schedule Wizard is used to build the schedule.

## Staff Planner Grid

This video explains how to use the Staff Planner grid to edit a teacher's course load information as well as what the different fields of the grid represent.

▶ [Click here to expand...](#)

## Staff Planner Tools

When creating a new schedule, the Staff Planner tool allows users to set up teacher to course, teacher to room, and teacher placement constraints. This video demonstrates how to do so.

▶ [Click here to expand...](#)

## Student Constraints

The Student Constraints tool is used to create restrictions between students. This video demonstrates how to prevent students from being scheduled in the same section with both strict and non-strict constraints.
