

Transportation Tool Rights

Last Modified on 11/10/2025 2:16 pm CST

The **Student Transportation** tool allows districts to record the bus the student is assigned to and from school and the vehicle the student drives to and from school.

Transportation 2.0 was released in the <u>Campus.2527 Release Pack (July 2025)</u>. Tool rights for both Transportation 1.0 and 2.0 are described in this article.

Enabling Transportation 2.0 is an irreversible, one-time action.

Once Transportation 2.0 has been enabled, you cannot switch back to the previous version. Existing transportation integrations will break, and transportation data will no longer appear in the interface (with the exception of student parking data and parking documents). Previous transportation data will only be available via Ad hoc reporting.

See <u>How do I Move to Transportation 2.0?</u> for more information.

See the following articles to learn how this tool is used:

- <u>Transportation</u>
- Transportation 2.0
