Health Contact Log Tool

Contact logs are maintained for students in multiple locations in Campus. There is also a [Contact Log](#) that pulls information from all these contact logs together on one screen, but users need to have appropriate tool rights to see Contact Log information that was entered in different places in Campus.

This tool displays in both **Student Information > Health** and **Health Office > Student Health**.

Student Health Tool Rights Assignment: When tool rights are assigned to *Student Information > Health > Health Contact Log*, the same tool rights are also assigned to *Health Office > Student Health > Health Contact Log*.
