Advanced Attendance and Appointments Release Notes (2025)

Last Modified on 08/04/2026 3:32 pm CDT

The Advanced Attendance and Appointments toolset is a custom tool and is only available to districts who purchase these tools. The Advanced Attendance and Appointments toolset is part of the Campus Workflow Suite.

Release notes provide the applicable personnel the ability to review enhancements, modifications and corrections included in a release pack prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in the product.

Advanced Attendance and Appointments Release Notes describe all changes included within the release pack which may impact users who use the Advanced Attendance and Appointments tools as add-on functionality to their existing student information system.

Questions or concerns regarding an update should be directed to Campus Support.

See the Advanced Attendance and Appointments Product Documentation for more information.

The following Release Notes are available:

Advanced Attendance and Appointments Version 2.5.51 (12/18/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Fixed an issue where Hall Pass History Report and Barcode Labels Report required tool rights to Scan History in order to access the tool. (CDP-4639) (CDP-4651)
  - Tool Search: Hall Pass History Report, Barcode Labels
- Fixed an issue where Absence Request Processing was using the submitted time rather than the time on the absence request. This caused issues with excuse codes not filling in correctly, the mass processing tool not working as intended, and requests submitted before/after school not working as intended. (CDP-4468) (CDP-4667) (CDP-4670)
  - Tool Search: Absence Request Processing

Advanced Attendance and Appointments Version 2.5.50

(12/12/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

This release includes one ticket (CDP-2759); the notes below explain the updates being made.

Check In/Out Scanner and Absence Requests

- The update being made only applies to the initial default attendance codes on the review screens.
- Exception: If a user processes an absence request without reviewing the Attendance Grid, the new defaults are used to assign attendance to the student in the request.
    - Users can still manually change the attendance codes prior to processing the scan/request.

Check In/Out Scanner Check In

- The system compares the attendance code assigned to the period the student is checking into against periods before and after the check-in. If the student is checking in during passing time, the code from the next period is used.
- For any periods *before* the check-in the system compares each period working backward one-by-one from the current period:
    - If the Attendance Codes match, the code is overwritten to the default code (from Scanner Settings for the Check In/Out Scanner) and continues to check prior periods.
    - If the Attendance Codes do NOT match, the existing code is left as-is and stops checking prior periods.
- For any periods *after* the check-in, the system compares each period working forward one-by-one from the current period:
    - If the Attendance Codes match, the code is removed (because the student is now present in school) and continues to check future periods.
    - If Attendance Codes do NOT match, the existing codes are left as-is, and no further checks are performed for future periods.

Check In/Out Scanner Check Out

- The system compares the attendance code assigned to the period the student is checking out of against periods after the check-out. If a student checks out during passing time, the code from the next period is used.
- For any periods *before* the check-out:
    - All existing attendance will remain as-is since check-outs do not affect prior periods.
- For any periods *after* the check-out the system compares each period working forward one-by-one from the current period:
    - If the Attendance Codes match, the code is overwritten to the default code (from Scanner Settings for the Check In/Out Scanner).

- If Attendance Codes do NOT match, the existing codes are left as-is, and no further checks are performed for future periods.

Absence Request Check In

- The system compares the attendance code assigned to the period the student is checking into against periods before and after the check-in. If the student is checking in during passing time, the code from the next period is used.
- For any periods *before* the check-in, the system compares each period working backward one-by-one from the current period:
  - If the Attendance Codes match, the code is overwritten to the default code (which is the initial attendance code chosen by the reviewer) and continues to check prior periods.
  - If Attendance Codes do NOT match, the existing codes are left as-is, and no further checks are performed for future periods.
- For any periods *after* the check-in, the system compares each period working forward one-by-one from the current period:
  - If the Attendance Codes match, the code is removed (because the student is now present in school) and continues to check future periods.
  - If Attendance Codes do NOT match, the existing codes are left as-is, and no further checks are performed for future periods.

Absence Request Check Out

- The system compares the attendance code assigned to the period the student is checking out of against periods after the check-out. If a student checks out during passing time, the code from the next period is used.
- For any periods before the check-out:
  - All existing attendance will remain as-is since check-outs don't affect prior periods.
- For any periods *after* the check-out the system compares each period working forward one-by-one from the current period:
  - If the Attendance Codes match, the code is overwritten to the default code (which is the initial attendance code chosen by the reviewer) and continues to check future periods.
  - If Attendance Codes do NOT match, the existing codes are left as-is, and no further checks are performed for future periods.

(CDP-2759)

Tool Search: Check In/Out, Absence Request Processing

Advanced Attendance and Appointments Version 2.5.49 (12/5/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Enhancements

- KY-Only: Added Flags and Guardians/Emergency Contacts to the Check In/Out Manned Scanner review screen. (CDP-4353)
  - Tool Search: Check In/Out
- KY-Only: Added Sign Ins, Sign In Time, Excuse (from Check In/Out Kiosk), Comment (from Check In/Out Scanner), and ability to filter on check ins/outs to the KY specific Sign Out Audit Report. (CDP-4357)
  - Tool Search: Sign Out Audit Report
- KY-Only: Added the ability for parents to enter the reason for signing their student out when signing their name during check out (via the manned Check In/Out Scanner). This reason is copied into the comment field for the attendance that is written for their student and overwrites any previous comment entered by staff. (CDP-4406)
  - Tool Search: Check In/Out

Fixes

- Fixed an issue in the Scan History Report and Hall Pass History Report where having the Search Limit in System Preferences set to a number lower than your total students in the calendar meant you couldn't search for all of your students in the Students search option. Also reduced the students visible to teachers in the Hall Pass History and Scan History Reports to just be students they have rostered in their sections (unless they have Unfiltered Search). (CDP-4550)
  - Tool Search: Hall Pass History Report; Scan History
- Fixed an issue in the Hall Pass History Report where users having calendar rights to only 1 calendar in a multi-calendar school were getting a permission error when loading the tool. (CDP-4567)
  - Tool Search: Hall Pass History Report

Advanced Attendance and Appointments Version 2.5.48 (11/24/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Enhancements

- Added the "No Config" banner to Teacher Hall Pass View when there is no hall pass configuration. (CDP-3493)

Fixes

- Fixed an issue where students in the same restriction group who had hall passes at the same time couldn't end them via scanning into a scanner. (CDP-4396)

Advanced Attendance and Appointments Version 2.5.47 (11/10/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Fixed an issue where periods with no start or end times were causing the school day check to fail. (CDP-4552 and CDP-4553)

Advanced Attendance and Appointments Version 2.5.46 (11/7/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- An issue preventing numerous tools from functioning has been corrected. (CDP-4546)

Advanced Attendance and Appointments Version 2.5.45 (11/6/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- A performance issue with the Hall Pass tool suite has been fixed. (CDP-4533)
- An issue preventing absence requests from processing during school hours, in certain circumstances, has been fixed. (CDP-4537)
- An issue with Scanner Data pages not loading has been fixed. (CDP-4539)

Advanced Attendance and Appointments Version 2.5.44 (10/31/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Fixed an issue where the Student Hall Pass tool would give an internal server error when another student in their classroom has a hall pass assigned to them. This also fixed an issue where Student Hall Pass Lookup would give an internal server error when attempting to open a hall pass. (CDP-4510)
- Fixed an issue where hall passes from prior-year calendars were showing up in the current config. (CDP-4518)

Advanced Attendance and Appointments Version 2.5.43 (10/27/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2543 and later.

Fixes

- Fixed an issue with saving attendance on the Teacher Attendance Scanner. (CDP-4491)

Advanced Attendance and Appointments Version 2.5.42 (10/27/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2531 and later.

Fixes

- Fixed an issue where Hall Pass Settings were not showing in the UI and not allowing Hall Pass Tools to load correctly. (CDP-4481)
- Fixed an issue where users were not able to process absence requests. (CDP-4487)

Advanced Attendance and Appointments Version 2.5.41 (10/21/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2531 and later.

Enhancements

- Added the ability for districts to set school wide limits for hall pass types. (CDP-3063)
- Added a new column to the Hall Pass table for Created by PersonID, which will track the personID of who created the pass. If it was created by a staff member, their personID will be listed. If it was created by a scanner, 0 will be listed. (CDP-3482)
- Added a new Hall Pass History Report that specifically reports on Hall Pass information. Revamped the Scan History Report to add more search functionality, information, and remove any Hall Pass information. Deprecated the Student Scan History Report as you can now find all the same info for individual students in the Scan History Report. (CDP-3895)
- Changed Hall Passes to be School Scoped instead of Calendar Scoped. This allows districts who have a school that has multiple calendars to have one set of hall passes to use, rather than needing to setup multiple sets for the same school. This also allows them to see all hall passes for that school without needing to jump between contexts and allows restriction groups to work across calendars within the same school.
    - Districts that only have 1 calendar per school each year will see no change in their functionality.
    - Districts that have a school with multiple calendars will see all hall passes from those calendars in one singular Hall Pass Settings tool for that particular school, with passes from each calendar being labeled with the Calendar Name it came from. Districts will need to determine which passes they want to keep using and rename them to whatever they like, while deactivating the passes they no longer wish to use. (CDP-3928)
- Added a literal above the upload button in Absence Requests to warn parents about uploading Personally Identifiable Information. (CDP-4255)
- Added an error message to the Mass Assign Alternate ID tool that warns the user when they try to import a file with a person ID that doesn't have a student ID associated with it in Infinite Campus. (CDP-4258)
- Added warning/landing screen for the Check In/Out Manned Scanner to let users know when the tool will work (i.e. it only works during the school's period schedule). Also added a validation on Absence Requests that prevents a request from being processed when the request has an arrival time or departure time outside of the school's period schedule. This is simply providing visibility into the attendance posting logic that is already in place, but wasn't communicated to users. (CDP-4345)

Fixes

- Fix an issue with the following scanners to end hall passes correctly: Check In/Out Manned Scanner, Check In/Out Kiosk, Classroom Attendance Kiosk (in attendance only mode), and the Hall Monitor Scanner. (CDP-4150)
- Fixed an issue where students with Alternate IDs longer than 15 characters would receive an erroneous "Your studentNumber needs to be between 0 and 15 characters" error when trying to scan. (CDP-4278)
- Fixed an issue where the Check In/Out Manned Scanner wasn't adding the Check In/Out Time to the comment for KY. (CDP-4299)
- Fixed an issue where changing the time on an Absence Request prior to processing wasn't changing the Action time for KY. (CDP-4300)
- Added an option to show/hide virtual learning students. This option also controls whether attendance is recorded for those virtual students (if the student is not shown, no attendance is recorded for them). (CDP-4302)
- Added the ability for KY districts to use the Check Out mode of the Check In/Out Kiosk. This is only available if the "Require Signature on Student Check Out" setting in Scanner Settings is unchecked. (CDP-4320)
- Fixed an issue where Chrome was autosaving Teacher Hall Pass Codes in the Student Hall Pass Tool. (CDP-4340)
- Fixed an issue where the Scan History Report was giving a "Bad Input" error upon loading. (CDP-4380)
- Fixed an issue where inactive hall pass types were available for selection in Student Hall Pass Lookup. (CDP-4395)

Advanced Attendance and Appointments Version 2.5.40 (7/29/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2531 and later.

Enhancements

- Added Dirty Tracking to Badge Designer. (CDP-4149)

Advanced Attendance and Appointments Version 2.5.39 (6/6/2025)

Enhancements

- Accessibility improvements for Hall Pass. (CDP-4184 and CDP-4181)

- Added the ability to allow staff to end a student's hall pass on time via the Student Hall Pass Lookup tool. (CDP-3365)

Fixes

- Fixed an issue where absence requests that were submitted by a parent/guardian who was combined with another person record (using the Combine Person tool) failed to load. (CDP-4075)
- Fixed an issue where present minutes were not calculating correctly in certain scenarios. (CDP-4122)

Advanced Attendance and Appointments Version 2.5.38 (5/22/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2511.

Fixes

- Fixed an issue where changing the time on an absence request after it was submitted would not allow it to process the first time you tried.(CDP-2481)
- Fixed an issue where multiple hall passes could be created at the same time. (CDP-4050)
- Fixed an issue where Student Hall Pass Lookup wouldn't load when the server is running with an extra-precise clock. (CDP-4156)

Advanced Attendance and Appointments Version 2.5.37 (4/28/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2511.

Enhancements

- Updated the wording on the Required Checkbox for Absence Request Document Upload to more accurately reflect the checkbox's functionality.(CDP-3769)

Fixes

- Improved Accessibility for Scanning.(CDP-4105)
- Updated removed.xml to take out files that should have previously been removed. (CDP-

4125)

Advanced Attendance and Appointments Version 2.5.36 (4/8/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2511.

Enhancements

- Added the Student Number to the Absence Request Processing screen. (CDP-3163)

Fixes

- Fixed an issue where the Style setting in Scanner Settings was not working correctly for certain scanners. (CDP-3914)

Advanced Attendance and Appointments Version 2.5.35 (4/4/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2511.

Fixes

- Fixed an issue where Student Scan History and Scan History records for students with end-dated enrollments were not visible.(CDP-3995)
- Fixed attendance scanning issue where students with consecutive periods in the same classroom were incorrectly issued hall passes instead of being checked in for their second period. (CDP-3991)
- Fixed an issue where pass timers incorrectly remained visible after ending passes that had been refreshed or time-adjusted. (CDP-4023)
- Fixed an issue with the Classroom Attendance Kiosk so that scanning into a skinnied course now only records attendance without redirecting to the Hall Pass screen. (CDP-4025)
- Fixed an issue where the Sign Out Audit Report would not load for some districts. (CDP-4037)

Advanced Attendance and Appointments Version 2.5.34

(2/28/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2511.

Enhancements

- Updated the excuse code list in mass absence processing of Absent Request Processing to show the code name and excuse code. (CDP-3996)
- Improved the accessibility of the Advanced Attendance and Appointments toolset. (CDP-4004)

Fixes

- Fixed an issue where the Student Hall Pass lookup displayed a "bad input" error the first time it was opened, while functioning correctly afterward. (CDP-3538)
- Fixed an issue in the Hall Monitor Grid where removed comments on issued passes reappeared after a page refresh. (CDP-3800)

Advanced Attendance and Appointments Version 2.5.33 (2/14/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2407.

Enhancements

- Added translations to Hall Pass via the Translation Setup tool. (CDP-3725)
- Added a guardian signature setting that can be enabled on the attended Check In/Out tool when a student is being checked out. Additionally, added the Sign Out Audit Report to find all the signatures collected during check out.(CDP-3884)

Fixes

- Added a back button to the Hall Pass tools in the Student Portal and adjusted the behavior of the back buttons in Portal Scanning tools.(CDP-3888)
- An error occurred where the Classroom Attendance Kiosk did not always take attendance when two courses were held at the same time in the same room for specific course setups. This has been corrected. (CDP-3910)
- An error occurred where the Teacher Hall Pass view was not showing active Return to Class passes initially. This has been corrected.(CDP-3935)

Advanced Attendance and Appointments Version 2.5.32

(1/31/2025)

This version of the Advanced Attendance and Appointments toolset is compatible with Campus.2407.

Enhancements

- Kentucky now has the Sign Out Audit Report and the ability to gather a signature during check out at manned scanners. (CDP-2286)
- Added the ability to hide weekends from the selection process in Absence Requests. (CDP-2287)
- The Non-Rostered Student section will now be hidden if no rooms with a section have been selected. (CDP-3515)
- When a parent submitted an absence request and their student checked in at a kiosk early, the scan showed submitted, but no hall pass was printed. This has been corrected. (CDP-3560)
- Removed the autofill feature from all scanners and kiosks. (CDP-3877)

Fixes

- An error occurred where the Scan History Report was showing a Check Out as a Check In. This has been corrected. (CDP-3846)
- An error caused students in multiple classes in the same room to appear twice in the Teacher Hall Pass View. This has been corrected. (CDP-3898)
- An error prevented the creation of digital hall passes during absence request check-ins. This has been corrected. (CDP-3902)
- When a parent submitted an absence request and wanted to use Arrive Late or Leave Early, the departure time did not appear to be required. This has been corrected. (CDP-3913)
- The Submitted Departure Time label became a tooltip instead of a label when submitting an absence request for an early departure. This has been corrected. (CDP-3915)
