North Carolina - Enrollment, UID Sync to State Edition (SIS-182264) **[Enhancement]**

State Edition syncing from District Edition did not occur when creating a new person (student), enrolling that person into a school, and adding a State UID. This has been corrected.

Follow these steps when creating a new student:

1. Use the Student Locator to first search for an existing student.
2. After searching for a student and results are found, State Edition will already have a UID for

that person. That UID will then be assigned to the person at District Edition when that record is selected.
3. After searching for a student and not finding appropriate results, click the *Create New Student* button. Demographics and enrollment information can be entered from the editor that displays.
4. When adding demographics and enrollment data in the Locator, and the student does not currently have a UID assigned to them, use the Assign NC Student ID button. The NCDPI Lookup screen displays, allowing the ability to search for a current UID or, if none, Register for a UID. Upon selection to Assign or Register, the State ID field shows as Pending Save.
5. Once the new record is saved, the enrollment and UID information is sent from District Edition to State Edition.
