Tool Search: School Connections

School Connections allows the district administrator to determine which schools within the district can offer courses to other schools and which schools can accept offerings from other schools. For example, in a district with three high schools, those high schools might be marked to offer to and accept from the other high schools but not from the elementary schools.

Schools can set a maximum number of students to limit the available seats for students from one school participating in Cross-Site Enrollment at the Serving School for all sections of each Cross-Site Course. Those seats are available for students enrolled in Cross-Site courses at the other schools.

This tool is only available when Cross-Site Enrollment is enabled for a state. When it is turned on for a state, but the district or school has not been set for participation, a message displays that Cross-Site Enrollment is not enabled for the district.

School Connections

See the [Cross-Site Enrollment School Connections Tool Rights](#) article for information about rights needed to use this tool.

For Intradistrict participation schools, set the toggle to Intradistrict and choose which schools within your district are available to offer classes to and accept classes from other schools. When marked here, the [Cross-Site Enrollment Setup](#) tool displays only those schools configured for offering classes to and accepting classes from.

- When the **Accept From** option is not selected in the Home School's School Connections tool for a given Serving School, that Serving School and its courses do not display on the Home School's Serving Panel.
- When the **Offer To** option is not selected in a Serving School's School Connections tool for a given Home School, that Serving School and its courses are not displayed on the Home School's Serving Panel.

For Interdistrict participation districts, select (verify it is marked) **Accept Offerings** to display courses from that district's schools in the [Cross-Site Enrollment Setup](#) tool.

Setting the School Connections Offer To/Accept From is done after determining which schools in the district are marked for Cross-Site Enrollment participation. For more information, see the [Cross-Site Configuration](#) article.

For each course section marked as Offer To, the value in the **Max Students** field limits the total number of students from the school that can enroll in a section of a course.

Filter Schools

The list of schools can be filtered by school name or grade level. Multiple options can be selected for each filter field, and matching results alter the list of schools immediately.

The screenshot shows the 'Edit School Connections' interface for a Charter School. It includes two filter fields: 'Filter by School' and 'Filter by Grade Level', both with 'Select items...' dropdown menus. Below these is a table with columns for SCHOOL, GRADE LEVELS, OFFER TO, ACCEPT FROM, and MAX STUDENTS.

SCHOOL	GRADE LEVELS	OFFER TO	ACCEPT FROM	MAX STUDENTS
AldrichElementary	01 - KP	<input type="checkbox"/>	<input type="checkbox"/>	
Bryant Elementary	01 - KP	<input type="checkbox"/>	<input type="checkbox"/>	
Chowen Middle	06 - 11	<input checked="" type="checkbox"/>	<input type="checkbox"/>	10
Drew Middle	08 - 30	<input checked="" type="checkbox"/>	<input type="checkbox"/>	10
Emerson High	01 - 30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	15
Fremont High	06 - 08	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	15

School Connections - Filter Fields

Establish Offer To and Accept From Settings for Intradistrict Participation

The following steps must be performed for every school in the district marked for Cross-Site

Enrollment participation.

1. Set the Intradistrict/Interdistrict toggle to **Intradistrict**.
2. Click the arrow to the far right of the school name to open the **Edit School Connections** side panel. The list of schools in the district that have been marked for Cross-Site Enrollment display.
3. Mark the **Offer To** checkbox for each school with which the selected school can offer courses.
4. Mark the **Accept From** checkbox for each school with which the selected school can accept courses.
5. Remove the **Offer To** and **Accept From** checkboxes for each school where the selected cannot offer courses or accept courses.
6. Click **Save** when finished. Or continue with the [Max Students](#) procedures.

Set Max Students for Course Sections

The Max Students value is the maximum number of students a particular school can send to the Serving School for every Cross-Site Course Section. Max Students works with the Max Student Counts on the Course (and Section) Information editor and displays in the Walk-In Scheduler when scheduling a student into a course. The value is factored into the Seats Available field on the [Cross-Site Enrollment Setup](#) tool and the [Walk-In Scheduler](#).

1. Determine how many students from a Home School can be scheduled into any of the course sections at the Serving School.
2. Enter that number or use the up/down arrow keys to set the **Max Students** value. The value cannot be set lower than zero (0); It cannot be more than three digits (100-999).
3. Click **Save** when finished.

Establish Offerings for Interdistrict Participation

The following steps must be performed for every school in the district marked for Cross-Site Enrollment participation.

1. Set the Intradistrict/Interdistrict toggle to **Interdistrict**.
2. Mark the **Accept Offerings** checkbox for the listed districts where the selected school can accept courses.
3. Remove the **Accept Offerings** checkbox for the listed districts where the selected school cannot accept courses.
4. Click **Save** when finished.

When Accept Offerings is turned off after courses have been mapped, existing mappings and rosters will remain unless manually removed.
