

Health Administration Tool Rights

Last Modified on 12/14/2025 8:45 pm CST

Typically, [Health Administration](#) tools are set up once and rarely require updates. Very few people other than a System Administrator or Health Administrator should need access to them.

This article groups related Health Administration tools together and explains how/where the information they define or describe is used.

For more information about these tools, see the articles in the [Health Administration](#) category.

Conditions and Treatments

[Condition Setup](#) | [Referring Provider Setup](#) | [Treatment Setup](#) | [Available Tool Rights for Conditions and Treatments](#)

Health Office Staff can record students' health conditions and any treatments associated with them in Campus. Treatments given for a student's health condition can be documented in Campus. The Condition Setup, Referring Provider Setup, and Treatment Setup tools define the elements that are used to add this kind of information to student health records. See the [Condition Setup](#) and [Treatment Setup](#) articles for more information.

Condition Setup

Condition Setup is used to define health conditions that can be associated with students in Campus. Typically this list is populated when a district implements Campus and there's rarely any need to change it other than inactivating conditions that won't be used or marking them to allow flagging of the conditions for students that have them. See the [Condition Setup](#) article for more information.

Condition Setup ☆ Student Information > Health Administration > Condition Setup

Student Information > Health Administration > Referring Provider

Treatment Setup

Health Office Staff can attach Treatments to student Conditions to indicate how the condition is being addressed. If these treatments are administered in school, those instances can be tracked as well. See the [Treatment Setup](#) article for more information.

The screenshot shows the 'Treatment Setup' page with a breadcrumb navigation bar: Student Information > Health Administration > Treatment Setup. The main area displays a table titled 'HealthTreatmentList Editor' with columns 'Code' and 'Description'. The table contains 25 rows, with the first row (Code 1) highlighted. Below the table is a 'HealthTreatmentList Detail' section for the selected row (Code 1). It shows the 'Code' (1), 'Description' (Handicapped), and an 'Active' checkbox which is checked. The URL at the bottom of the page is 'Student Information > Health Administration > Treatment Setup'.

Immunizations

[Compliance Label Setup](#) | [Vaccine Exemption Setup](#) | [Vaccine Setup](#) | [Available Tool Rights for Immunizations](#)

Typically, Vaccine Setup information is added to Campus per state guidelines and is not changed by district or school users. State requirements for exemptions and compliance labels may vary. See the [Compliance Labels](#), [Vaccine Exemptions](#), and [Vaccine Setup](#) articles for more information.

Compliance Label Setup

Compliance labels are used to indicate whether a student is compliant or non-compliant for an immunization.

Office Visits

[Health Complaint Type Setup](#) | [Observation Type Setup](#) | [Intervention Type Setup](#) | [Health Discharge Type Setup](#) | [Available Tool Rights for Office Visits](#)

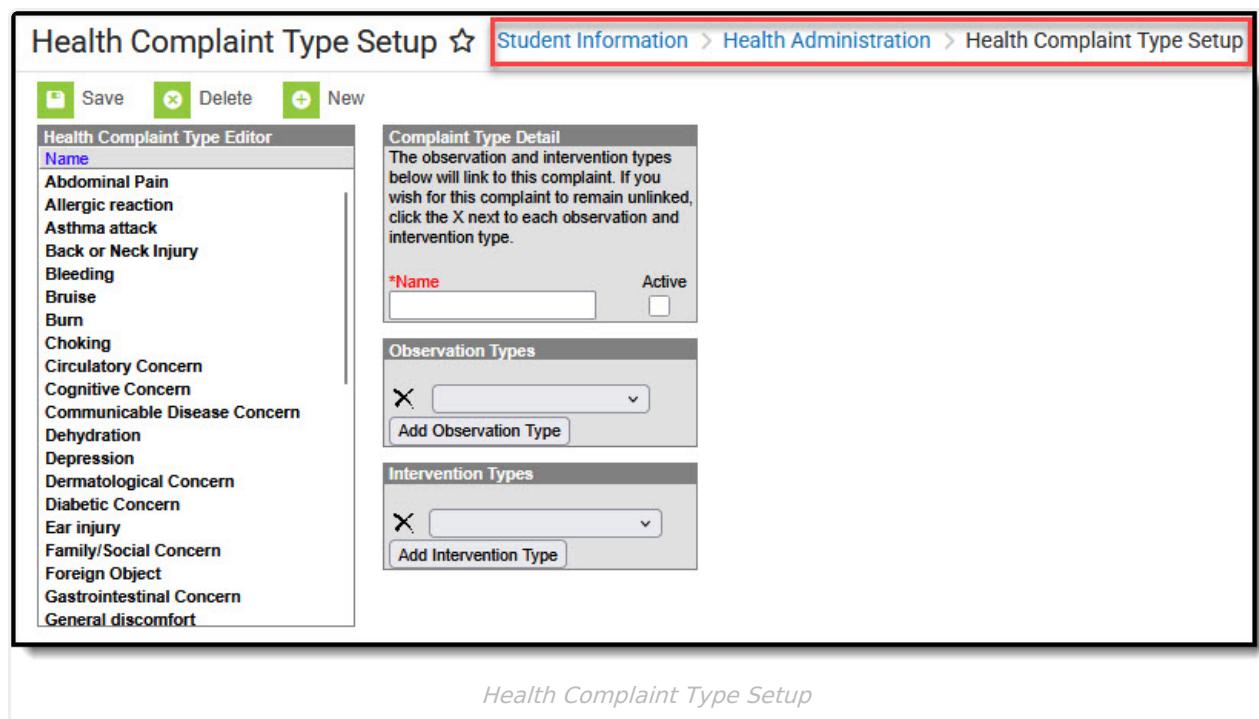

When capturing student Health Office Visits, the following are used as part of the workflow:

- **Complaint** describes why the student is in the health office.
- **Observation** describes the symptoms or other manifestations staff observe in relation to the student complaint.
- **Intervention** describes actions taken to address the student complaint
- **Discharge** specifies where the student went when they left the health office.

See the [Health Complaint Type](#), [Observation Type](#), [Intervention Type](#), and [Health Discharge Type](#) articles for more information.

Health Complaint Type Setup

This tool is used to define reasons why a student would come to the Health Office. Complaints can be linked to Observation and Intervention Types.

Medications

[Medication Form Setup](#) | [Medication Name Setup](#) | [Available Tool Rights for Medications](#)

These tools define details used when recording medication information for students.

- Medication Form describes the physical form of the medicine, for example, caplet, cream or patch.
- Medication Name is the actual name of the medicine.

See the [Medication Form](#) and [Medication Name](#) articles for more information.
