

Cross-Site Enrollment School Connections Tool Rights

Last Modified on 04/01/2025 1:11 pm CDT

Cross-Site Enrollment allows administrators to determine which schools within the district can offer courses to other schools and which schools can accept offerings from other schools. For example, in a district with three high schools, those high schools might be marked to offer to and accept from the other high schools but not from the elementary schools.

Staff such as Counselors, Curriculum Managers and Schedulers can use the [School Connections](#) tool to set up courses and sections to offer and map courses to other schools that offer Cross-Site courses.

See the [School Connections](#) article to learn more about using these tools. The [Cross-Site Enrollment Overview](#) article outlines the entire process.
