# DIS Dashboard

Last Modified on 04/03/2025 1:49 pm CDT

Tool Search: DIS Dashboard

The **DIS Dashboard** tool allows staff such as District and State System Administrators to monitor DIS and SIF related activity originating from multiple sources.
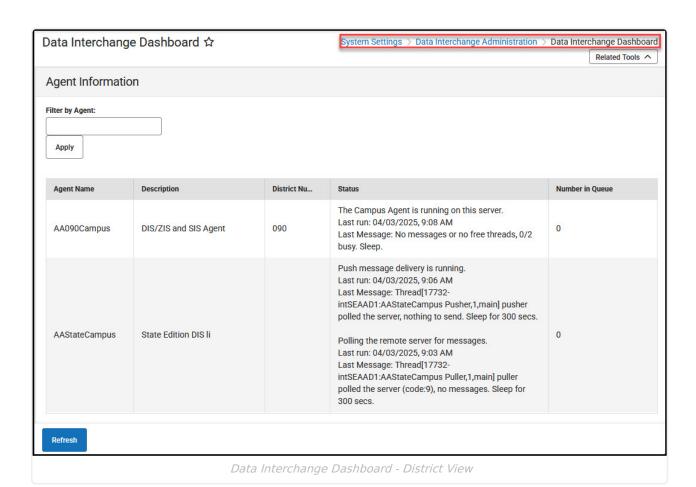

The DIS Dashboard displays local application data related to data interchange, transfer, and messaging, including DIS, SIF, and POS activities.

> This tool is turned on behind a feature toggle and is not currently available for general customer use.
>
> States can view Agent Information by State, single district, or All Districts. Districts view district level Agent Information.
