

# Civil Rights Data Collection (CRDC) Setup - 2023-2024

Last Modified on 12/14/2025 8:45 pm CST

[CRDC Setup Tool Rights](#) | [CRDC Setup](#)

Tool Search: Civil Rights Data Collection (CRDC) > Setup

**Use the gray icons below to navigate to the associated articles.**

The Civil Rights Data Collection (CRDC) Setup tool allows districts to complete category mappings for each school for grade levels, students in subgroups (IDEA, 504, EL etc.), and courses. Users are able to capture all SIS related data elements required to report for the CRDC 2023-2024 submission. Users are also able to generate reports to match the CRDC data collection templates.

# CRDC Setup

This section provides information on creating category mappings. Mappings can be created for the entire district using the District Preferences option or set for individual schools using the School Preferences option.

The search criteria entered and saved at the district level is not pushed down to individual schools. Only the course and student results based on the search criteria are pushed to individual schools.

## Set District Preferences

The District Preferences section allows users to set the report options and category mappings for the district. These can then be pushed down to schools in the district. Note that pushing preferences from the district level overwrites any mappings an individual school has made.

The screenshot shows a user interface for 'CRDC District Preferences'. At the top, there is a header 'District Preferences'. Below it are two buttons: 'Report Options' and 'Category Mappings', each with a right-pointing arrow. At the bottom of the interface, the text 'CRDC District Preferences' is displayed.

### District Preferences Editor

Field	Definition
<b>Report Options</b>	Allows the user to set the Fall Snapshot Count Date, Fall Snapshot IDEA Count Date Override and select enrollment service types that will be excluded from search results for the district.
<b>Category Mapping</b>	Allows the user to view, create, and edit category mappings.

## Set District CRDC Report Options

This section describes how to set CRDC reporting options for the district.

## CRDC Report Options

Fall Snapshot Count Date \* 10/02/2023 Fall Snapshot IDEA Count Date Override (optional) 10/02/2023 

Exclude Enrollment Service Types

P: Primary

S: Partial

N: Special Ed Services

District CRDC Report Options

## Report Options Editor

Field	Definition
<b>Fall Snapshot Count Date</b>	The Fall Snapshot Count Date is based on October 1 or the closest school day to October 1. This field is required.
<b>Fall Snapshot IDEA Count Date Override</b>	The count of students with disabilities (IDEA) should be based on either the IDEA child count date or October 1 (or the closest school day to October 1). This field is optional. If left blank, the Fall Snapshot Count Date will be used.
<b>Exclude Enrollment Service Types</b>	Allows users to select Enrollment Service Types that will be excluded from search results and report results.
<b>Select All</b>	Allows users to select all Enrollment Services Types for the Exclude Enrollment Service Types field.
<b>Save</b>	Saves the values entered by the user on the CRDC Report Options page.
<b>Cancel</b>	Returns the user to the main CRDC Setup page without saving values entered by the user on the CRDC Report Options page.

## To set District Report options:

1. Select **Report Options**.
2. Enter the **Fall Snapshot Count Date** (typically the closest school day to 10/1/23).
3. If desired, enter the **Fall Snapshot IDEA Count Date Override**.
4. If desired, enter an **Exclude Enrollment Service Type(s)**.
5. Click **Save**.

## District Category Mappings

This section describes how to view, create, and/or edit District Category Mappings.

If schools have been mapped in previous years, these options will be copied when mappings are created in future years. It may not be necessary to Push in this instance. (Date related mappings are not copied).

### Select a Category to Map & Push

This tool allows the user to select a single search method for including students in CRDC reporting and to push category mappings from the district level down to each school within the district. After a category is pushed, the category mappings for each school need to be reviewed to determine if the proper setup is complete before generating the CRDC survey results. Grade Levels must be pushed prior to any other category in order to determine a school's eligibility to receive a district level mapping.

If schools have been mapped in previous years, these options will be copied when mappings are created in future years. It may not be necessary to Push in this instance. (Date related mappings are not copied.)

*District Mappings - Fall Snapshot IDEA Students*

## Category Mappings Editor

Field	Definition
<b>School Characteristics</b>	Allows the user to select the Grade Levels being mapped for the selected school. A Grade Level Mapping must be created in order to create other mappings.
<b>Student Enrollment</b>	Allows the user to select student enrollments being mapped for IDEA Students, 504 Students, EL Students, and EL Students Receiving Services.
<b>Courses</b>	Allows the user to create mappings for selected courses for the selected school. Options include Algebra I - Grades 7 & 8, Algebra I - High School, Algebra II, Geometry - Grade 8, Geometry - High School, Calculus, Advanced Mathematics, Biology, Chemistry, Physics, Computer Science and Data Science.
<b>Close</b>	Returns the user to the main CRDC Setup page.

**To select category mappings:**

1. Select **Category Mappings**.
2. Select the Category Mapping to view, create, or edit.
3. Proceed to the Select a Category Mappings section for more information on creating/editing Category Mappings.
4. After the Category Mappings have been created, push the mappings to all schools within the district. When a user presses 'Push' or 'Save & Push', the mappings are pushed to all schools in the district. Pushing Category Mappings overwrites any existing school mappings for all schools within the district. After a category is pushed, users need to review the category mappings for each school to determine if the proper setup is complete.

Category mappings that have been created at the district level can be edited by individual schools if desired. Note that mappings pushed from the district level overwrite mappings created at the school level.

## Set School Preferences

This section describes how to set mapping preferences for a selected school and year.

**School Preferences**

<b>Version</b>	<b>School Year</b>	<b>School Search</b>
<input type="text" value="2023-2024"/>	<input style="width: 100px;" type="text" value="23-24"/> ▼	<input type="text" value="Find by School Name..."/>
<b>School Name</b>		
<input style="width: 100%; border: 1px solid #ccc; padding: 2px;" type="text" value="Capital City Extension School"/> >		

*Set CRDC School Preferences*

### Select Preferences Editor

Field	Definition
<b>Version</b>	Displays the current version for which data will be collected.
<b>School Year</b>	Allows the user to select the school year in which data will be mapped.
<b>School Search</b>	Allows the user to search for a school.
<b>School Name</b>	Allows the user to select the school in which data will be mapped for the selected School Year. Schools in which the user has tool rights to and have at least one active calendar display.

## To select a version, year and school:

1. The Version is **2023-2024**, and the school year is **23-24**.
2. Use the **School Search** field to find a school or select the **School Name** in which data is being mapped for the selected year.
3. Proceed to the Select a Category to Map section.

## Select a Category to Map

This section describes how to create category mappings. A Grade Level mapping must be created in order to create other mappings. Grade levels determine which category mappings a school needs. Schools only see category mappings for categories that apply to the grade levels at the selected school. If a Grade Level mapping has not been completed, the user will automatically be directed to the Grade Levels mapping screen after selecting a school. See [Appendix A](#) to view which grade levels are aligned to each category.

Users may need to use all 'Inactive' locked Plan types in order to get previous school years' locked IEP students to pull into CRDC Searches.

If schools have been mapped in previous years, these options will be copied when mappings are created in future years. It may not be necessary to Push in this instance. (Date related mappings are not copied).

## Select a Category to Map

This tool allows the user to create and/or edit category mappings for the selected school. The category mappings are used to calculate the CRDC survey results. Grade Levels determine which categories need to be mapped for the selected school and must be defined before any other category can be selected.

Select a Category to Map

## Select Item to Map Editor

Field	Definition
<p><b>Note:</b> The following section describes category mappings for individual schools. The process of creating District category mappings is the same, except users are only able to create mappings using a Campus Filter or Ad Hoc Filter. Student details will also not display when creating District mappings. When a user presses 'Push' or 'Save &amp; Push', the mappings are pushed to all schools in the district. A warning message displays after pressing "Push" indicating that running this tool will remove and replace any existing school level mapping for the selected school year and version. Selecting OK will push the district category mappings. After a category is pushed, users need to review the category mappings for each school to determine if the proper setup is complete. A message is sent to the user's Process Inbox when a district mapping is pushed to schools. A message is also sent to the user's Process Inbox if the push fails.</p>	

Field	Definition
<b><u>School Characteristics</u></b>	Allows the user to select the Grade Levels being mapped for the selected school. Grade levels determine which categories need to be mapped for the selected school. A Grade Level Mapping must be created in order to create other mappings. If grade levels have not been mapped, "UNMAPPED" displays. If grade levels have previously been mapped, then the date and time the mapping was created or last modified displays. See Appendix A to view the grade levels to which each category is aligned.
<b><u>Student Enrollment</u></b>	Allows the user to select student enrollments being mapped. If a Student Enrollment mapping has not been created, "UNMAPPED" displays. If Student Enrollment mappings have previously been mapped, then the date and time the mapping was created or last modified displays.
Fall Snapshot IDEA Students	Allows users to create a Fall Snapshot IDEA Students mapping.
Fall Snapshot 504 Students	Allows users to create a Fall Snapshot 504 Students mapping.
Fall Snapshot English Learners (EL)	Allows users to create a Fall Snapshot EL Students mapping.
Fall Snapshot Students Enrolled in EL Programs	Allows users to create a Fall Snapshot EL Students enrolled in EL programs mapping.
Regular School Year IDEA Students	Allows users to create a Regular School Year IDEA Students mapping.

Field	Definition	
	Regular School Year 504 Students	Allows users to create a Regular School Year 504 Students mapping.
	Regular School Year English Learners (EL)	Allows users to create a Regular School Year English Learners (EL) Students mapping.
<b>Courses</b>	Allows the user to create mappings for selected courses for the selected school. The courses listed will vary depending on the school selected. If a Course mapping has not been created, "UNMAPPED" displays. If Course mappings have previously been mapped, then the date and time the mapping was created or last modified displays.	
	Algebra I - Grades 7 & 8	Allows users to create a mapping for Algebra I courses for grades 7 and 8.
	Algebra I - High School	Allows users to create a mapping for High School Algebra I courses.
	Algebra II	Allows users to create a mapping for Algebra II courses.
	Geometry - Grade 8	Allows users to create a mapping for Geometry courses for grade 8.
	Geometry - High School	Allows users to create a mapping for High School Geometry courses.
	Advanced Mathematics	Allows users to create a mapping for Advanced Mathematics courses.
	Calculus	Allows users to create a mapping for Calculus courses.
	Biology	Allows users to create a mapping for Biology courses.
	Chemistry	Allows users to create a mapping for Chemistry courses.
	Physics	Allows users to create a mapping for Physics courses.

Field	Definition	
	Computer Science	Allows users to create a mapping for Computer Science courses.
	Data Science	Allows users to create a mapping for Data Science courses
<b>Close</b>	Returns the user to the main CRDC Setup page.

CRDC Student Enrollment Mappings

### To create Fall Snapshot IDEA Students Mappings:

1. Select **Fall Snapshot IDEA Students** or **Regular School Year IDEA Students**.
2. Select students that will be included in the mapping using a **Campus Filter, Quick Search, and/or Ad Hoc Filter**.

When searching for and selecting students to be included in a mapping, the different search options can be used in conjunction with each other. When students are added to the Selected Students list using one of the search options, other students can be added to the same list using a different search option. Students removed from the Selected Students list will display in the Search Results when another Search option is chosen.

### To create an IDEA Students mapping using a Campus Filter:

This section describes how to create a mapping for IDEA Students using a Campus Filter. The fields displayed will vary depending on which fields are active for a school. Note that if a mapping was previously saved, the previously selected options will display.

The process for creating Fall Snapshot and Regular School Year mappings for IDEA students is

the same with the exception of how students are selected using the Search Criteria in the Campus Filter option.

*CRDC Idea Fall Snapshot Filter*

### IDEA Students Campus Filter Editor

Field	Definition
<b>Fall Snapshot - Students with the following locked Plan Type(s) (Active or Inactive)</b>	Allows users to select IDEA students based on a locked Plan Type. A student with any Enrollment and Plan in the selected Plan Types will report as long as the enrollment and plan overlap the Fall Snapshot Count Date/Fall Snapshot IDEA Count Date Override. A student's Enrollment Start Date & Plan Start Date must be on or before the Fall Snapshot Count Date/Fall Snapshot IDEA Count Date Override. The Fall Snapshot IDEA Count Date Override Date is used if populated. A student's Enrollment End Date & Plan End Date must be blank or on or after the Fall Snapshot Count Date/Fall Snapshot IDEA Count Date Override. The Fall Snapshot IDEA Count Date Override Date is used if populated. The plan must be locked for the student to display. If the plan is unlocked after the student is saved to the mapping, the student will still be included in the mapping.
<b>Regular School Year - Students with the following locked Plan Type(s) (Active or Inactive)</b>	Allows users to select IDEA students based on a locked Plan Type. A student with any Enrollment and Plan in the selected Plan Types report as long as the enrollment & plan occur anytime in the regular school year. The student's Enrollment Start Date & Plan Start Date must be on or before 6/30/xx of the reporting year. The student's Enrollment End Date & Plan End Date must be NULL or on or after 7/1/xx of the reporting year. The Plan must be locked for the student to display. If the plan is unlocked after the student is saved to a mapping, the student will remain.
<b>Students with a Disability without a plan</b>	Allows users to select IDEA students with a Primary Disability and without a Plan. Any student that has an overlapping enrollment with a Primary Disability in the dropdown reports. A student does not need a plan to report. A student's Enrollment Start Date must be on or before the Fall Snapshot Count Date/Fall Snapshot IDEA Count Date Override. The Fall Snapshot IDEA Count Date Override Date is used if populated. The student's Enrollment End Date must be blank or on or after the Fall Snapshot Count Date/Fall Snapshot IDEA Count Date Override. The Fall Snapshot IDEA Count Date Override Date is used if populated.
<b>Search</b>	Searches the database for students that meet the selected criteria.
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.

Field	Definition
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

**To search for and select students using the Campus Filter option:**

1. Select the **Students with the following locked Plan Type(s)** or **Students with a Primary Disability without a plan** option.
2. Depending on the option selected, select the **locked Plan Type** or **Primary Disability**.
3. Click **Search**. Students meeting the search criteria display in the Search Results window.
4. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.
5. Click **Save & Next, Save, Previous or Next**.

**To create an IDEA Students mapping using Quick Search:**

This section describes how to create a mapping for IDEA Students using Quick Search.

The process for creating Fall Snapshot and Regular School Year mappings for IDEA students using the Quick Search method is the same.

Fall Snapshot - IDEA Students Quick Search

### IDEA Students Quick Search Editor

Field	Definition
<b>Active Today</b>	Allows the user to indicate if students that have an active enrollment as of today are included in the search. Options are Yes or No.
<b>Grade</b>	Users can select a grade level to narrow search results. Only grade levels for the selected school are listed.
<b>First Name</b>	Users can enter a first name to narrow search results.
<b>Last Name</b>	Users can enter a last name to narrow search results.

Field	Definition
<b>Search</b>	Searches the database for students that meet the selected criteria.
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

#### To search for and select students using the Quick Search option:

1. Select Yes or No from the **Active Today** droplist.
2. If desired, select a **Grade Level**, **First Name**, and/or **Last Name** to narrow the search results.
3. Click **Search**. Students meeting the search criteria display in the Search Results window.
4. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.
5. Click **Save & Next**, **Save**, **Previous or Next**.

#### To create an IDEA Students mapping using an Ad Hoc Filter:

This section describes how to create a mapping for Fall Snapshot IDEA Students using an Ad Hoc Filter.

The process for creating Fall Snapshot and Regular School Year mappings for IDEA students using an Ad Hoc Filter is the same .

Fall Snapshot - IDEA Students Ad Hoc Filter

### IDEA Students Ad Hoc Filter Editor

Field	Definition
<b>Select Ad Hoc Filter</b>	Allows the user to select a previously created Ad Hoc Filter to select students for the mapping. Users only have access to Ad Hoc Filters they own or that belong to a filter user group in which they are a member. Users can reference the <a href="#">CRDC - Ad Hoc Filters for Populating Category Mappings page</a> for examples of Ad Hoc Filters that can be used.
<b>Search</b>	Searches the database for students in the selected Ad Hoc Filter.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.

Field	Definition
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

#### To search for and select students using the Ad Hoc Filter option:

1. Select the appropriate Ad Hoc Filter.
2. Click **Search**. Students meeting the search criteria display in the Search Results window.
3. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.
4. Click **Save & Next, Save, Previous or Next**.

#### To create a 504 Students Mapping:

1. Select **Fall Snapshot 504 Students** or **Regular School Year 504 Students**.
2. Select students that will be included in the mapping using a **Campus Filter, Quick Search, and/or Ad Hoc Filter**.

When searching for and selecting students to be included in a mapping, the different search options can be used in conjunction with each other. When students are added to the Selected Students list using one of the search options, other students can be added to the same list using a different search option. Students removed from the Selected

Students list will display in the Search Results when another Search option is chosen.

### To create a 504 Students mapping using a Campus Filter:

This section describes how to create a mapping for 504 Students using a Campus Filter. The fields displayed will vary depending on which fields are active for a state, as seen in the screenshot below that shows two different search criteria examples. If the 504 tab is active, none of the other Campus Filter options will appear on the Campus Filter tab. Note that if a mapping was previously saved, the previously selected options will display.

The process for creating Fall Snapshot and Regular School Year mappings for 504 students is the same with the exception of how students are selected using the Search Criteria in the Campus Filter option.

504 Students - Campus Filter

### 504 Students Campus Filter Editor

Field	Definition
<b>Fall Snapshot 504 Students - Students with a Section 504 Program Participation Record</b>	Allows users to select students who have a 504 Program Participation record. Students with a 504 program participation record with a Start Date on or before the Fall Snapshot Count Date and an End Date that is blank, on or after the Fall Snapshot count date will report.
<b>Fall Snapshot - Students with a 504 Indicator on Enrollment</b>	Allows users to select students who have a section 504 indicator on their enrollment and the enrollment overlaps the Fall Snapshot Count Date. Students that have an enrollment in the selected school and the section 504 field is checked report. A student's Enrollment Start Date must be on or before the Fall Snapshot Count Date and the student's Enrollment End Date must be blank or on or after the Fall Snapshot Count Date in order to report.
<b>Regular School Year - Students with a 504 Indicator on Enrollment</b>	Allows users to select students who have a section 504 indicator on their enrollment and the enrollment occurs anytime in the regular school year. Students that have an enrollment in the selected school and the section 504 field is checked report.
<b>Fall Snapshot - Students with a 504 Record in Flags</b>	Allows users to select 504 students with a selected 504 Flag. Students whose Flag Start Date and Enrollment Start Date are on or before the Fall Snapshot Count Date report. A student's Flag and Enrollment End Date must be blank or on or after the Fall Snapshot Count Date in order to report.
<b>Regular School Year - Students with a 504 Record in Flags</b>	Allows users to select 504 students with a selected 504 Flag and have an enrollment that occurs anytime in the regular school year. The student's Flag Start Date must be on or before 6/30/xx of the reporting school year. The student's Flag End Date must be NULL or after 7/01/xx of the reporting school year.
<b>Fall Snapshot -Students with a 504 Eligible Disability</b>	Allows users to select 504 students who have a Primary Disability on an IEP or Enrollment with a 504 Status. Students whose Enrollment Start Date and/or Plan Start Date is on or before the Fall Snapshot Count Date report. Student's whose Enrollment End Date and/or Plan End Date is blank or on or after the the Fall Snapshot Count Date report.
<b>Regular School Year - Students with a 504 Eligible Disability</b>	Allows users to select 504 students who have a Primary Disability on an IEP or Enrollment with a 504 Status. The student's Plan Start Date must be on or before 6/30/xx of the reporting school year. The student's Plan End Date must be NULL or after 7/01/xx of the reporting school year.
<b>Search</b>	Searches the database for students that meet the selected criteria.

Field	Definition
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

#### To search for and select students using the Campus Filter option:

1. Select the **Students with a 504 Indicator on their Enrollment, Students with a 504 Record in Flags, or Students with a 504 Eligible Disability** option.
2. If the Students with a 504 Record in Flags or Students with a 504 Eligible Disability option is selected, indicate the **Flag or Disability** that will be used in the search.
3. Click **Search**. Students meeting the search criteria display in the Search Results window.
4. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.
5. Click **Save & Next, Save, Previous or Next**.

#### To create a 504 Students mapping using Quick Search:

This section describes how to create a mapping for 504 Students using Quick Search.

The process for creating Fall Snapshot and Regular School Year mappings for 504 students using the Quick Search method is the same.

### 504 Students Quick Search Editor

Field	Definition
<b>Active Today</b>	Allows the user to indicate if students that have an active enrollment as of today are included in the search. Options are Yes or No.

Field	Definition
<b>Grade</b>	Users can select a grade level to narrow search results. Only grade levels for the selected school are listed.
<b>First Name</b>	Users can enter a first name to narrow search results.
<b>Last Name</b>	Users can enter a last name to narrow search results.
<b>Search</b>	Searches the database for students that meet the selected criteria.
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

**To search for and select students using the Quick Search option:**

1. Select Yes or No from the **Active Today** dropdown.
2. If desired, select a **Grade Level**, **First Name**, and/or **Last Name** to narrow the search results.
3. Click **Search**. Students meeting the search criteria display in the Search Results window.
4. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.

5. Click **Save & Next, Save, Previous or Next.**

### To create a 504 Students mapping using an Ad Hoc Filter:

This section describes how to create a mapping for Fall Snapshot 504 Students using an Ad Hoc Filter.

The process for creating Fall Snapshot and Regular School Year mappings for 504 students using an Ad Hoc Filter is the same.

Fall Snapshot 504 Students - Ad Hoc Filter

### 504 Students Ad Hoc Filter Editor

Field	Definition
<b>Select Ad Hoc Filter</b>	Allows the user to select a previously created Ad Hoc Filter to select students for the mapping. Users only have access to Ad Hoc Filters they own or that belong to a filter user group in which they are a member. Users can reference the <a href="#">CRDC - Ad Hoc Filters for Populating Category Mappings page</a> for examples of Ad Hoc Filters that can be used.
<b>Search</b>	Searches the database for students in the selected Ad Hoc Filter.
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

#### To search for and select students using the Ad Hoc Filter option:

1. Select the appropriate Ad Hoc Filter.
2. Click **Search**. Students meeting the search criteria display in the Search Results window.
3. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.
4. Click **Save & Next, Save, Previous or Next**.

## To map English Learners (EL):

1. Select **Fall Snapshot English Learners (EL)** or **Regular School Year English Learners (EL)**.
2. Select students that will be included in the mapping using a **Campus Filter, Quick Search, and/or Ad Hoc Filter**.

When searching for and selecting students to be included in a mapping, the different search options can be used in conjunction with each other. When students are added to the Selected Students list using one of the search options, other students can be added to the same list using a different search option. Students removed from the Selected Students list will display in the Search Results when another Search option is chosen.

## To create an English Learners (EL) mapping using a Campus Filter:

This section describes how to create a mapping for English Learners (EL) students using a Campus Filter. The fields displayed will vary depending on which fields are active for a school. Note that if a mapping was previously saved, the previously selected options will display.

The process for creating Fall Snapshot and Regular School Year mappings for English Learners (EL) students is the same with the exception of how students are selected using the Search Criteria in the Campus Filter option. See the [English Learners \(EL\) Students Campus Filter Editor table](#) for further details.

## English Learners (EL) Campus Filter Editor

Field	Definition
<b>Fall Snapshot - Students with an eligible EL record</b>	Allows users to select EL students who have an EL Program Status = EL or Exited EL and that have an enrollment that overlaps the Fall Snapshot Count Date. The student's Enrollment Start Date must be on or before the Fall Snapshot Count Date. The student's Enrollment End Date must be blank or on or after the Fall Snapshot Count Date. If the student's EL Program Status = Exited EL, the Program Exit Date must be in the reporting year. The School Year Start and End Dates are used for the reporting year. If the School Year dates are blank, use 7/1/XX - 6/30/XX as the default. Students will not be included in the Search Results if the "Parents Declined" checkbox is checked on the Active EL Record.

Field	Definition
<b>Regular School Year - Students with an eligible EL record</b>	Allows users to select EL students who have an EL Program Status = EL or Exited EL and that have an enrollment that occurs anytime in the regular school year. The student's Enrollment Start Date must be on or before the last day of the school year and the student's Enrollment End Date must be NULL or on or after the first day of the school year. If the student's EL Program Status = Exited EL, the Program Exit Date must be in the reporting year. The School Year Start and End Dates are used for the reporting year. If the School Year dates are blank, use 7/1/XX - 6/30/XX as the default. Students will not be included in the Search Results if the "Parents Declined" checkbox is checked on the Active EL Record.
<b>Search</b>	Searches the database for students that meet the selected criteria.
<b>Sort By: Grade / Name</b>	Sorts the Selected Students list by grade or by name.
<b>Search Results</b>	Lists students matching the search criteria. Details regarding a student can be viewed by hovering over the student's name. Students previously added to the Selected Students list are not shown in the Search Results.
<b>Selected Students</b>	Lists the students selected from the Search Results to be included in the mapping.
<b>Save &amp; Next</b>	Saves the students in the Selected Students list and advances the user to the next category mapping
<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

#### To search for and select students using the Campus Filter option:

1. Indicate the locked Plan Type from which to include students in the Search Results.
2. Indicate the Primary Disability from which to include students in the Search Results.
3. Click **Search**. Students meeting the search criteria display in the Search Results window.
4. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected

Students list.

5. Click **Save & Next, Save, Previous or Next**.

<b>Save</b>	Saves the students in the Selected Students list and returns the user to the Select a Category to Map screen.
<b>Previous</b>	Advances the user to the previous category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Next</b>	Advances the user to the next category mapping. When a user navigates away from a mapping, the system will remember the information previously entered for the mapping. Upon returning to the mapping, the user will be asked if they want to continue from where they previously left off.
<b>Cancel</b>	Selected students are not saved and the user is returned to the Select a Category to Map screen.

#### To search for and select students using the Ad Hoc Filter option:

1. Select the appropriate Ad Hoc Filter.
2. Click **Search**. Students meeting the search criteria display in the Search Results window.
3. Select students to include in the mapping from the Search Results window. Users can use the arrow buttons or drag and drop students to add or remove students from the Selected Students list.
4. Click **Save & Next, Save, Previous or Next**.

#### To create Course Mappings:

- ▶ [Click here to expand...](#)

This section describes how to create course mappings for a selected school.

1. Select **Courses**.
2. Select the appropriate course that is being mapped.

The courses displayed depend on the school selected and the grade level mappings.

When searching for and selecting courses to be included in a mapping, the different search options can be used in conjunction with each other. When courses are added to the Selected

Students list using one of the search options, other courses can be added to the same list using a different search option. Courses removed from the Selected Courses list will display in the Search Results when another Search option is chosen. Only courses marked as Active display in the Search Results.

Select a Category to Map

This tool allows the user to create and/or edit category mappings for the selected school. The category mappings are used to calculate the CRDC survey results. Grade Levels determine which categories need to be mapped for the selected school and must be defined before any other category can be selected.

Passing Score Options

**Passing Score Options Editor**

Field	Definition
<b>Passing Score Indicator: Grading Task</b>	Allows the user to select the grading tasks that are used to define a passing score.
<b>Passing Score Indicator: Transcript</b>	Allows the user to define the total number of credits the student must receive in order to pass the course category.
<b>Advanced</b>	Opens a new screen that allows users to group courses together to be considered passing. This step is not required for most districts. A student will be considered passing if they pass one or more of the courses selected in this category. A passing score is defined by either receiving a passing score on a grading task or reaching a minimum number of transcript credits. Only use this tool if a student must pass more than one course in the same school year in order to be considered passing. Group courses together in the Course Requirement box to define course dependencies. Only set the Total # of Credits if it is different than the amount defined under Passing Score Options on the previous page

Passing Score Advanced Options: Capital City High School

Report Version: 2023-2024 School Year: 2023-2024

**Passing Requirement**  
\*Note: The step is not required for most districts.

A student will be considered passing if they pass one or more of the courses selected in this category. A passing score is defined by either receiving a passing score on a grading task or reaching a minimum number of transcript credits. Only use this tool if a student must pass more than one course in the same school year in order to be considered passing. Group courses together in the Course Requirement box to define course dependencies. Only set the Total # of Credits if it is different than the amount defined under Passing Score Options on the previous page.

Algebra I – Grades 7 & 8 Courses	Course Requirement	Total # of Credits	Remove
C210 Accounting	<input style="width: 100px; height: 30px; border: 1px solid #ccc; border-radius: 5px; padding: 5px; margin: 0; margin-bottom: 5px;"/> <input style="width: 10px; height: 15px; border: 1px solid #ccc; border-radius: 5px; padding: 2px; margin: 0; margin-bottom: 5px;"/> <input style="width: 10px; height: 15px; border: 1px solid #ccc; border-radius: 5px; padding: 2px; margin: 0; margin-bottom: 5px;"/> <input style="width: 10px; height: 15px; border: 1px solid #ccc; border-radius: 5px; padding: 2px; margin: 0; margin-bottom: 5px;"/>	<input style="width: 100px; height: 30px; border: 1px solid #ccc; border-radius: 5px; padding: 5px; margin: 0; margin-bottom: 5px;"/> <input style="width: 10px; height: 15px; border: 1px solid #ccc; border-radius: 5px; padding: 2px; margin: 0; margin-bottom: 5px;"/>	<input style="width: 15px; height: 15px; border: 1px solid #ccc; border-radius: 5px; padding: 2px; margin: 0;"/>

#### To set the Passing Score Options:

1. Select the appropriate **Passing Score Indicator: Grading Task** or **Transcript**.
2. If Grading Task is selected, select the appropriate grading task(s) used to define a passing score.
3. If Transcript is selected, enter the number of credits the student must receive in order to pass the course category.
4. If necessary, select the **Advanced** to group courses together to be considered passing.
5. Click **Save & Next, Previous, or Next**.
