## State Edition Test Accommodations

Test Accommodations records sync between district and state editions. Records can also be created in state edition, but note the following:

- When a record is created in State Edition, it is saved without a District ID, indicating that it is state-owned.
- When a District is selected in State Edition, the record is saved with a District ID indicating it is district-owned.

In the State Edition, when the user does not select a district from the Context Switcher, the user can see any and all test accommodations that the student has across all districts. However, the details of that record are not displayed. To see specifics of an individual Test Accommodations record, the user must select the district associated with that record from the Context Switcher.

In the following examples, the District of the record is selected in the Context Switcher.

The screenshot shows the 'Test Accommodations' record for Lesley A. Acebedo (Student #: 681181936, Grade: 10, DOB: 09/26/2007). The record is for the 'ACCESS for ELLs - Listening' assessment. The 'Context Switcher' is open, showing a dropdown menu with 'Butte Public Schools (0902)' selected. The main form displays details for the selected district, including program participation, current grade, start and end dates, and test settings for listening, speaking, and reading.
