

Course Rules Tool Rights

Last Modified on 03/31/2025 3:24 pm CDT

Course Rules are added to courses to assist with scheduling and planning courses across multiple years. When a rule is applied to a course, its complement is applied to its pair. Rules should only be used when absolutely necessary to achieve the district's education goals.

See the [Course Rules](#) article for details on adding scheduling rules and planning rules to courses.

The screenshot shows the 'Course Rules' interface for '0011 Core English I'. At the top, there are navigation links: 'Scheduling & Courses > Courses > Course Rules' and a 'Related Tools ^' button. Below the course name, there are four action buttons: 'New Scheduling Rule', 'New Planning Rule', 'Save', and 'Delete'. A 'Rule List' table is displayed with the following data:

Rule Type	Rule Detail
Scheduling Rule	0011 Core English I Before 0012 Core English II
Planning Rule	Child Of: 0011 Core English I Child Of 0012 Core English II
Planning Rule	Grade Level(s): 9th Grade, 10th Grade, 11th Grade, 12th Grade

Below the table is a 'Planning Rule Detail' section. It includes a description: 'A Planning Rule defines relationships between courses across years, allowing students to effectively plan their school career and take courses that fit their needs. Planning rules are not used in the scheduling process.' There are two dropdown menus: '*Rule' with 'Child Of' selected, and '*Course 2' with '0012 Core English II' selected. A note states: 'This course is a dependent part of Course 2. Parent of/Child of rules associate multi-term courses that have been broken up into individual courses for schedule flexibility. Requesting the parent part will give a student a request for all dependent parts.'

Course Rules

This tool also requires users to be assigned at least **Read** rights to **Section Information**.
