Tool Search: MT Extracts

The Section Extract contains information related to section data. This extract matches the [Section Upload](#) import file.

The screenshot shows the 'MT Extracts' tool interface. At the top, there is a breadcrumb trail: 'Reporting > MT State Reporting > MT Extracts'. Below this is a blue header for 'MT State Extracts'. A descriptive paragraph states: 'This tool will extract data to complete several formats of the MT State-defined reporting formats. Choose the State Format to get the file in the state defined tab separated file format, otherwise choose one of the testing/debugging formats.' The interface is divided into two main sections: 'Extract Options' and '*Select Calendars'. In 'Extract Options', there are dropdown menus for '*Extract Type' (set to 'Section') and '*Format' (set to 'HTML'), along with a 'Generate Extract' button. The '*Select Calendars' section asks 'Which calendar(s) would you like to include in the report?' and has three radio button options: 'active year' (selected), 'list by school', and 'list by year'. A scrollable list below shows the selected '24-25' calendar with sub-items: '24-25 [object Object]', '24-25 Butte High School', and '24-25 East Middle School'.

Section Extract Editor

Tool Rights

Read - Generate extract.

Write - N/A

Add - N/A

Delete - N/A

Report Logic

Reports one record per section from the selected calendar (s). Course Number and Section Code cannot be blank.

This report can run against a district's active year as well as any prior year and in both District Edition and State Edition against District Edition data.

File Formats

The extract can be generated in the following formats:

- State Format (TSV)
- HTML
- CSV
- XML

Use the State Format when all data has been reviewed for accuracy and information is ready to be uploaded. Use one of the other formats for data review and testing.

Generate Extract

1. Select the **Section** option from the **Extract Type** dropdown list.
2. Select the desired **Format** from the dropdown list.
3. Choose the desired calendar(s) from the **Calendar** list.
4. Click the **Generate Report** button. The extract displays in a new window in the selected format.

Example

MT Header Records:1			
RecordType	Date	Time	Version
HD	08/23/2024	08:02:49	MT9.1

MT Section Extract Records:797							
RecordType	DistrictNumber	SchoolNumber	CalendarNumber	CourseNumber	SectionCode	SessionType	SessionNumber
SU	0902	1103	0	612	1	SY	01
SU	0902	1103	0	999	1	SY	01
