

SIF Person Data (SIF Unity)

Last Modified on 05/06/2026 10:26 am CDT

Tool Search: SIF Person Data

The SIF Person Object Viewer tool allows you to view the json output of a student for specific SIF objects depending on the Configuration. This tool is useful for reviewing student SIF object data and troubleshooting specific SIF records that may be sending erroneous data or causing errors on the receiving end.

SIF Unity tools are only available for SIF v3.X or higher.

Instructions —

This tool displays records that are currently in Campus for the selected SIF Object and configuration.

Note:
SIF Person Data Tool only displays person related objects and the SIF Unity Object Viewer displays both person and non-person related objects.

View the Student's SIF Object Data

To generate a view of the json for a specific SIF object:

1. Select the **School Year**. This defaults to the latest available year.
2. Select the **Configuration**.
3. Select the **SIF Object**. Only Objects that have either 'Respond to Requests' or 'Publish Events' rights for the selected Configuration will appear. Only person-related objects are available. For non-person related objects, use the SIF Object Viewer tool.
4. Click the **Generate SIF Data** button. The json for the object will appear below.

The screenshot shows the 'SIF 2.* Object Viewer' interface. It includes three dropdown menus for configuration: 'Select a School Year' (set to 2024-2025), 'Select a Configuration' (set to ChristineIssueOK), and 'Select a SIF Object' (set to StudentPersonal). Below these is a 'Refid' field containing the value '000009DC5EEC03268E48877500009E5D'. The main area displays a JSON object for 'StudentPersonal' with fields like 'AlertMessages', 'LocalId', 'StateProvinceId', and 'OtherIdList'. A 'Generate SIF Data' button is located at the bottom left of the interface.

```

{
  "StudentPersonal": {
    "AlertMessages": null,
    "MedicalAlertMessages": null,
    "LocalId": "33149",
    "StateProvinceId": "1002019721",
    "ElectronicIdList": null,
    "OtherIdList": {
      "OtherId": [
        {
          "value": "",
          "Type": "0004",
          "TypeCodeset": null
        }
      ]
    }
  },
  "Name": {
    "Prefix": null,
    "LastName": "Abit",
  }
}

```
