## Tool Search: Transcripts

A transcript is a historical record of a student's performance in a course. The information listed on the transcript can vary from district to district depending on district preferences. Each district records grading information that students receive on transcripts and report cards. Grading information is connected to the course schedule of a student.

Additional Information fields provide further details on the transcript entry, and includes localized fields (used for state reports) and district-defined fields (created by the district) This section is collapsible or expandable by clicking the minus/plus sign on the right-hand side.

See the core [Transcripts](#) article for information on necessary tool rights, available Ad hoc fields, and general Transcript processes.
