The Summer Education Program tool tracks a student's learning recovery in reading and mathematics. This information reports in the <u>NC Summer Education Extract</u>.

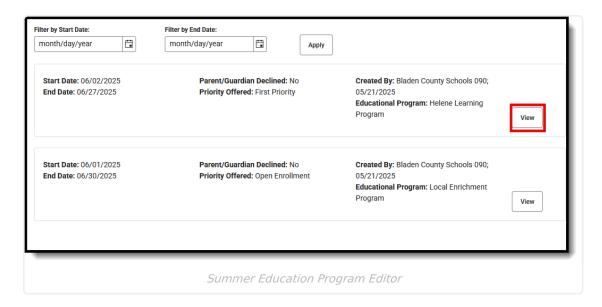

Use the Federal/State Program Updater tool to import Summer Education records to this tool.

This tool is available in both State and District Editions. For State Edition users, this tool is read-only.

The main view of the Summer Education record is the Program Editor, which lists all Summer Education records in chronological order (most recent record listed first) that have been recorded for the student.

To view details of any of the records, click **View.** This opens the Program Detail for the selected record, where information can be viewed or modified as needed.
