

Course Management (State Edition) Tool Rights

Last Modified on 10/10/2025 1:14 pm CDT

The Course Management tool is available for State Edition installations. It allows courses to be created and managed at the state level and then pushed to district sites, providing consistent course offerings throughout the entire state.

See the [Course Management](#) article to learn about management courses at the State Edition level.

The screenshot displays the Course Management tool interface. On the left, a list of courses is shown with checkboxes for selection. The main area on the right contains a detailed form for editing a course. The form includes fields for State Course Information, Course Number, Course Name, State Code, NCES Code, SCED Subject Area, SCED Course Identifier, Available Carnegie Unit Credit, SCED Course Level, SCED Sequence, SCED Lowest Grade, and SCED Highest Grade. A description field with a rich text editor is also present. The interface includes navigation links at the top and bottom, and a 'Course Management' label at the bottom center.

Available Tool Rights
