

# Message History (SIF Unity)

Last Modified on 01/15/2026 1:06 pm CST

## Tool Search: Message History

The Message History tool allows users to generate a report of SIF Unity data activity and a report of State IDs that have been updated.

The Message History tool allows users to generate the following types of reports:

- **Message History** - generates a report that includes detailed information about messages sent for a specific SIF object within a specific time frame. This report allows you to review recent SIF data activity and can be used to verify configuration and troubleshoot any errors that have occurred during the exchange of data.
- **State ID Report** - generates a report of state IDs that have been updated in a specific time frame.

SIF Unity tools are only available for SIF v3.X or higher.

### Message History

## Review the Message History Summary:

The Message History Summary displays below the editor and shows a summary of SIF events that have occurred for the objects.

#### Message History Summary

| Object                 | Last Response       | Status  | Records Sent |
|------------------------|---------------------|---------|--------------|
| LEAInfo                | 11-14-2025 09:11 AM | Success | 1            |
| StudentContactPersonal | 12-04-2025 01:27 PM | Success | 4196         |
| StudentPersonal        | 12-11-2025 03:24 PM | Success | 1436         |
| StudentcontactPersonal | 12-12-2025 10:43 AM | Failure | 0            |

Message History Summary

## Message History Summary Fields

| Field                | Description   |
|----------------------|---|
| <b>Object</b>        | The name of the SIF object(s) for which a message occurred. |
| <b>Last Response</b> | The data and time the message was sent.                     |
| <b>Status</b>        | Indicates if the message was a success or failure.          |
| <b>Records Sent</b>  | The number of records sent for the object.                  |

### To Generate the SIF Message History Detail Report:

1. Select **Message History** as the Report Option.
2. Enter the **Start Date**. This is the first day in the date range of SIF messages included in the report.
3. Enter the **End Date**. This is the last day in the date range of SIF messages included in the report.
4. Select which **SIF Objects** will report message data. Select 'All Objects' to see all SIF messages within the timeframe or select an individual (or more) SIF Object to see SIF message results for these specific objects.
5. Generate the report.
6. The report will display below the editor. If desired, the report can be exported to Excel.

#### Message History Detail

| Message History Detail   |               |                        |                        |         |              |              |                   |                  |                                      |

SIF Message History Report

## Message History Detail Fields

| Field                       | Description   |
|-----------------------------|---|
| <b>Object</b>               | The name of the SIF object(s) selected for which the report is being generated. The objects are selected in the Extract Options editor.   |
| <b>Configuration</b>        | The name of the configuration in which the report is being generated.   |
| <b>Start Date</b>           | The Start Date indicated in the Extract Options editor.   |
| <b>End Date</b>             | The EndDate indicated in the Extract Options editor.  |
| <b>Status</b>               | <p>The determined status of the batch sync.</p> <ul style="list-style-type: none"> <li>Success</li> <li>Failure</li> </ul> <p><b>Note:</b> The report is filtered to show Successful statuses by default.</p> |
| <b>Request Type</b>         | <p>The type of request for the SIF object.</p> <ul style="list-style-type: none"> <li>Batch Sent</li> <li>Request for ID</li> </ul>   |
| <b>Records Sent</b>         | Indicates the number of records sent for the object.  |
| <b>Records Processed</b>    | The number of records successfully processed by the receiving SIF entity. If this number varies from the Records Sent number, this indicates errors occurred.   |
| <b>Number of Errors</b>     | The number of records that were not successfully processed by the receiving SIF entity. This indicates additional investigation might be necessary to identify the reason behind these errors.                |
| <b>Message History GUID</b> | A unique identifier for the batch sync processed for that object.   |

# Generate the State ID Report

The State ID report generates a report of State IDs that have been updated within a specified timeframe.
