## Report Logic

For all report types:

- Students must be aged 16 or older.
- Only students who have an Enrollment End Status of **W4: Early Completer/Midyear Grad** or **W6: High School Graduate** are included on the report.
- The student's Diploma Date must fall between the dates of **08/07/XX**, where XX is the beginning year of the reporting enrollment, and **08/06/XX**, where XX is the end year of the reporting enrollment. For example, a 23-24 enrollment uses the dates 08/07/23 and 08/06/24.
- The student's most recent Primary Enrollment that has a Start Date that is before or equal to the Diploma Date reports.

- When a student is a summer graduate (has a summer enrollment and a graduation Diploma Date during the summer period) AND has an enrollment in the next calendar where No Show is marked, the student's record from their summer graduation continues to report, so long as the summer calendar is selected on the extract editor.

Students do not report when:

- The Enrollment is marked as No Show or State Exclude.
- The Calendar of Enrollment is marked as State Exclude.

Each report type included specific logic to generate, as noted in the [Report Layouts](#) section.

## Graduate Classifications

The **Diploma Period** selection (entered on the [Graduation](#) record) determines the classification reported for the student (e.g., "XXth Grade Mid-Year," "XXth Grade Regular," "XXth Grade Summer").

See the [NCSIS Graduation](#) article for additional information.

<b>Setup</b>	
<b>Search Calendars</b>	<p>Use the search field to narrow the list of calendars to select. Use the Expand All/Collapse All option. Place a checkbox next to the desired school and calendars.</p> <p>As noted, all calendars are automatically selected because this is a school-wide report.</p>
<b>Show Active Year Only</b>	<p>Only those calendars for the school year are available for selection when set to ON.</p> <p>When set to OFF, all calendars from all school years are available for selection based on the user's tool rights.</p>
<b>Report Options</b>

<b>Output Options</b>	

Data Element	Description
<b>Report Processing</b>	<p>This is a complex report and requires several minutes to create the data snapshot. Because of this, it always needs to be generated using the <b>Submit to Batch</b> option.</p> <p>The Batch Queue processing can be used for both the report generation and the report review, allowing results to be reviewed at a later time.</p> <p>The Snapshot being compared is taken at the same time as the PMR summary and only students who report on the PMR summary are used in the counts. Submitting to Batch is useful when generating the report for several calendars or for more significant amounts of reported data. See the <a href="#">Batch Queue</a> article for more information.</p>
<b>Format Type</b>	Determines in which format the report generates - CSV or HTML.

## Generate the Report

1. Search for and select the desired **Calendars**.
2. Select the desired **Report Type** from the dropdown list. Only one can be selected.
3. Select an **Ad hoc Filter** to only report data for students included in the filter.
4. Select the desired **Report Processing** option of **Generate Now** or **Submit to Batch Queue**.
5. Select the desired **Format Type**.
6. Click **Generate**. The report displays in the selected format.

See the [Report Layout](#) section for report examples for each Report Type.
