Virginia Student Record Collection, Course, and Enrollment Updates (SIS-180760)

Several updates were made to the Virginia Student Record Collection report for the 2024-2025 school year.

- A new element, Parent Opt-out Flag (field 136), now reports whether the student's parent has opted out of the military directory data exchange. Student data will not be shared with the military when this reports as Y.
- The logic for reporting the Disadvantaged (field 20) element was updated not to report Y only because the school was marked as a CEP Provision School.
- The logic for reporting the CTE Special Populations (field 41) element was updated to report in instances when more than one record is eligible to report, and one record has a special population, and one does not. The special population record reports, even when that record is older than the one without the special population.
- The list of SCED Course Identifier codes on the Course Information tool was updated. The previous value, 03158, is now mapped to the 03071 code. Several missing codes were also added.
- The list of values available in the Military Connected Code dropdown on the Enrollments tool was updated.
