

# Course Management

Last Modified on 10/22/2025 11:23 am CDT

The Course Management tool allows courses to be created and managed at the state level and then pushed to district sites, providing consistent course offerings throughout the entire state.

State Course Code information is published directly to districts. Course Master Information and Course Information are updated with the Course Code values. Using Course Masters is not required to utilize this tool, as data is published to both tools.

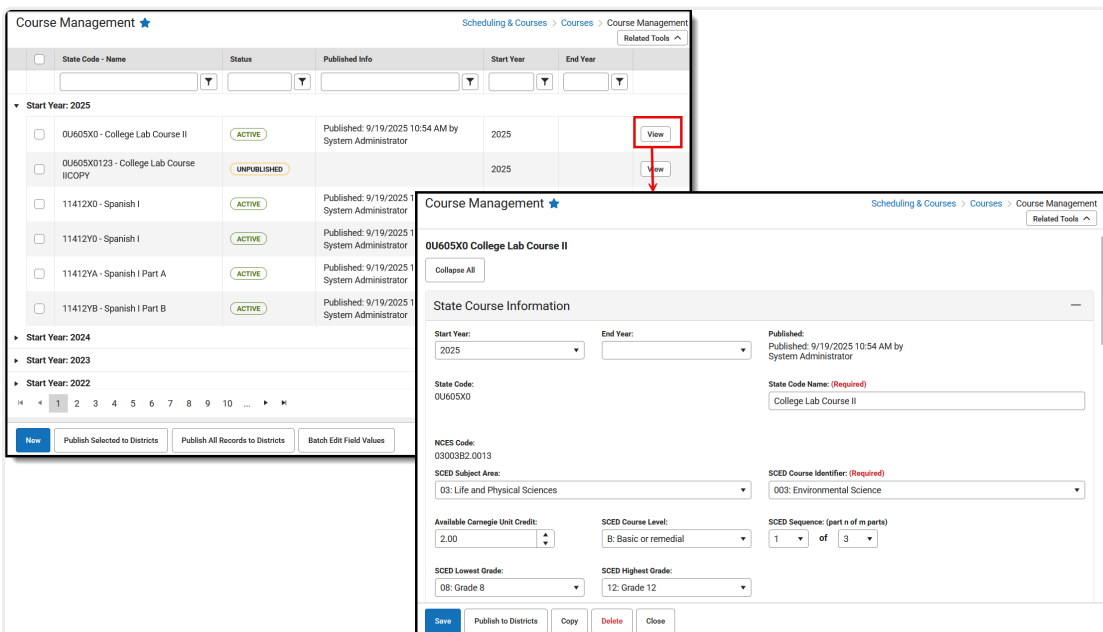

All state course codes are listed by the Start Year.

**This tool is available for State Edition installations**, meaning staff at the Department of Education or other governing bodies with access to ALL districts in the state are responsible for the management of state course codes. That information is published to the districts.

District Edition users aligned with a State Edition can view the Course Management tool when assigned proper tool rights. For those users, the tool is read-only for the main Course Management list of all codes and when viewing individual course codes.

For district edition users NOT aligned with a State Edition, the tool does NOT display.

The Course Management tool replaces the [Course Code Setup](#) tool, which was removed in the [Campus.2543 Release Pack \(October 2025\)](#).

The screenshot displays the Course Management tool interface. The top section shows a list of courses with columns for State Code, Name, Status, Published Info, Start Year, and End Year. The 'Start Year: 2025' section is expanded, showing several courses. The 'View' button for the first course is highlighted with a red box. Below the list, there are buttons for 'Now', 'Publish Selected to Districts', 'Publish All Records to Districts', and 'Batch Edit Field Values'. The bottom section shows a detailed view of the '0U605X0 College Lab Course II' course, including fields for State Course Information, NCES Code, SCEP Subject Area, SCEP Course Identifier, Available Carnegie Unit Credit, SCEP Course Level, SCEP Sequence, SCEP Lowest Grade, and SCEP Highest Grade. The 'Save' button is highlighted with a red box.

Course Management

See the [Course Management Tool Rights](#) article for details on applicable tool rights.

### District Edition Visibility to Course Code Updates

When State Course Codes are updated and published to districts, users who have at least **Write** rights to the following tools receive a State Notification in the Message Center:

- [Add Course Master](#)
- [Course Master Information](#)

## Start Year, End Year

Course Codes are organized by their assigned Start Year, with the most recent start year first. Codes without a start year are listed at the end of the list.

Course Management - Start Year Display on Course Codes

Assigning a year to the state course codes enables the creation of codes for future calendar years and their publication to districts without affecting state course codes for the current year. Both year fields can be entered, or just one year field, or no year fields.

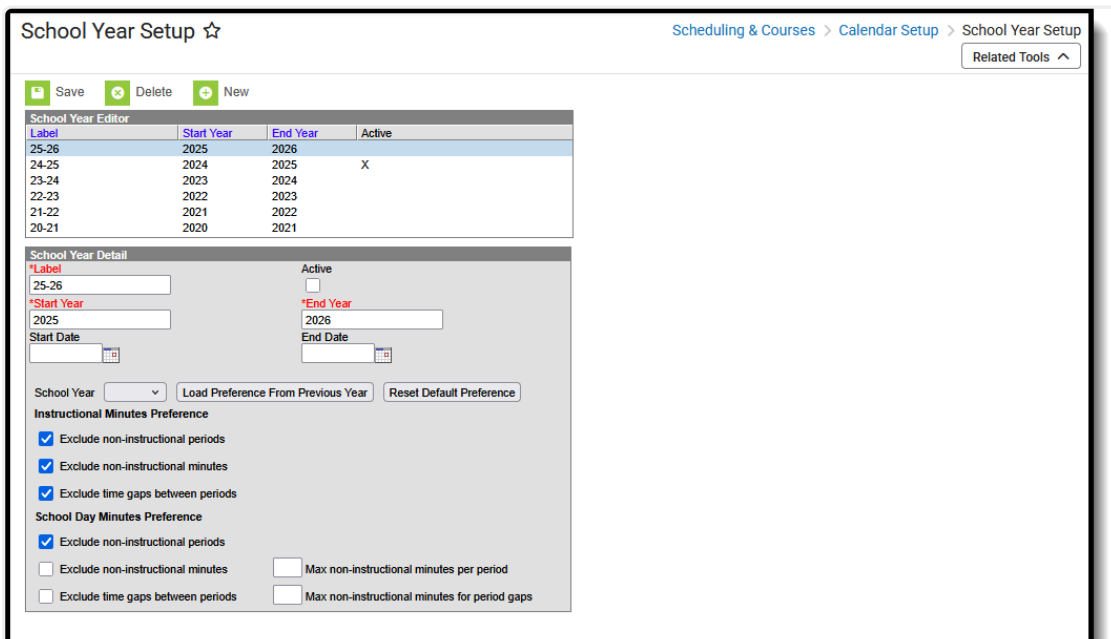

A state course code assigned a Start Year of 2025 and no End Year is current and active with the start of the 2025-2026 school year. A state course code assigned no Start Year and an End Year of 2026 is active through the end of the 2025-26 school year. A state course code with no start or end year fields populated is current and active for all years.

The screenshot shows the 'State Course Information' form. The 'Start Year' dropdown is set to 2025. The 'End Year' dropdown is set to 2026. The 'Course Number' is 010101. The 'State Code' is 010101. The 'NCES Code' is 03052G1.0014. The 'SCED Subject Area' is blank. The 'Published' date is 4/25/2025 11:20 AM by System Admin. The 'State Code Name' is 'Advanced Agricultural Economics and Agribusiness'. The 'SCED Course Identifier' is blank.

Start Year, End Year Assignment

The available Start and End Year values are based on the [School Year Setup](#) values available in State Edition.

The screenshot shows the 'School Year Setup' form. The 'School Year Editor' table lists school years from 20-21 to 25-26. The 'School Year Detail' form shows the '25-26' school year with 'Start Year' 2025 and 'End Year' 2026. The 'Active' checkbox is checked. The 'Instructional Minutes Preference' section has three checked options: 'Exclude non-instructional periods', 'Exclude non-instructional minutes', and 'Exclude time gaps between periods'. The 'School Day Minutes Preference' section has one checked option: 'Exclude non-instructional periods'.

State Edition - School Year Setup

Course Management information overrides Course Master information that is active for the calendar and school years that fall within the course code start and end dates. The Course Master displays the locked values from the Course Management record. Course records associated with that Course Master for that calendar are also updated with the locked values from the Course Management record.

Course Management information overrides State Code information for courses that are NOT linked to a Course Master when that Course falls within the same start and end years as the Course Management record.

When a Course or Course Master of the calendar context uses a state code whose start/end dates DO NOT fall within the same year context, that Course or Course Master becomes inactive for that calendar year. The state code value for that Course or Course Master needs to be updated with a state code from the published list for that year.

## State Course Codes Search and Filter Options

[Search Options](#) | [Filter Options](#)

Searching can be done for All Years and All Districts. There is no need to select a specific year, district, or calendar from the context switcher.

### Search Options

State Course Codes can be searched by the following options:

Option	Description
<b>State Code - Name</b>	Enter the start of the code of the start of the name of the course codes.
<b>Status</b>	<p>Course Codes can be Active, Unpublished, or Inactive.</p> <ul style="list-style-type: none"> <li>• <b>Active Course Codes</b> have been published to the districts and are available for the current school year. They may or may not have start and end years assigned, but if they do, the End Year is either blank/null or a future year.</li> <li>• <b>Inactive Course Codes</b> have an End Year for a school year that has passed. These codes are no longer available for use by districts.</li> <li>• <b>Unpublished Course Codes</b> have been created in Course Management but have not been published to districts.</li> </ul>

Option	Description
<b>Published Info</b>	<p><i>Published</i> refers to the date, time, and user who last published the course code from State Edition.</p> <p>Once published to District Edition, there may be a short lag time before the published course codes display in District Edition, due to the size of the updates made.</p> <p>Enter one of the following:</p> <ul style="list-style-type: none"> <li>• The date the code was published</li> <li>• The time the was published</li> <li>• The user who published it.</li> </ul>
<b>Start Year, End Year</b>	<p>Enter a year that corresponds to the start of a school year and the end of a school year, e.g., 2025 for the start year and 2026 for the end year.</p> <p>Course codes do not require the start year or end year fields to be populated.</p>

Course Management Search Fields

## Filter Options

At first glance, without entering any search criteria or any filtering, Course Codes are listed in Star Year order, with the most recent year first. Course codes without any years assigned are listed last. Within each year, the codes are organized by the Code.

When entering values in the search fields, the list of codes is narrowed to only those that match the entered text.

Click the **Filter** icon to choose additional filtering options.

## Manage State Course Codes

[Add a New State Course Code](#) | [Copy a State Course Code](#) | [Delete a State Course Code](#)

Modifications can be made to any of the available fields on the available cards. Once updates have been saved, use the **Publish to Districts** button to push those updates to the districts' Course Master Information/Course Information details.

Click **View** on the right-hand side to access State Course Information details.

The screenshot shows the 'Course Management' interface. At the top, there's a breadcrumb trail: 'Scheduling & Courses > Courses > Course Management'. Below this is a table of courses. The first row is 'OU605X0 - College Lab Course II' with status 'ACTIVE' and a 'View' button highlighted by a red box and an arrow. The second row is 'OU605X0123 - College Lab Course II COPY' with status 'UNPUBLISHED' and a 'View' button. Below the table, a modal window titled 'OU605X0 College Lab Course II' is open, showing 'State Course Information'. This modal includes fields for 'Start Year' (2025), 'End Year', 'Published' date, 'State Code' (OU605X0), 'State Code Name' (College Lab Course II), 'NCES Code' (03003B2.0013), 'SCED Subject Area' (03: Life and Physical Sciences), 'SCED Course Identifier' (003: Environmental Science), 'Available Carnegie Unit Credit' (2.00), 'SCED Course Level' (B: Basic or remedial), 'SCED Sequence' (1 of 3), 'SCED Lowest Grade' (08: Grade 8), and 'SCED Highest Grade' (12: Grade 12).

Course Information is organized into the following sections:

- **State Course Information** includes identifying course information, whether it's been published to districts (displays the most recent date and time stamp and who published it), SCED information, and a course description.
- **Course Setup** includes fields like whether the course is an attendance-taking course, uses positive attendance, is standards-based, reports scores on a student's transcript, and much more.
- **State Defined** lists all of the fields used for state reporting in your state and includes fields like Dual Credit and State Report Exclude.
- **Comments** lists any additional information about the course that your school or district wants known. This could be a note indicating when the course was added to the catalog, such as the requirement to meet in a specific room, its exclusivity to seniors, or some other relevant information.

For details on the available fields, see the [Course Information Field Descriptions](#) article.

Not all fields are available on the State Course Information editor. Fields that do not affect course management at the state level - for example, scheduling or district-defined fields - are not included.

The fields available for the state are the same as those at the district level. Depending on state requirements, those fields may or may not be modified at the district level.

When any field on the State Course Information record has a value entered by the state, that value is published to the district and locked.

## Add a New State Course Code

This is a manual process to add ONE state course code.

### Best Practice

Assign a Start Year for the State Course Code so staff at districts can easily locate new or updated codes.

1. Click **New**. The State Course Information editor displays.
2. At a minimum, enter the required values for saving a new state code - **State Code** and **State Code Name**.
3. Assign a **Start Year** and **End Year** to the State Course Code.
4. Enter values for the remaining fields as needed.
5. Click **Save** when finished. The new State Course Code is listed within the Start Year it was assigned. If no year was assigned, it is listed after all codes with a start year.

New Course Codes can only be saved when there are no other records for that code with the same overlapping dates.

For example, if State Code 001X with start/end dates of 2024/2027 already exists, then a new State Code 001X record with blank start/end dates cannot be created; however, a State Code 001X record with a start date of 2027 can be created.

Use the **Reset** button to remove the entered values before saving, allowing you to start over with the process. Use the **Close** button to close the editor and return to the list of state codes.

## Copy a State Course Code

Save changes to the Course codes before copying.

1. Select a State Course Code to copy from the list of available course codes. The State Course Information detail displays.
2. Click **Copy**. A blue banner displays across, indicating the code has been copied.
3. Modify the code as needed: change the State Code Name, the Start Year, etc.
4. Click **Add** to add the copied course code.

Course Codes cannot be copied when:

- There is an overlap in the start year or end year with another record.
- The State Code and State Code Name are the same as another record.

## Delete a State Course Code

1. Click **Delete** to permanently remove State Course Codes.
2. Confirm the validation message to continue.

Once the record has been deleted, the user is returned to the filtered list of course codes.

**Course Codes can only be deleted when they HAVE NOT been published to districts.**

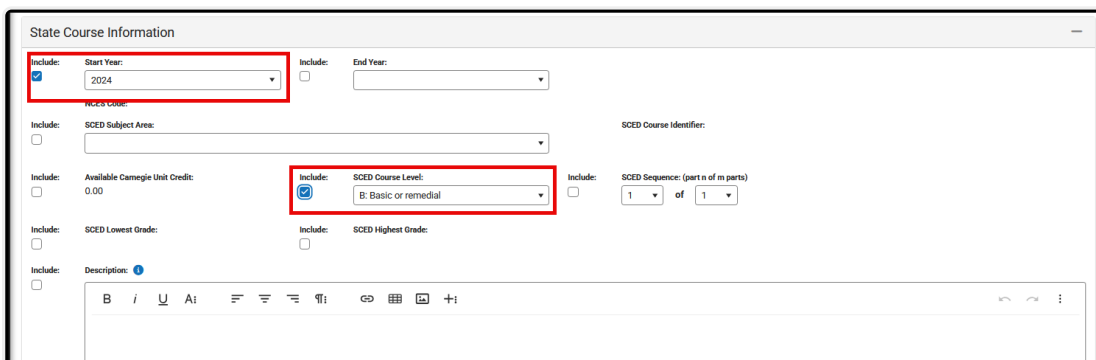

## Batch Edit Course Code Field Values

Use this option to update field values for multiple existing state course code records simultaneously. Mark the Include checkbox next to the fields that need to be updated and enter the new value.

Fields on any of the cards can be updated this way, except the following:

- Published Info
- State Code
- State Code Name
- The entire Comment card

In the image below, the Start Year field and the SCED Course Level field are the only two fields with the Include checkbox marked, so only those values will be updated.

The screenshot shows the 'State Course Information' form. The 'Start Year' field is highlighted with a red box, and its 'Include' checkbox is checked. The 'SCED Course Level' field is also highlighted with a red box, and its 'Include' checkbox is checked. Other fields like 'End Year', 'SCED Subject Area', 'Available Carnegie Unit Credit', 'SCED Course Identifier', 'SCED Sequence', 'SCED Lowest Grade', 'SCED Highest Grade', and 'Description' are visible but not selected for update.

*Include Checkbox Marked for Selected Fields*

When the **Include** checkbox is marked, any value entered in the field is updated to that value for all of the selected Course Code records.

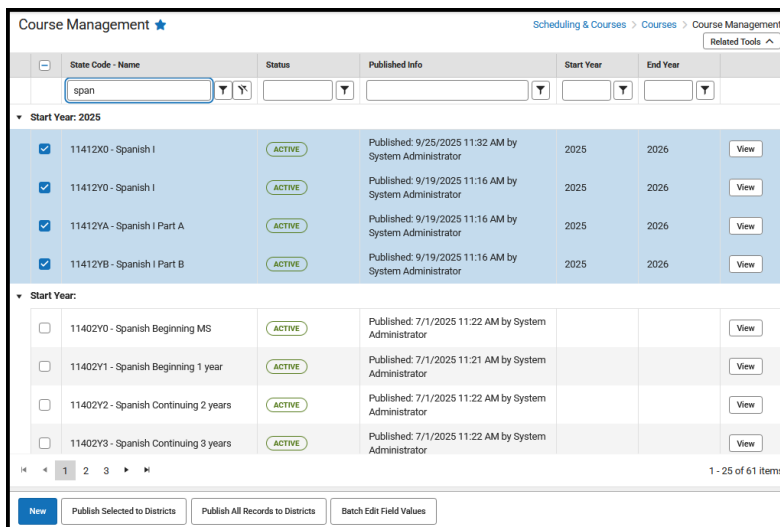

When the **Include** checkbox is marked for a field that **does NOT have a value** (null or blank), the selected course code records for that field are updated to that null/blank value.

- For example, the course code record currently has the GPA Weight set at 1.0. During the Batch Edit process, the Include checkbox was marked for GPA Weight but no value was entered into the GPA Weight field. Upon save, the GPA Weight is set to blank for all records included in the Batch Edit process.

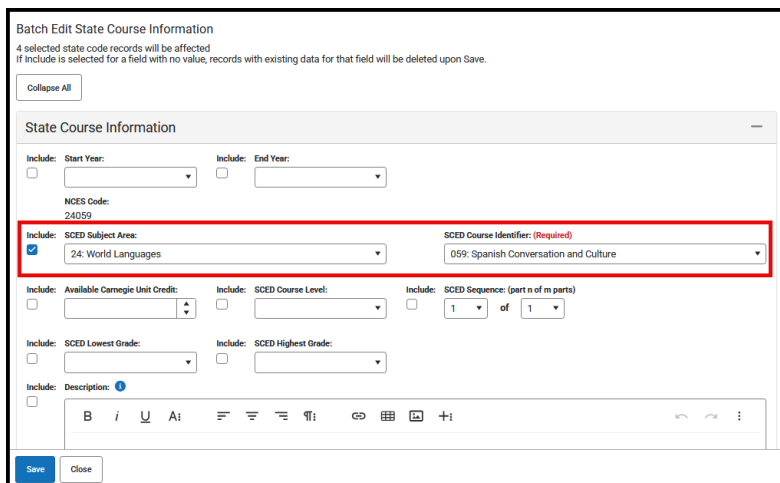

Following the steps below, updates need to be made to the SCED Subject Area and SCED Course Identifier fields.

Updates need to be made to courses assigned the Course Code 11412, which are assigned a SCED Subject Area of 24: World Languages and a SCED Course Identifier of 052: Spanish I.

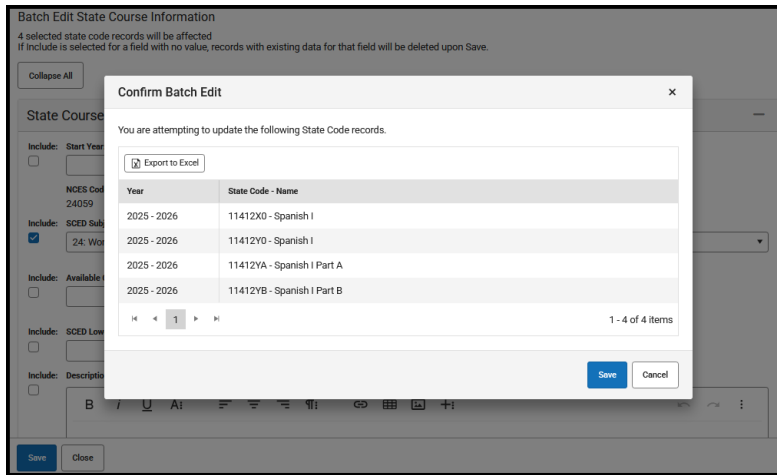

1. From the main Course Management view, locate (search for) the courses that require updates.
2. Place a checkbox next to all of the courses that need to be updated.

3. Click **Batch Edit Field Values**.
4. For each value that needs to be changed, mark the checkbox next to the field and select, enter, or mark the new value. In this example, the SCED Subject Area remains 24: World Languages, but the SCED Course Identifier is changed to 059: Spanish Conversation and Culture.

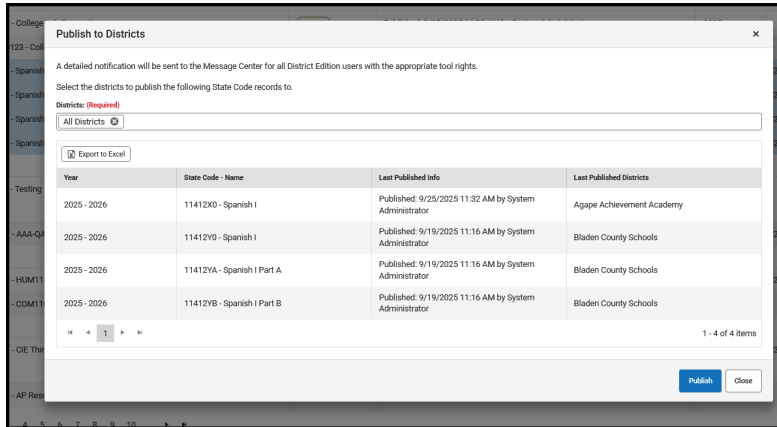

5. Click **Save** when finished. A confirmation message displays, listing the codes that were updated, along with an option to export the list to Excel for additional reporting or tracking purposes.

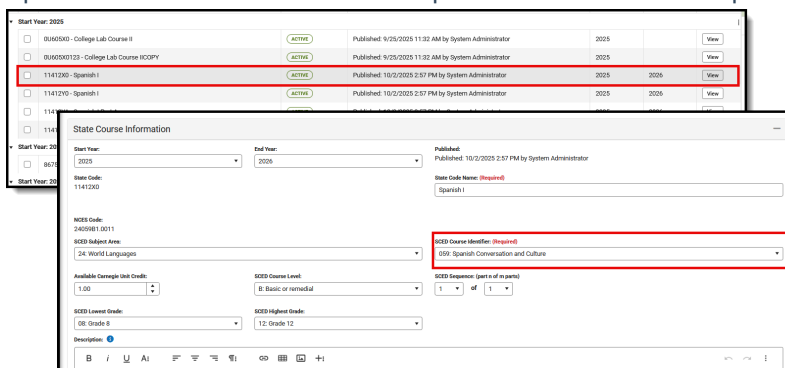

6. Click **Save** on the confirmation to return to the main Course Management view. The selected codes remain selected.

At this point, the values have been updated, and now the changes need to be published to the districts.

1. From the main course management view, make sure all updated records are selected.
2. Click **Publish Selected to Districts**.
3. Select which **Districts** receive the updated values. Choose **All Districts** or specific districts from the list.
4. Review the updates being published, and use the Export to Excel option for additional reporting or tracking purposes.

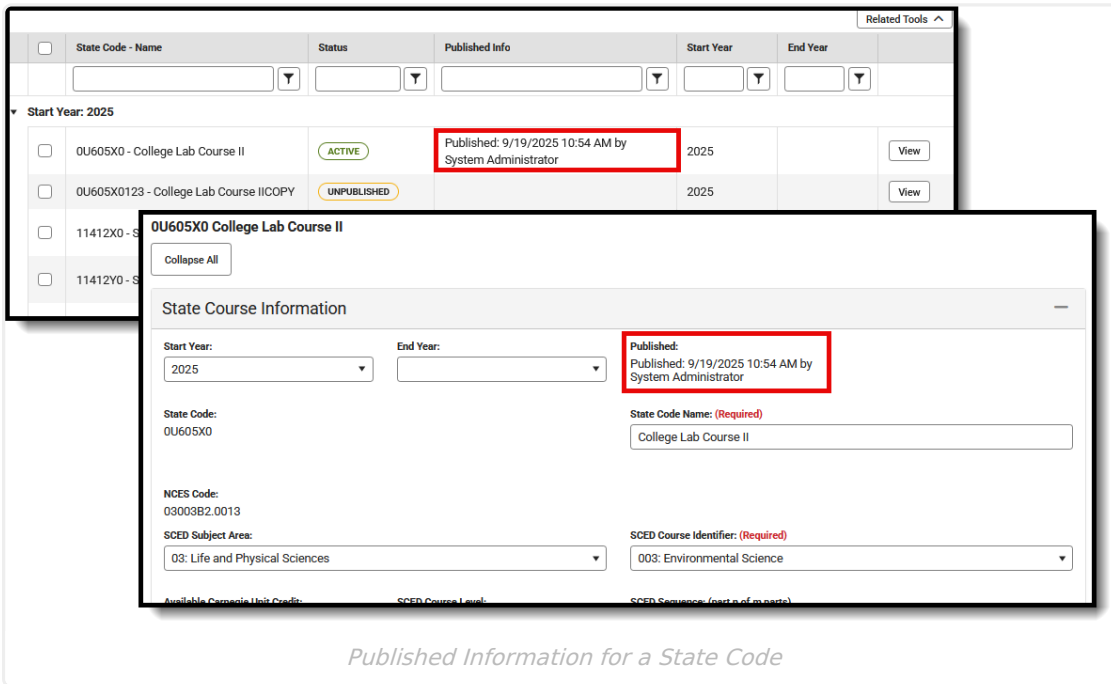

5. Click **Publish**. When the process completes, the Course Management view refreshes with updated Published Info and the updated value. of 059: Spanish Conversation and Culture.

# Publish Course Codes

[Publish All Records to Districts](#) | [Publish Selected State Course Codes to Districts](#)

Published State Course Codes are listed with the date and time, as well as the user who published the codes. This is visible on the main Course Management view and when viewing the State Course Information record.

The screenshot shows the 'Published Information for a State Code' view. It includes a table of state course codes and a detailed view of one course code.

State Code - Name	Status	Published Info	Start Year	End Year
OU605X0 - College Lab Course II	ACTIVE	Published: 9/19/2025 10:54 AM by System Administrator	2025

*Message Center - State Notifications*

## Publish All Records to Districts

1. Click the **Publish All Records to Districts** button. This selects ALL records on ALL pages. A pop-up window displays, listing the Start Year and End Year entered on the State Course Information screen, all State Codes, and when they were last published.
2. Click **Publish**. There may be a short period during which the system processes. When it is complete, the main screen displays, and the Published Info column for those codes is updated to the date and time the publishing at the state edition was complete.

## Publish Selected State Course Codes to Districts

Course information can be published to districts from the main page of the Course Management tool or from the individual State Course Information editor.

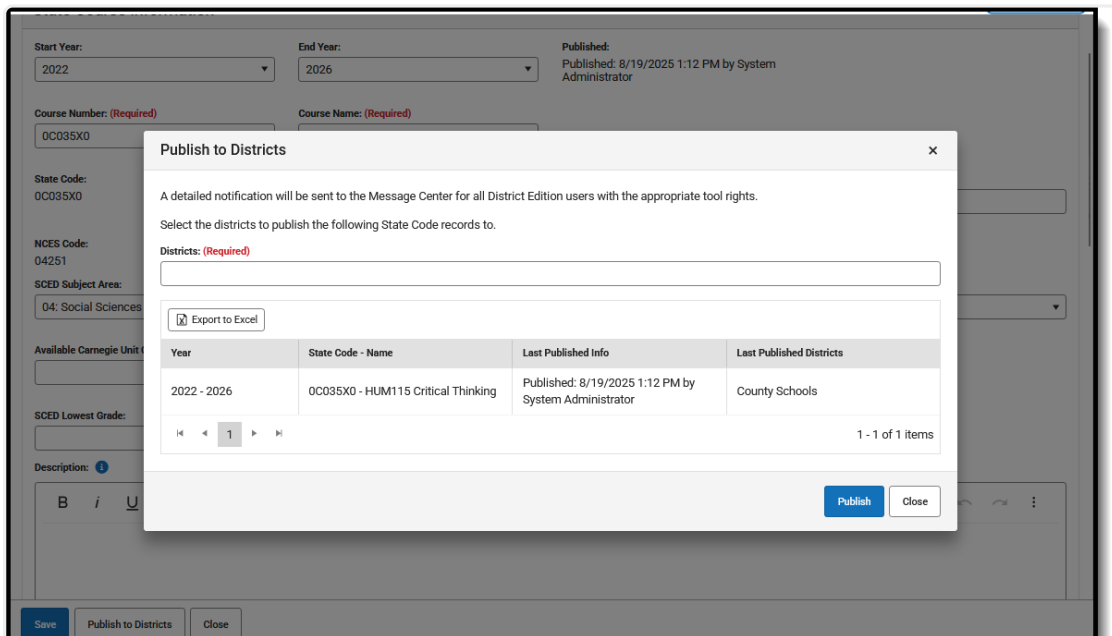

### From the main view of the Course Management tool

1. Select which **State Course Codes** to publish to the districts by placing a checkbox in the left-hand column.
2. Click the **Publish Selected to Districts** button. A pop-up window displays, indicating that a notification with details on the update will be sent to the Message Center and lists the Start Year and End Year entered on the State Course Information screen, the selected State Course Codes, when those codes were last published, and to which districts they were last published.
3. Select which **Districts** receive the notification. Choose **All Districts** to publish the record to all districts in the state, or choose specific districts to publish the record.
4. If desired, click the **Export to Excel** button to export this list of codes to Excel and retain a copy of the update.
5. Click **Publish**. There may be a short time where the system processes. When it is complete, the selected codes are published to districts, and the Published Info column for those codes is

updated to the date and time the publishing was complete.

## From the State Course Information Detail View

1. Click **View** from the main Course Management list of state course codes. The State Course Information editors display.
2. Modify any fields that need to be modified.
3. **Save** those modifications. When the update has been saved, a green Saved banner displays above the Collapse All button.
4. Click the **Publish to Districts** button.
5. Select which **Districts** receive the notification. Choose **All Districts** to publish the record to all districts in the state, or choose specific districts to publish the record.
6. If desired, click the **Export to Excel** button to export this list of codes to Excel and retain a copy of the update.
7. Click **Publish**. The updated course information is pushed to districts with the updated information. The updated record with the date and time the course information was published is visible on the Course Management list.

**Publish to Districts**

A detailed notification will be sent to the Message Center for all District Edition users with the appropriate tool rights.

Select the districts to publish the following State Code records to.

Districts: (Required)

[Export to Excel](#)

Year	State Code - Name	Last Published Info	Last Published Districts
