Tool Search: SIRS Extracts

The SIRS Student Behavioral Interventions extract is an annual report to the New York State Education Department regarding the use of restraints in behavior events. This includes physical restraints, timeouts, substantiated and unsubstantiated allegations of the use of prohibited interventions, corporal punishment, mechanical restraint, and other prohibited aversive interventions, prone physical restraint, and seclusion.

The screenshot shows the 'SIRS Extracts' tool interface. At the top, there's a breadcrumb trail: 'Reporting > NY State Reporting > SIRS Extracts'. Below this is a header 'NY State Repository System Extracts'. A message states: 'This tool will extract student data for SIRS data collection. Choose CSV format when uploading to SIRS, otherwise choose one of the testing/debugging formats.' The interface is divided into two main sections: 'Extract Options' and 'Select Calendars'. In 'Extract Options', there are fields for 'Extract Type' (set to 'Student Behavioral Intervention'), 'Start Date', 'End Date', 'Format' (set to 'State Format(CSV)'), 'Ad Hoc Filter', and 'Column Headers' (set to 'Exclude'). There are buttons for 'Generate Extract' and 'Submit to Batch'. In 'Select Calendars', there's a question 'Which calendar(s) would you like to include in the report?' with three radio button options: 'active year' (selected), 'list by school', and 'list by year'. Below these options is a list of selected calendars: '24-25', '24-25 Edgewood School', '24-25 Scarsdale Middle School', and '24-25 Scarsdale High School'.

## Extract Editor Fields

Field	Description
<b>Extract Type</b>	The name of the SIRS extract generated. This would be Student Behavior Intervention.
<b>Calendar Selector</b>	Identifies which Calendar(s) are included in the report. Calendars can be sorted by active year, school, or year. This defaults to the Calendar selected in the Campus Toolbar. At least one Calendar is required to generate the report.
<b>Start Date</b>	The first day on which data is reported.
<b>End Date</b>	The last day on which the data is reported.

Field	Description
<b>Format</b>	The format in which the report generates. Options are State Format (CSV) or HTML.
<b>Ad Hoc Filter</b>	Limits the report results to students included in a pre-saved Ad hoc Filter. The Ad hoc Filter selection becomes available when the Ad Hoc Filter radio button is marked. See the <a href="#">Filter Designer</a> article for additional information.
<b>Column Headers</b>	Allows users to select whether to include or exclude the column headers.
<b>Generate Extract</b> or <b>Submit to Batch</b>	Users have the option of submitting a report request to the batch queue by clicking <b>Submit to Batch</b> instead of immediately generating the report by clicking <b>Generate Extract</b> . The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the <a href="#">Batch Queue</a> article.

## Report Logic and Population

A record reports per instance of physical restraint or timeout and for allegations concerning prohibited intervention types. See the [Codes and Descriptions](#) section below for Intervention Restraint definitions.

Multiple records report only when:

- A new situation occurs involving the student after the prior event has de-escalated.
- A new restraint or intervention response type is employed during the event. For example, during an event, a staff person employed physical restraint on a student, and the situation escalated to the point where a timeout was used. The addition of the timeout would constitute an additional event record beginning with that application.

The report can be generated against a district's active year and prior years.
