

Student Interchange - At-Risk (Colorado)

Last Modified on 07/17/2025 3:34 pm CDT

[Report Logic](#) | [Report Editor](#) | [Generate the Report](#) | [Report Layout](#)

Tool Search: Student Interchange

The At-Risk Report obtains student-level address information needed to address the needs of At-Risk students.

Student Interchange ★ [Reporting](#) > [CO Data Pipeline](#) > [Student Interchange](#)

Student Profile Interchange

This tool will extract data to complete the Student and Enrollment Interchange files.

Add - N/A

Delete - N/A

For more information about Tool Rights and how they function, see the [Tool Rights](#) article.

Report Logic

All students enrolled in the selected calendar report. One student can report multiple times depending on the student's census information. Students must have a Primary Enrollment record as of the entered Effective Date.

- The most recent primary enrollment is used when there is no active primary enrollment. When there is more than one primary enrollment, the enrollment with the latest start date is used; when those are all the same, the enrollment with the highest enrollment ID is used.
- When the student's first enrollment start date is AFTER the entered Effective Date, the

student does not report.

Census information is reported from Primary Households. When the student is associated with more than one primary household, all households report.

Students are not included in this report when:

- Enrollment records are marked as No Show or State Exclude.
- Enrollment Grade Level has a Kindergarten Schedule mapped to 002: Infant.
- Grade Levels are marked as State Exclude.
- Calendars of enrollment are marked as State Exclude.

Non-Binary Gender Reporting

Schools can assign students a gender of M: Male, F: Female or N: Non-binary. This is done on the [Identities](#) tool and/or the [Demographics](#) tool.

Data Pipeline Extracts and other required extracts use the Legal Gender field included in the Protected Identity Information to report student identity information.

To properly record a gender of N: Non-Binary, on the Identities tool:

1. Assign the **Gender of N: Non-Binary** in the standard identify fields.
2. Assign the **Protected Identity Information Legal Gender** field to M: Male, F: Female or N: Non-Binary.
3. Save the record when finished.

The screenshot displays the 'Identities' tool interface for a student named 'Luka A' (DOB: 04/16/2006, AHS Class of 2024). The interface includes a 'Save' button and a 'New' button. The 'Identity Information' section contains fields for PersonID (120648), Last Name (Student), First Name (Luka), Middle Name (Andrea), Suffix (dropdown), Gender (dropdown menu with 'N: Nonbinary' selected), Pronouns (dropdown), Birth Date (04/16/2006), and Soc Sec Number (dropdown). The 'Protected Identity Information' section contains fields for Legal Last Name (Student), Legal First Name (Luka), Legal Middle Name (dropdown), Legal Suffix (dropdown), and Legal Gender (dropdown menu with 'Female' selected). The 'Race/Ethnicity' field is also visible. The interface is titled 'Identities' with a star icon and a breadcrumb trail 'Census > People > Identities'. A 'Related Tools' link is also present.

Gender and Legal Gender Assignment

Report Editor

Field	Description
Report Type	Selection determines the Student Interchange report that generates. Choose At-Risk .
Ad hoc Filter	Select a saved ad hoc filter to only include those students in the filter in the report, assuming those students meet the reporting logic and business rules of this report.
Effective Date	The entered date is auto-populated to the current date and returns those students actively enrolled in the selected calendar on this date.
Format	The At-Risk report can be generated in either CSV or HTML formats.
Calendar Selection	Select at least one calendar to generate the report. Calendars can be selected by Active Year, School or Year.
Report Generation	The Student Layout extract can be generated immediately using the Generate Report button. Or, use the Submit to Batch button to select when the report is generated. See the Batch Queue article for more information on this functionality.

Generate the Report

1. Select the **At-Risk** from the **Report Type** field.
2. If desired, select students from an existing **Ad hoc Filter**.
3. Enter the desired **Effective Date**.
4. Select the **Format** of the report.
5. Select the **Calendar(s)** from which to report information.
6. Click the **Generate Extract** button or the **Submit to Batch** button. The report displays in the desired format.
