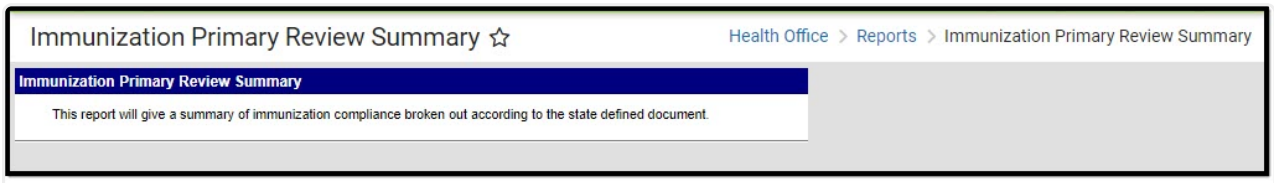
Tool Search: Immunization Primary Review Summary

The Primary Review Summary (PRS) reports information schools are required to report to Oregon's Local Health Department. This report contains sections A-H. The Oregon Student Immunization and Susceptibility Report can be submitted as Section B of this report.

See the Oregon Immunization Rules article for vaccine compliance rules and requirements.



Immunization Primary Review Summary Header

Extract Editor Fields

Field	Description	Image ***Click to enlarge***
Report Section(s)	Only the selected sections of the report generates. Options include: • A • E • F-H	 *Report Section(s)*

Copyright © 2010-2024 Infinite Campus. All rights reserved.

Field	Description	Image *Click to enlarge*
What students would you like to include in the report?	Options are: • Grade • Ad hoc Filter	 *Student Selection*
Grade	Limits the report results to students in the selected grade(s). The grade selection becomes available when the Grade radio button is marked. State grades listed come from a locked Attribute Dictionary.	
Ad hoc Filter	Limits the report results to students included in a pre-saved Ad hoc Filter. The Ad hoc Filter selection becomes available when the Ad Hoc Filter radio button is marked. See the Filter Designer article for additional information.	
Number of K-12 students excluded on exclusion day	The number of K-12 students excluded on exclusion day. This value displays on the report but does not factor into any calculations, nor is this saved to the database.	 *Exclude Student Fields*
Number of PK students excluded on exclusion day	The number of PK students excluded on exclusion day. This value displays on the report but does not factor into any calculations, nor is this saved to the database.	
Enrollment Date	Narrows the report results to students enrolled on this day. This date must be within the school year selected in the toolbar.	 *Enrollment Date and Generate Report Button*
Generate Report	Generates the report in an HTML format.	

Report Population

Students report when:

- They are enrolled in the selected calendar on the Enrollment Date and have a current enrollment in the selected calendar. All enrollments end dated before the Enrollment Date are excluded.
- They are enrolled in the selected calendar on the Enrollment Date with a Service Type of P and are currently enrolled in the selected calendar. Students with an Enrollment Service Type

of S or N count in the Total Enrollments and Students Not Counted data elements on the report layout.

Students are excluded when they are marked as No Show.

Logic

- Users receive an error when no school or calendar year is selected in the Campus toolbar before generating the report.
- Compliance data pulls in from the ImmComplianceStatus database table.
- The report can be run against a district's active year or prior years.
- The report generates in human-readable format (HTML).
- Only current vaccine compliance statuses report, but the report can be generated for a date in the past. This means that students enrolled on the past date report but vaccine compliance for the current date reports, so there may be a discrepancy.
