

Assessment Center Tool Rights

Last Modified on 04/10/2025 2:50 pm CDT

The **Assessment Center** allows schools to create and manage assessments, establish proficiency statuses, and import student test scores from external testing agencies.

See the [Assessment Center](#) article for additional information.

Assessment Center

Assessments can only be deleted when they have not been assigned to students.

Instead of deleting assessments, consider archiving the assessments that are no longer needed. This saves historical data for those assessments and prevents future assignments of those assessments.

Available Tool Rights
