

Section Information Tool Rights

Last Modified on 12/14/2025 8:45 pm CST

The **Section Information** tool lists details about a particular course section. Information is organized into cards for General Section Information, Section Setup, State Defined fields, District Defined fields, and Section Placement details.

See the [Section Information](#) article to learn how this tool is used.

The screenshot shows the 'Section Information' tool interface. At the top, there's a breadcrumb trail: 'Scheduling & Courses > Courses > Section Information'. Below this, the course is identified as '0011-2 Core English I' with a teacher 'Staff, DeAnna'. A 'Collapse All' button is on the left, and a 'Related Tools' link is on the right. The main section is titled 'General Section Information'. It contains several input fields: 'Section Number: (Required)' with a value of '2', 'Teacher Display Name' with 'Staff, DeAnna', and a message 'There is no active primary teacher for this section.' Below these are fields for 'Teacher' (Administrator, System | Staff, DeAnna), 'Max Students' (0), 'Room' (0228), 'Team', 'Skinny Seq', 'Advisory', 'Homeroom', 'Lunch Count', 'Milk Count', 'Adult Count', 'Custom Count 1', 'Custom Count 2', and 'Custom Count 3'. At the bottom of this section, it says 'Section ID: 719969 | Modified By Administrator, System on 10/3/2025 10:29 AM'. Below the main section are four expandable cards: 'Section Setup', 'State Defined', 'District Defined', and 'Section Placement'. At the very bottom are buttons for 'Save', 'Delete', 'Reset', and a refresh icon.

Section Information

At a minimum, **Read rights** are required for both **Course Sections** and **Section Information** to search for, select courses, and select and view section information.

See the [Course Sections Tool Rights](#) article for additional information.

Available Tool Rights

R	W	A	D
Access and view section information	Modify existing section information.	N/A	Delete a course section.
