Locating Your Campus Version and App Server Information
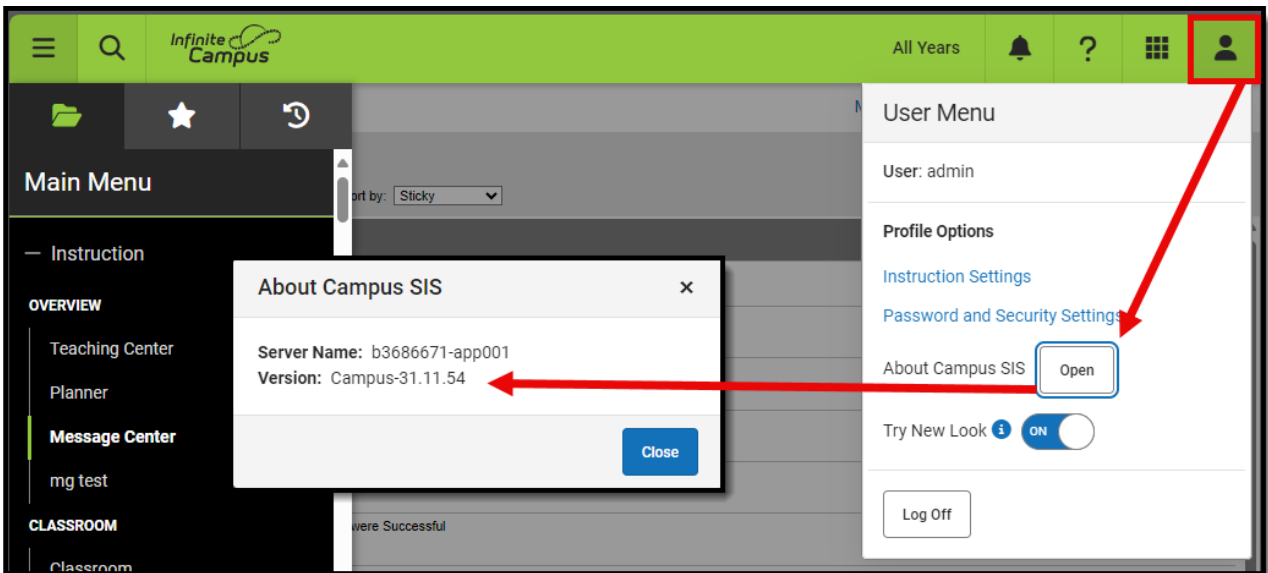

Last Modified on 11/07/2024 11:47 am CST

To look up your Campus Version and/or App Server information:

1. Click the User Menu
2. Click the **Open** button next to About Campus SIS (see image below)

A window will appear indicating your **Server Name** (App Server) and **Version** (Campus Version). This information is useful when working with Infinite Campus on a Support ticket or when understanding which features are available based on the Campus Version you are currently running.

If you're not logged into Campus you can also find this information on the Campus login screen. Your Campus Version will appear near the bottom of the screen, and app server information can be found by clicking **Show Help** and locating the **App Server** field (see image below).
