Prevent Non-Portal User Accounts from Purchasing Activities (SIS-181562)

Previously, non-portal user accounts (Campus Instruction, etc.) would receive a connection error when logging in to the Campus Parent Portal and attempting to register for activities via the School Store. Now, they will receive an alert that guides them to log in using a Parent Portal account instead.

Path: N/A

Activity Registration Maintenance (SIS-184022)

- An error occurred where preapproval forms could be edited when the form was read-only. Users can no longer alter any fields when the form is read-only.
- The Incomplete Registration(s) count on step 1 of the Activity Form Cleanup was not correctly

filtering out students who had no form assigned but had started their registration. This has been corrected.

Discussion Updates (SIS-168838) **[Enhancement]**

The following updates have been made to Discussions:

- Added an option for students to attach files to a discussion post. Teachers can enable this option in the Discussion settings.
- Changed color coding logic to outline a post instead of coloring the background. For example, when scoring discussions, the selected post is outlined in blue.
- Logic for deleting posts has been updated. Added an option to delete all posts in a thread and to delete all of a user's own posts. If all posts in a thread are deleted, the thread no longer displays in the discussion.
- Added a 'New' label for new posts and replies.
- Posts are now labeled based on the role of the poster: Admin, Teacher, or Student.
- Teacher posts are now displayed in the Campus Parent view even if the parent's student hasn't replied.
- Removed the Print button - users can still print Discussions using their browser's print function.

Path: Instruction > Curriculum > Curriculum List > create an assignment > add a Discussion

File Upload - Long File Names (SIS-182210)

Path: Instruction > Curriculum > Curriculum Import

WYSIWYG Editor Character Limits (SIS-183732) **[Enhancement]**

Character limits have been added to the WYSIWYG editors in assignments. These limits are very large and unlikely to be reached through normal use. For screens with a single WYSIWYG editor, the limit is over 500,000 characters; for screens with multiple editors, the limit is over 60,000 characters. Limits refer to the code view of the editor, which includes additional characters for elements such as formatting and images. These limits also apply to assignment editors that students interact with via Campus Student, such as Text Editor answer fields.

Census

Cross-Site Enrollment

Visit Is Cross-Site Enrollment Available in My State? article to see if Cross-Site Enrollment is available for your state.

Cross-Site Enrollment - Designate Which Districts Can Participate with Other Districts (SIS-179487) **[Enhancement]**

Administrators can now select which districts their district can accept Cross-Site offerings from when Cross-Site Enrollment tooling is turned on.

For interdistrict Cross-Site Enrollment districts, the School Connections tool now includes a toggle for Interdistrict and Intradistrict. When set to Interdistrict, districts can choose (marked to Accept Offerings) to interact with other districts. If the district is not set to Accept Offerings, courses from that district will not display for mapping in the Home district's Cross-Site Enrollment Setup tool.

When Accept Offerings is turned off after courses have been mapped, existing mappings and rosters will remain unless manually removed.

Path: Scheduling & Courses > Cross-Site Enrollment > School Connections

Cross-Site Enrollment - Attendance Workflow Updates (SIS-183905) **[Enhancement]**

Previously, attendance recorded for Cross-Site Enrollment students allowed for processing at both the Home School and the Serving School. This has been updated to have the *Serving School is the school of record.* This applies to both Interdistrict and Intradistrict participation.

- Any initial status coming from the Home School can be accounted for in the Serving School unless the Serving School has already supplied a status.
- Attendance status changes cannot be changed at the Home School.
- Additional changes from the Home School where the Serving School has already reconciled the status or added their own status is not accounted for at the Serving School.

Path: Cross-Site Enrollment; Attendance Office

Cross-Site Enrollment Attendance Update for Home Schools (SIS-184174) **[Enhancement]**

When the Serving school has provided an Attendance Status or reconciled the attendance record, regardless of whether the Home school has sent any initial attendance, the Home School is no

longer able to update that attendance record. This update coincides with other Cross-Site Enrollment Attendance updates (SIS-183905) and enforces the role of the Serving School always being the School of Record.

The following areas have been updated:

- Student Attendance Tool - The Excuse field only includes excuses that have the same status as the locked attendance record. Radio buttons to change the status have been disabled.
- Attendance Entry Wizard - An attempt to change a Status on the locked attendance record alerts the user that the record cannot be changed. Radio buttons to change the status on the locked attendance record are disabled.
- Section Attendance - Radio buttons to change the status on the Attendance side panel are disabled.
- Teaching Center - Radio buttons to change the status using Take Attendance or the Seating Chart are disabled.

Path: Cross-Site Enrollment
