

Generate Section Templates Tool Rights

Last Modified on 02/07/2025 3:27 pm CST

Section Templates are used by schools with complex schedules to define the meeting pattern of a section for schedule placement. This Wizard provides an alternative to the Section Template Information tool for creating template groups and templates.

To learn how to use this tool, see the [Generate Section Templates](#) article.

The screenshot shows the 'Generate Section Templates Wizard' interface. At the top, there is a breadcrumb trail: 'Scheduling & Courses > Section Templates > Generate Section Templates Wizard'. The main content area has a blue header 'Generate Section Templates Wizard' and contains the following text:

Section Templates associate one period in a rotating day schedule with a period in another day schedule. For example, in a Calendar with three rotating schedules, Day A Period 1 and Day B Period 1 are the same; Day A Period 5 and Day C Period 1 are the same. Section Templates mark these periods across Period Schedules.

This tool creates Section Templates, based on a set of Template Parameters added below. Section Templates are placed in Template Groups. Template Groups are associated to Courses. Scheduling Board uses the templates in the group to place sections in associated periods across day schedules. Section Templates can also be created or modified manually, on the Section Templates tab.

Create Section Templates by defining Template Parameters. Each parameter describes where a check(s) will be placed on the grid for the selected Period Schedule. For each Parameter, choose the Period Schedule (limit of one parameter per Period Schedule), the duration of the section (grid depth) and a starting period. Add additional Template Parameters, using the Add Parameter button. For example if a Course meets in Period Schedule A, for one period, starting in Period 2, select the following: A Day, 1, 2. Section Templates can be placed in a new Template Group or added to an existing group.

The interface includes two radio buttons: 'New Template Group' (selected) with a text input field containing 'Rotation 2', and 'Section Template Group' with a dropdown menu showing 'Rotation 1'. Below this is a 'Template Parameters' section with a form: 'This course meets in period schedule' (Daily), 'for' (2), 'period, starting in period' (1), and an 'Add Parameter' button. At the bottom of the form is a 'Generate Templates' button.

Scheduling & Courses > Section Templates > Generate Section Templates Wizard

Related Tool Information:

- [Section Template Information](#): Create template groups and templates. Configure template placement.
- [Generate Section Templates](#): Create section template groups and templates. May be used instead of manual creation via Section Template Information.
- [Mass Set Section Template Groups](#): Assign template groups to one or more courses.

Available Tool Rights

Subrights in *italics*. Selecting R/W/A/D at the **Section Templates** level populates the selection to the *subrights*. Select individual subrights if you do not wish to populate Section Templates level rights down to the subright level.
