Report Processing	<p>This is a complex report and requires several minutes to create the data snapshot. Because of this, it always needs to be generated using the Submit to Batch option.</p> <p>The Batch Queue processing can be used for both the report generation and the report review, allowing results to be reviewed at a later time.</p> <p>The Snapshot being compared is taken at the same time as the PMR summary and only students who report on the PMR summary are used in the counts. Submitting to Batch is useful when generating the report for several calendars or for more significant amounts of reported data. See the Batch Queue article for more information.</p>
Format Type	Determines in which format the report generates - CSV or HTML.
